OPERATION MANUAL

Full-Color Inkjet Printer

VJ-2638 VJ-1638 VJ-1638W

Rev. VJ1638xE-A-03

Important Notice

1. For Users in Europe

The CE marking is a mandatory European marking for certain product groups to indicate conformity with the essential health and safety requirements set out in European Directives.

By affixing the CE marking, the manufacturer, his authorized representative, or the person placing the product on the market or putting it into service ensures that the item meets all the essential requirements of all applicable EU directives and that the applicable conformity assessment procedures have been applied.

2. For Users in the United States

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications.

Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

3. Trademark Mentioned in this Manual

- MUTOH, ValueJet, VJ-2638, VJ-1638, VJ-1638W, MH-RTL are registered trademarks or product names of MUTOH INDUSTRIES LTD.
- Windows XP, Windows Vista, Windows 7 are registered trademarks or product names of Microsoft Corporation.
- Other company and product names may be registered trademarks or product names.

- No part of this product or publication may be reproduced, copied, or transmitted in any form or by any means, except for personal use, without the permission of MUTOH INDUSTRIES LTD.
- The product and the contents of this publication may be changed without prior notification.
- MUTOH INDUSTRIES LTD. has made the best efforts to keep this publication free from error, but if you find any uncertainties or misprints, please call us or the shop where you bought this equipment.
- MUTOH INDUSTRIES LTD. shall not be liable for any damages or troubles resulting from the use of this equipment or this manual.

Warranty Limitations

- 1. MUTOH INDUSTRIES LTD. warrants part repair or replacement as a sole measure only if a failure is found in the system or in the materials and workmanship of the product the seller produced. However, if the cause of failure is uncertain, decide the action after due mutual consultation. Details concerning the warranty are written in the warranty certificate included with the product.
- 2. The warranty shall not apply to any direct or indirect loss, or compensation for the loss due to the product that has been subject to misuse, neglect, or improper alternation.

About this Manual

1. Contents of the Manual

There are three manuals for this product.

Installation manual

Explains operating procedures along with unpacking, installation and preparation before use.

Product Activation Guide

This manual explains the operation procedure when you start the printer for the first time.

Operation Manual (this manual)

2. Purpose and Target Readers

This manual explains preparations before use and operation procedures for MUTOH Full Color Ink Jet Printer VJ-2638/1638/1638W.

This manual is prepared for the owners and operators of this printer.

Before using this printer, fully understand the contents and directions in this manual.

3. Manual Configuration

Section	Description
1 Safety instructions	This chapter explains the installation of this printer, warning terms that operators need to know, caution items and warning labels on the printer main unit.
2 Product overview	This chapter explains the features of the printer along with the names and functions of each part.
3 Before using	This chapter explains necessary steps before using the printer.
4 Handling the printer	This chapter explains how to handle the printer.
5 Panel setup menu	The section explains the Setup menu of the printer.
6 Maintenance	This chapter describes daily maintenance of the product.
7 Troubleshooting	This chapter describes possible troubles during the use of this product and countermeasures.
8 Appendix	This chapter describes specifications and included components with this printer.

NOTE

- 1 Safety instructions" to "4 Handling the printer" must be read before using the printer.
- Read "5 Panel setup menu" through "8 Appendix" as necessary.

4. Manual Notation

This section explains general cautions that must be followed in order to use this printer safely.

Warning	Meaning
WARNING	Used for dangerous situations where death or serious injury may be caused.
	Used for dangerous situations that may cause slight or medium injury, or when all or parts of products are damaged.
NOTE	It is used for special cautions and for information that needs to be emphasized.
TIP	Indicates useful tips for operating or understanding the printer.
\otimes	Indicates "prohibited" operations.
0	Indicates required operations.
L'E	Indicates referrence pages in this manual.

1 Safety instructions

This chapter explains the installation of this printer, warning terms that operators need to know, caution items and warning labels on the printer.

• When installing and operating this printer, be sure to follow the directions and warnings in this manual.

1.1 Types and meanings of warnings

The warnings in the Operation Manual and the warning labels attached to the printer are categorized into three stages.

Understand the meanings of the following warning terms and follow the contents (instructions) in this manual.

Warning	Meaning
WARNING	Used for dangerous situations where death or a serious injury may be caused.
	Used for dangerous situations that may a cause slight or medium injury, or when all or parts of the products may be damaged.
NOTE	Used for special cautions and for information that needs to be emphasized.

1.2 Important safety instructions

.

This section explains general cautions that must be followed in order to use this printer safely.

 \bigcirc

A

<Common to VJ-2638/1638/1638W>

 Do not install this printer in the following places. It may cause an injury if the printer falls down. On a shaky stand Slanting location Places where vibration of other machines etc. is transmitted
Do not climb on the printer or place heavy things on top of it. It may cause an injury if the printer falls down.
Do not block the vent when covering the printer with cloths, such as a blanket or tablecloth. If the vent is blocked, heat may accumulate inside the printer and may cause a fire.
Do not install the printer where it is humid or dusty. It could lead to an electric shock or fire.
Do not use a damaged power cord set. It could lead to an electric shock or fire.
Do not pull out or insert the power plug with a wet hand. This could lead to an electric shock.
 Do not connect an earth wire to the following places. Gas pipes There is a possibility of ignition and explosion. Earth wire of telephone cables and lightning rods A heavy current might flow whenever lightning strikes. Water pipe and faucet The earth might not work if a plastic pipe is connected in the middle of the metal pipe.
Do not insert or drop metal or flammable objects into the printer through openings such as a vent. It could lead to an electric shock or fire.
If foreign substances or liquids such as water entered the printer, do not use the printer as it is. It could lead to an electric shock or fire. Immediately turn OFF the power switch, disconnect the power plug from the electric socket, and local MUTOH dealer.
Wire the various cords as directed in the Operation Manual. Wrong wiring could cause a fire.
Be sure to use the specified power cord set. Using a power cord set other than the specified can cause an electric shock or fire.

Make sure to use only the specified power supply (AC 100 V to 120 V or AC 220 V to 240 V). If a power supply other than the specified voltage is used, it could cause an electric shock or fire.

power plug from the electric socket, and contact your

Take power for the printer directly from the power socket (AC 100 V - 120 V or AC 220 V - 240 V). Do not use multiple plugs on the same socket. This could generate heat and might cause a fire.

Be sure to use a dedicated power socket with an earth wire for the power supply, and connect it to the earth wire. If the earth wire is not connected, it may cause an electric shock or fire.

You are obligated to properly dispose of waste fluid from the printer in compliance with Wastes Disposal and Public Cleansing Act and local ordinances. Delegate disposal to an industrial waste disposal contractor.

<VJ-2638/1638>

Do not place any combustible materials on the platen while the heater is working. There may be a risk of fire.

Do not spill flammable liquid on the platen. It may cause a fire.

<Common to VJ-2638/1638/1638W>

Pay attention to the following points when handling the power cord set.

- Do not tamper with the power cord set.
- Do not put heavy objects on the power cord set.
- Do not bend, twist or pull the power cord set by force.
- Do not route the power cord set near heating appliances.

Pay attention to the following points when handling the power plug.

Any mishandling of the power cable could cause a fire.

- Make sure that no foreign substances such as dust are stuck to the power plug.
- Make sure that the power plug is firmly inserted to the edge of the power socket.

When handling Ink cartridges, pay attention so that ink does not come into contact with your eyes or skin. If ink gets into your eyes or sticks to your skin, immediately wash it off with water. Failing to do so might cause irritation or light inflammation of eyes. In case of any abnormality, consult a physician immediately.

Do not disassemble Ink cartridges. If disassembled, there is a possibility that ink might come into contact with your eyes or skin.

Do not operate Media loading lever during initial operation. Print head may touch Pressurizing roller and cause a malfunction.

Do not use volatile solvents such as thinner, benzene, or alcohol. These solvents may cause damage to the paint.

Make sure that no moisture enters the printer. The electric circuit inside the printer may be short-circuited.

Never open covers attached using screws under any circumstances. This may cause an electric shock or a malfunction.

Do not spill waste fluid when replacing Flushing-box sponges.

If waste fluid comes into contact with Grid roller, it may damage its surface and affect media feeding.

When cleaning Ceaning wiper,

- Do not touch Cleaning wiper and Head cap unit.
 Head cleaning may not be performed correctly because of oil from your hands.
- Make sure to use Cleaning stick to wipe Print head. A wet Cleaning stick may cause Print head to clog.
- Do not reuse Cleaning stick. The attached dust, etc may damage Print head.
- When cleaning around Print head,
- Never touch the nozzles of Print head.
- Doing so may damage Print head.Do not touch the tip of Cleaning stick.
- Print head may be damaged because of oil from your hands.
- Never put water, etc on the tip of Cleaning stick. Doing so may damage Print head.
- Do not reuse Cleaning stick.
 The attached dust, etc may damage Print head.

Do not slant the printer, prop it against a wall or turn it upside down. The ink inside the printer may leak. Moreover, normal operation after shifting (to these positions) cannot be guaranteed.

Unpacking or moving this printer must be done by the following number of people.More than 4 people

Installing the dedicated stands on the printer must be done by the following number of people. • More than 4 people

When taking the printer out of the container box, make sure to remove the vinyl, install Reinforcement for transportation, and hold Reinforcement.

If lifting up the printer with the vinyl on, there is a possibility the printer can slip and drop, and be damaged.

When you do not use the printer for a long period, make sure to pull out the power plug from the power socket for safety.

Make sure to connect an earth wire to the earth connection that meets the following standards.

- Earth terminal of power socket
- An earth wire with a copper plate which is buried at 650 mm or more in the ground.

Before operation, make sure to read the Material Safety Data Sheet (MSDS).

Pay attention to the following points when cutting roll media.

- Mishandling Razor blade may cause a cut on your finger or hand.
- When you hold media, do not place your finger on Media cut groove.
- Move Razor blade slowly along Media cut groove.

Before cleaning the areas other than Wiper and circumference of Print head, be sure to turn OFF the power and disconnect the power plug.

When moving the printer, make sure to maintain a horizontal position.

<VJ-2638/1638>

 \bigcirc

Do not touch Media guide while printing. Media guide becomes very hot and you could burn yourself.

Do not touch Media feed slot, Platen, and Media guide while Heater is working. Media feed slot, Platen, and Media guide become very hot and you could burn yourself.

Ventilate the workplace. Not doing so may cause nausea or a fire hazzard.

Right after printing, Media guide becomes very hot. Allow Media guide to cool down before the next operation.

1.3 Warning labels

This section explains the handling of warning labels, their pasting locations and types. Warning labels are attached to parts of the printer that need special caution. Understand the locations and the descriptions of the danger associated with each label before operating the printer.

1.3.1 Handling the warning labels

When handling the warning labels, be careful with the following points.

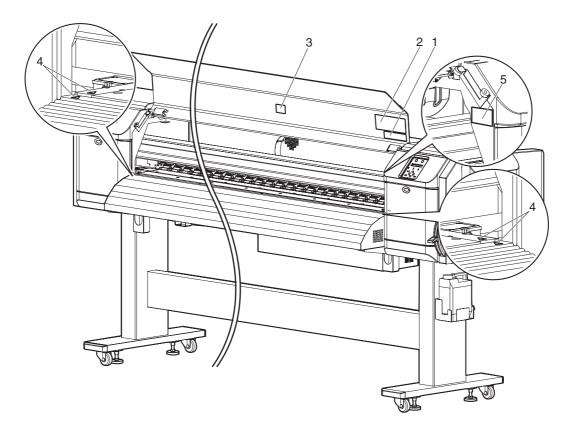

- Check whether all the warning labels can be read. If the letters or illustrations on the label are not clear, remove the dirt from the label.
- Use cloth, water and mild detergent for removing dirt from the warning labels. Avoid organic solvents and gasoline.
- Replace the labels if they are damaged, lost or illegible. If the warning labels have to be replaced, contact your local MUTOH dealer.

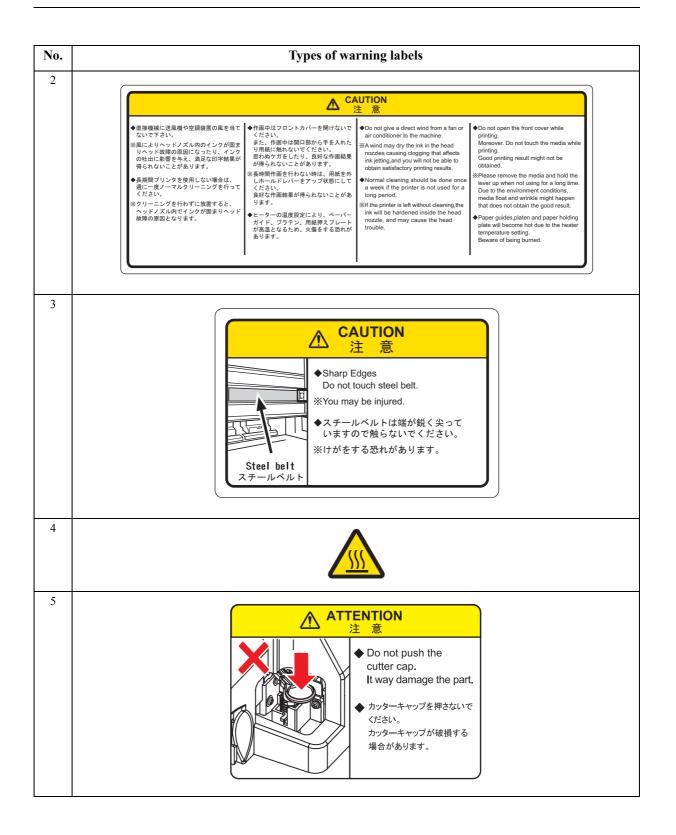

1.3.2 Location and type of warning labels

Pasting locations of the warning labels are shown in the following figure.

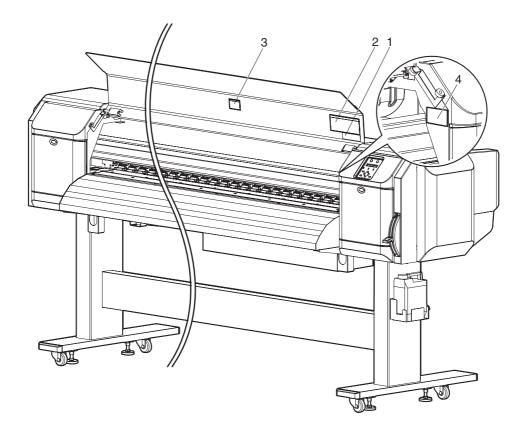

1.3.2.1 VJ-2638/1638 Warning labels

2 **Product overview**

This chapter explains the features of this printer along with the names and functions of each part.

2.1 Features

This section explains the main features of the printer.

(1) High-speed output

The new print head has realized high-speed output. The printing width of 1,615mm(VJ-1638/1638W), 2632mm(VJ-2638) has been made possible.

(2) Wide variety of compatible media

The height of Print head is adjustable to three levels, making it possible to print on various paper with the width of 0.08mm to 2.8mm.

(3) Vibrant color reproduction

4 colors of ink are used for printing in order to reproduce sharp and vivid colors. High-capacity ink cartridges of 220ml and 440ml (VJ-2638/1638) with dedicated IC chips are adopted. High-capacity ink pack adapter to use 1000ml ink packs (option for VJ-2638/1638) is available. Ink consumption amount can be controlled by IC chips, greatly improving productivity. Use of variable dots can also improve color reproduction.

(4) Multi heaters adopted (for VJ-2638/1638)

The media heating system developed by Lamiless series has been arranged for solvent ink. Pre-heater, Platen heater, and After heater have been installed to improve ink settlement and drying speed of solvent ink on media.

(5) Effective use of media

Equipped with the origin setting function that allows you to set the print start position arbitararily. Printing can be performed on the media that has already been printed on, allowing effective use of margins.

(6) Optional Spectrophotometer available (for VJ-2638/1638)

A compact and light Spectrophotometer (SPECTROVUE VM-10) is provided to measure visible light ranging from 400nm to 700nm (option). This can be used as a colorimeter for color calibration and profiling. (The conditions of use for color calibration and profiling depend on your RIP software.) Install Spectrophotometer on Print head to measure the color target automatically.

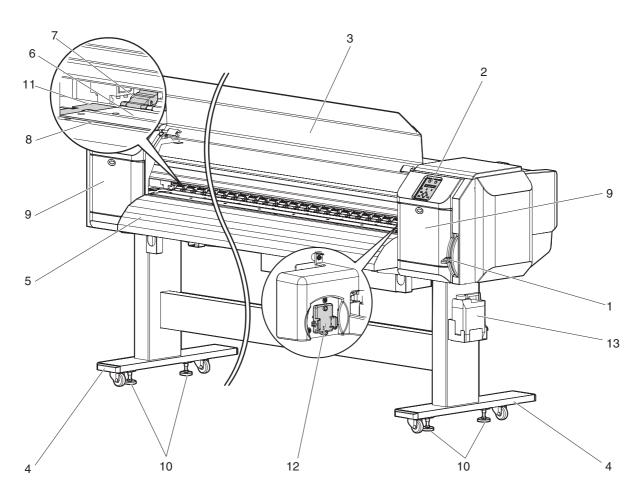

2.2 Names of parts and functions

This section explains the names and functions of each part.

2.2.1 Front section

The illustrations used in this section are those of VJ-1638.

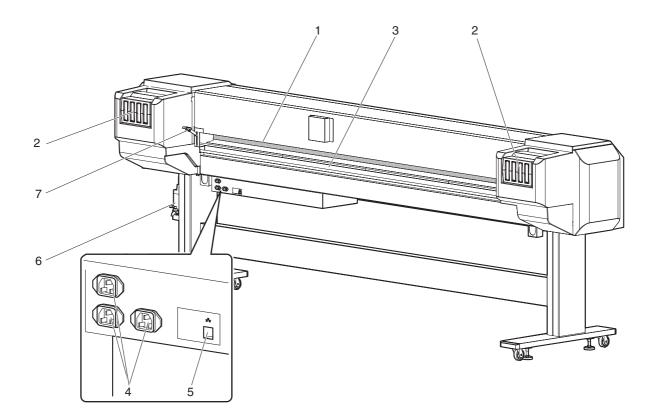

No.	Name	Function
1	Media loading lever	 Used for fixing or releasing the media. Lower Lever to fix the media. Lower Lever further to fix the media firmly. Used to improve the accuracy of media feeding. Raise Lever to release the media.
2	Operation panel	Used to set the operation condition, printer display and various functions.

No.	Name	Function	
3	Front cover	Used to prevent the user from coming in contact with the driving mechanism during the printer operation. Opened and closed when media is loaded or jammed. It is normally closed.	
4	Stand	Used when installing the printer on a flat floor.	
5	5 Media guide Used to feed the media smoothly when loading or printing on the media. • Heater (After heater) to dry ink is installed inside VJ-2638/1638. • VJ-1638W is not equipped with Heaters.		
6	Platen	 Installed inside of Front cover. Heater (Platen heater) to dry ink is installed inside VJ-2638/1638. VJ-1638W is not equipped with Heaters. 	
7	Pressurizing rollers	Installed inside of Front cover. Press and hold the whole media when printing.	
8	Media cut groove	Installed inside of Front cover. Used to cut media straight.	
9	Maintenance cover	 Used to prevent the user from touching the inner mechanical section. Open/close in the following cases. When cleaning Cleaning wiper When cleaning circumference of Print head When replacing Cutter It is normally closed. 	
10	Adjuster	Used to install the printer horizontally.	
11	Media holder plate	Installed inside of Front cover. By attaching Media holder plates to both sides of the media, media warpage can be prevented to a degree.	
12	Connector	 Used to install Spectrophotometer (SPECTROVUE VM-10) to VJ-2638/1638. VJ-1638W is not equipped with Connector. 	
13	Waste fluid tank	Used for collecting waste ink discharged from the printer.	

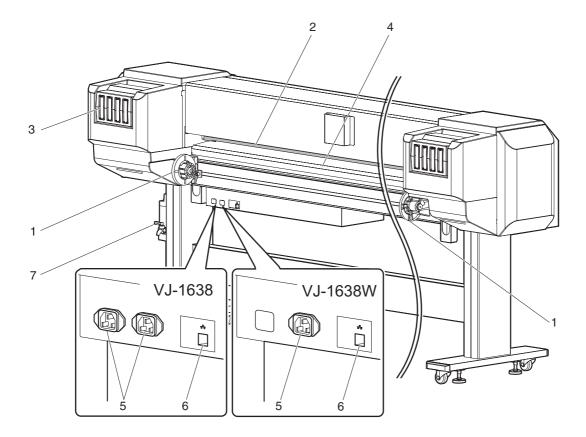

2.2.2 Rear section

(1) Rear section(VJ-2638)

No.	Name	Function	
1	Media feed slot	Used for feeding media.	
2	Ink cartridge slot	Insert Ink cartridges.	
3	Media guide	 Used to feed the media smoothly when loading or printing on the media. Heater (Pre-heater) to dry ink is installed inside VJ-2638/1638. VJ-1638W is not equipped with Heaters. 	
4	AC inlet	Used for connecting the power cord set.	
5	Network interface cable connector	Connects a network interface cable.	
6	Waste fluid valve	Open/close when discharging the waste fluid from Waste fluid tank. It is normally closed.	
7	Media loading lever	 Used for fixing or releasing the media. Lower Lever to fix the media. Lower Lever further to fix the media firmly. Used to improve the accuracy of media feeding. Raise Lever to release the media. 	

(2) Rear section(VJ-1638/1638W)

No.	Name	Function
1	Roll media holder	Load the roll media. Equipped with Flanges to attach the roll media and Fixing levers to fix Roll media holders.
2 Media feed slot Used for feeding media.		Used for feeding media.
3 Ink cartridge slot Insert Ink cartridges.		Insert Ink cartridges.
4	Media guide	 Used to feed the media smoothly when loading or printing on the media. Heater (Pre-heater) to dry ink is installed inside VJ-2638/1638. VJ-1638W is not equipped with Heaters.
5 AC inlet Used for connecting the power cord set.		Used for connecting the power cord set.
6 Network interface cable Connects a network interface cable.		Connects a network interface cable.
7	Waste fluid valve	Open/close when discharging the waste fluid from Waste fluid tank. It is normally closed.

2.2.3 Operation panel

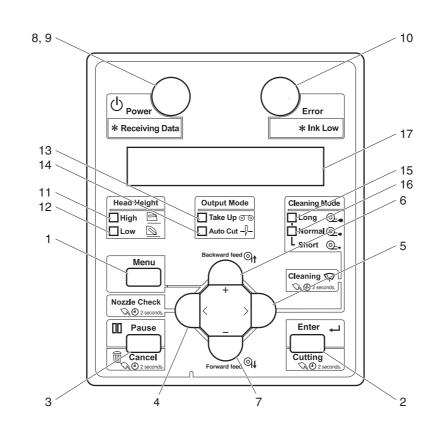

Used to set the operating conditions, to display the status of the printer, and to set various functions. Explains names of each operation key and status display along with the functions.

TIP

Refer to the following for details regarding the operation method of Operation panel.

•When setting the menu from Operation panel: 18 4.3 Menu setups on Operation panel

•When performing various operations in Operation panel: 1374.4 Operating from Operation panel

(1) Operation keys

NOTE

• Operation keys are assigned with different functions and names depending on the printer status (Normal or Setup menu display).

For details about the printer status, refer to 2.3 Printer status outline.

No.	Name	Normal	Setup menu display		
1	[Menu] key	Shifts to the Setup menu.	Shifts from Setup menu display to Normal.		
2	[Enter] key	Restarts printing while printing is being suspended.	Select the menu to set, and shift to the next hierarchy.The setting is determined and saved.		
	[Cutting] key	Cuts the media when pressed for more than two seconds.	—		
3	[Pause] key	Pauses printing.	—		
	[Cancel] key	 When printing: When pressed for more than two seconds, forcefully terminates printing and deletes one file of the remaining data. When receiving or analyzing data: When pressed for more than two seconds, deletes the data already received and analyzed. 	 Returns to the previous menu hierarchy. Changes made in the setting are discarded. Shifts from Setup menu display to Normal. 		
4	[<] key	_	_		
	[Nozzle Check] key	Press and hold this key for two seconds or more to perform Nozzle Check printing.	—		
5	[>] key	Sets Cleaning Mode.The lamp of Cleaning Mode that you set lights up in green.	Shifts the menu in the lower hierarchy.		
	[Cleaning] key	When pressed for more than two seconds, cleaning starts.	_		
6	[Backward↑] key	The media is fed in the reverse direction.	_		
	[+] key		 Changes the displayed menu to the forward direction. The setting is changed to the reverse direction. The numeric value is increased during numerical input. 		
7	[Forward↓] key	Media is fed in the forward direction.	—		
	[-] key	_	 Changes the displayed menu to the reverse direction. Changes the setting in the forward direction. The numeric value is decreased during numerical input. 		
8	[Power] key	Turns the printer ON/OFF.	Turns the printer ON/OFF.		

(2) Display section

No.	Name	Color	Status	Description
9	Power lamp	Blue	Lamp ON	Power is ON.
			Lamp blinks	Receiving and analyzing the data.Performing media initial operation.
			Lamp OFF	Power is OFF.
10	Error lamp	Orange	Lamp ON	An error has occurred. The error content is displayed on the LCD.
			Lamp blinks	The remaining amount of ink is low.
			Lamp OFF	There is no error.
11	High lamp	Green	Lamp ON	The head height is set to High. When the Low lamp is also turned on, the head height is set to Mid.
			Lamp OFF	The head height is set to Low.
12	Low lamp	Green	Lamp ON	The head height is set to Low. When the High lamp is also turned on, the head height is set to Mid.
			Lamp OFF	The head height is set to High.
13	Take Up lamp	Green	Lamp ON	Media ejection mode is set to "Take-up".
			Lamp OFF	Media ejection mode is set to "Off" or "Auto cut".
14	Auto Cut lamp	Green	Lamp ON	Media ejection mode is set to "Auto cut".
			Lamp OFF	Media ejection mode is set to "Off" or "Take-up".
15	Long lamp	Green	Lamp ON	Cleaning mode is set to Long.When the Normal lamp is also on, Cleaning mode is set to Short.
			Lamp OFF	Cleaning Mode is set to Normal.
16	Normal lamp	Green	Lamp ON	Cleaning Mode is set to Normal.When the Long lamp is also on, Cleaning mode is set to Short.
			Lamp OFF	Cleaning mode is set to Long.
17	LCD display section	—		Displays the operation status of the printer or an error message.

TIP

•When an error requiring a restart (fatal malfunction for the printer operation) occurs, all lamps blink with an alarm.

If the error persists even when the malfunction is fixed, contact your local MUTOH dealer.

2.2.4 Ink level indicator

When the "Remain Ink menu" on Display menu is set to "On", the ink level indicator that discribes the ink or ink cartridge status is displayed on LCD monitor.

13 5.7 Display menu

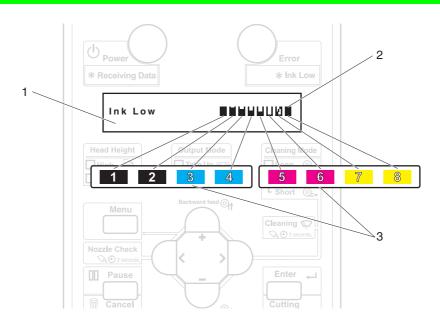

13 5.7.4 Remain Ink menu

- In the normal operation
- During printing
- To display ink or cartridge errors
 C管7.2.2 Message type error display and remedies

The indicator and the corresponding Ink color labels are shown below.

NOTE

• The ink color labels are attached to the top of the ink cartridge slots.

No.	Name
1	LCD display section
2	Ink level indicator
3	Ink color label

2.2.4.1 Estimated Ink level graphic

No.	Indicator to display	the conditions of ink/cartridges
1		Remaining ink amount : More than 80%, less than 100%
2		Remaining ink amount : More than 60%, less than 80%
3		Remaining ink amount : More than 40%, less than 60%
4		Remaining ink amount : More than 20%, less than 40%
5		Remaining ink amount : Less than 20%
6		Ink Near End
7	И	Ink End

2.3 Printer status outline

This section explains the printer status.

2.3.1 Status

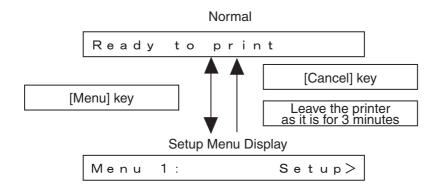

(1) Normal

Printing is possible when the media is loaded. The various functions for printing can be performed on Operation panel.

(2) Setup menu display

Various settings regarding printing can be made from Operation panel. The various functions for printing can be performed on Operation panel. Display contents in the LCD monitor of Operation panel are as follows.

(3) Panel display

2.3.2 Changing printer status

Follow the procedure below and change the printer status.

(1) Normal \rightarrow Setup menu display

Press the [Menu] key on Operation panel when the printer is set to Normal.

• "Menu 1: Setup>" is displayed on Operation panel and the display shifts to the Setup menu.

NOTE

• For details regarding the Setup menu, refer to 4.3 Menu setups on Operation panel.

(2) Setup menu display \rightarrow Normal

When the printer is at Setup menu display, perform either of the following operations to shift Operation panel to the Normal display.

- Press the [Cancel] or [Menu] key on Operation panel.
- In the Setup menu, leave the keys untouched for three minutes.

NOTE

• For details on Status message, refer to 7.2.1 Status messages.

3 Before using

This chapter explains necessary steps before using the printer.

3.1 Power cord set connection

This section explains power cord set connection.

- Be sure to use the specified power cord set. Using a power cord set other than the specified can cause an electric shock or fire.
- Use the power cord set compliant with the safety standards, power-supply voltage, and plug shape of the country where the printer is used.
- Use a power cord set which is equipped with a protective earth, and securely connect it to the outlet.
- Do not use a damaged power cord set. It could lead to an electric shock or fire.

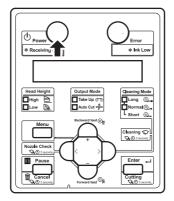

- Pay attention to the following points when handling the power cord set.
 - Do not tamper with the power cord set.
 - Do not put heavy objects on the power cord set.
 - Do not bend, twist or pull the power cord set by force.
 - Do not route the power cord set near heating appliances.

NOTE

• Contact your local MUTOH dealer if the power cord set is damaged.

Follow the procedure below to install the power cord set.

1. Make sure that the printer is turned OFF.

NOTE

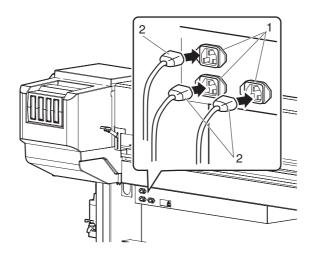

• The power is ON when the [Power] key of Operation panel is pressed in. Press the key once again to turn OFF the power.

2. Connect the power cord set to the AC inlet(s) located on the right side of the printer.

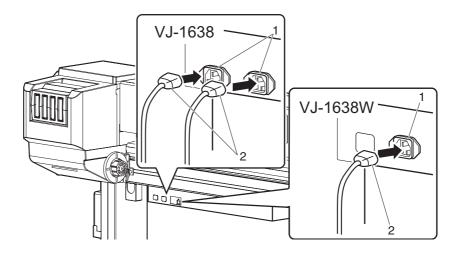

- The number of AC inlets differs depending on the printer model
 - VJ-2638 : 3 locations
 - VJ-1638 : 2 locations
 - VJ-1638W : 1 location

<VJ-2638>

No.	Name
1	AC inlet
2	Power cord set

<VJ-1638/1638W>

No.	Name
1	AC inlet
2	Power cord set

3. Insert the plug of the power cord set firmly in the socket.

- Do not pull out or insert the power plug with a wet hand. This could lead to an electric shock.
- Make sure to use only the specified power supply (AC 100 V to 120 V or AC 220 V to 240 V).

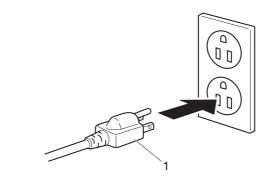

If a power supply other than the specified voltage is used, it could cause an electric shock or fire.

- Take power for the printer directly from the power socket (AC 100 V 120 V or AC 220 V 240 V).
 Do not use multiple plugs on the same socket.
 This could generate heat and might cause a fire.
- Be sure to use a dedicated power socket with an earth wire for the power supply, and connect it to the earth wire.
 If the earth wire is not connected, it may cause an electric shock or fire.
- Do not connect an earth wire to the following places.
 - Gas pipes There is a possibility of ignition and explosion.
 - An earth wire of telephone cables and lightning rods A heavy current might flow whenever lightning strikes.
 - Water pipe and faucet The earth does not work if part of the metal pipe is plastic.

- Pay attention to the following points when handling the power plug. Any mishandling of the power cable could cause a fire.
 - Make sure that no foreign substances such as dust are stuck to the power plug.
 - Make sure that the power plug is inserted all the way.
 - When you do not use the printer for a long period, make sure to pull out the power plug from the power socket for safety.
- Make sure to connect an earth wire to the earth connection that meets the following standards.
 - An earth terminal of power socket
 - An earth wire with a copper plate which is buried at 650 mm or more in the ground.

NOTE

- Contact your local MUTOH dealer if the earth connection is not/cannot be established.
- When the printer is ON, do not pull out the power cord set from the power socket. Whenever the plug is pulled out from the power socket, turn OFF the power on Operation panel and allow one minute or more before inserting the plug in the power socket again.
- When inserting Power cordset into the power socket the following capacity is required. If you cannot ensure the capacity insert Power cord sets separately into different power socket.
 - VJ-2636 : When "Heater Ctrl" is "EcoMode", "Eco/Fixer" or "Eco/Dryer" : 26A When "Heater Ctrl" is "Powerful", "Pow/Fixer" or "Pow/Dryer" : 30A
 - VJ-1638 : 19A

No.	Name
1	Power plug

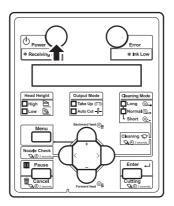

3.2 Turning the power ON/OFF

This section explains how to turn the printer ON/OFF.

3.2.1 Turning the power ON

Follow the procedure below to turn the power ON.

- 1. Press the [Power] key on Operation panel to turn ON the printer.
 - The Power lamp on Operation panel lights up in blue.

- The printer starts the initial operation.
- When the initial operation is complete, the printer enters Normal.

NOTE

• If there is a problem during the initial operation, a message is displayed on Operation panel and the printer may stop operating.

If operation stops, refer to 7 Troubleshooting and deal with the problem.

3.2.2 Turning the power OFF

Follow the procedure below to turn the printer OFF.

- 1. Verify the following regarding the operational condition of the printer.
 - Printing or other operations are not in progress.
 - Operation panel display is Normal.
 - The Low lamp on Operation panel lights up in green.
 - The High lamp on Operation panel is turned off.

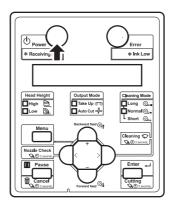

NOTE

- If the High lamp on Operation panel lights up in green, the head height is set to High or Mid. Return the head height to Low before turning the power OFF.
 127 4.2.5.3 When setting the head height to Low
- 2. Press the [Power] key on Operation panel to turn OFF the printer.
 - The Power lamp on Operation panel is turned off.

NOTE

- If Operation panel is in the following status, the power is ON.
 - •The [Power] key is pressed in.
 - •The Power lamp lights up in blue.

Press the key once again to turn OFF the power.

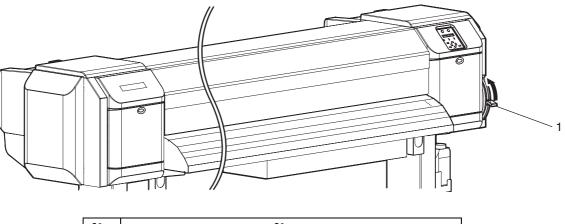

- The printer turns the power OFF.
- "Power Off" is displayed on Operation panel.

NOTE

- If the head height is set to High or Mid, "Set Height to Low" is displayed on Operation panel, and the printer stops the procedure to turn the power OFF. To restart the procedure, return the head height to Low.
 X 4.2.5.3 When setting the head height to Low
 - All the lamps on Operation panel and the LCD monitor are turned OFF.
 - The printer automatically turns the power OFF.

- If there is a problem during turning OFF operation, a message is displayed on Operation panel and the printer may stop operating.
 If operation stops, refer to 7 Troubleshooting and deal with the problem.
- After turning OFF the printer, wait for ten seconds or longer to turn it ON again.
- 3. Raise the media loading lever when the printer is not used for a long time.

No.	Name
1	Media loading lever

3.3 Filling ink

This section describes the procedure to install Ink cartridges for the first time.

- Before operation, make sure to read the Material Safety Data Sheet (MSDS).
- When handling lnk cartridges or lnk packs, pay attention so that ink does not come into contact with your eyes or skin.
 If ink gets into your eyes or sticks to your skin, immediately wash it off with water.
 Failing to do so might cause irritation or light inflammation of eyes.
 In case of any abnormality, consult a physician immediately.
- Do not disassemble lnk cartridges or lnk packs. If disassembled, ink might come into contact with your eyes or skin.
- Comply strictly with the following during ink filling.
 - Do not turn OFF the printer.
 - Do not unplug the power cord set.
 - Do not open Front cover.
 - Do not open Maintenance cover.
 - Do not raise Media loading lever.

NOTE

- Do not use the Ink cartrdge(s) you have inserted into Ink cartridge slot(s) for other printers. The Ink cartridge(s) will not be used again.
- Use genuine Ink cartridges or Ink packs for charging. This printer is designed to use genuine Ink cartridges and Ink packs. If you use Ink cartridges which are not produced by the original manufacturer,
 - printing might become blurred and the end of the ink might not be detected correctly.
 - Any problems caused by using an ink bag other than those recommended above will not be covered by the warranty, and repair expenses will be paid by the customer.
- For types and details of Ink cartridges, contact your local MUTOH dealer.
- Do not give Ink cartridges or Ink packs strong shakes. Doing so may cause ink leakage.
- Do not disassemble Ink cartridges. A disassembled Ink cartridge or Ink packs cannot be used.
- Be sure to use the dedicated cleaning fluid.
 - (VJ-2638/1638)product number: VJ-MSINK3-CL220, VJ-MSINK3-CL1000
 - (VJ-1638W)product number: RJ-FGCLS
- Shake the Ink cartridges or Ink packs lightly before installing. Doing so may affect the print quality.
- When the Ink cartridge or Ink pack is moved from a cold place to a warm place, leave it for 3 hours or more in the new printing environment before printing.
- Do not insert/remove Ink cartridges and High-capacity ink pack adapter more than then number of times shown below.
 - Ink cartridges: 10 times

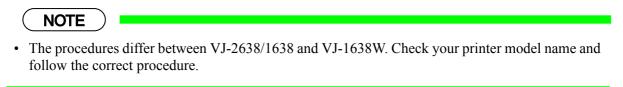

High-capacity ink pack adapter: 6 times

If Ink cartridge has been removed/inserted more than the number of times shown above, it cannot be used even when there is remaining ink. High-capacity ink pack adapter requires replacement of Connector rubber.

- Ink cartridges and Ink packs for this printer have dedicated IC chips on them. If removing/inserting the ink cartridges and High-capacity ink pack adapter (option) in the following situations, the information within the IC chips may be damaged and the cartridges cannot be used.
 - During printing
 - For ten seconds after inserting all Ink cartridges

3.3.1 When using 220ml lnk cartridges

Follow the procedure below to install the 220ml Ink cartridges.

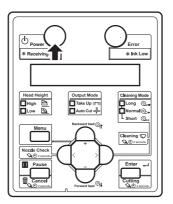

TIP

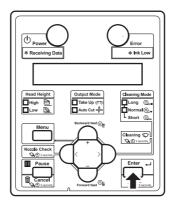

The 220ml cartridges can be inserted horizontally or vertically. This section describes the case of horizontal insertion angle only. Refer to "**3.3.2 When using 440ml lnk** cartridges (VJ-2638/1638)" for the case of vertical insertion.

3.3.1.1 For VJ-2638/1638

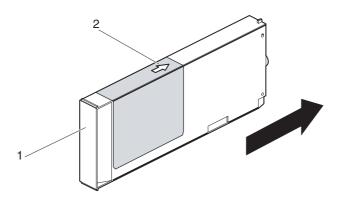

1. Turn the printer ON.

- The printer starts the initializing operation.
- After the initial operation is compete, "Start Ink Charge -> E" is displayed on Operation panel.

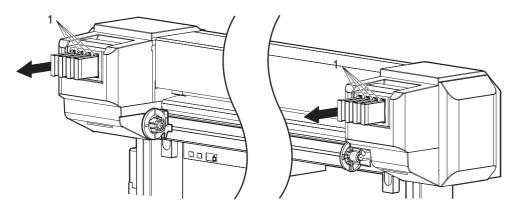

- "Insert CleaningCart." is displayed on Operation panel.
- 3. Take out Cleaning cartridges (8 pieces) from the bags.
- 4. Insert Cleaning cartridge into Ink cartridge slot.
 - Keep the arrow of Cleaning cartridge facing up and insert it into the printer.

No.	Name
1	Cleaning cartridge
2	Arrow

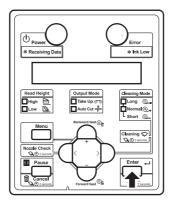

- Insert Cleaning cartridge all the way in Ink cartridge slot.

- If the head height is set to High, "Change Head Gap Low" is displayed on Operation panel. Change the head height to Low.
 127 4.2.5 Head height adjustment
- When all Cleaning cartridges are installed, "Busy-Washing" is displayed on Operation panel, and the printer starts charging the cleaning fluid.
- •When Celaning fluid has been charged, "Remove Cartridges" is displayed on Operation panel.
- 5. Remove all Cleaning cartridges.

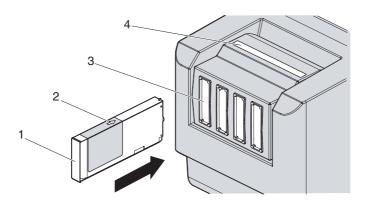

No.	Name
1	Cleaning cartridge

- "Busy-Washing" is displayed on Operation panel and the printer starts head cleaning.
- When head cleaning is complete, "Wash retry? No" is displayed on Operation panel.

- "Insert InkCartridges" is displayed on Operation panel.
- 7. Install Ink cartridges (K, C, M, Y: 2 each) in Ink cartridge slots (K, C, M, Y: 2 each) on the back of the printer.
 - Shake Ink cartridges 2 to 3 times lightly before installing them into Ink cartridge slots.
 - Make sure that Ink cartridges are inserted into the correct Slots. Match the ink color label with the ink color before inserting Ink pack.
 - Keep the arrow of Ink cartridge facing up and insert it into the printer.

No.	Name
1	Ink cartridge
2	Arrow
3	Ink cartridge slots
4	Ink color labels

- Insert Ink cartridges all the way in Ink cartridge slots.

No.	Name
1	Ink cartridge
2	Ink cartridge slot K1
3	Ink cartridge slot K2
4	Ink cartridge slot C1
5	Ink cartridge slot C2
6	Ink cartridge slot M1
7	Ink cartridge slot M2
8	Ink cartridge slot Y1
9	Ink cartridge slot Y2

- When an Ink cartridge is installed, "Ink Refill **%" is displayed on Operation panel and ink replenishment starts.
- Times resuired for the initial ink charge is as follows.
 - VJ-2638 : Approx 20 minutes
 - VJ-1638 : Approx 17 minutes
- When "100%" is displayed, the initial ink replenishment is complete.
- After the initial ink replenishment is complete, "Media End" is displayed on Operation panel.

- Comply strictly with the following during ink filling. If filling is interrupted, ink will be lost when filling is resumed.
 - Do not turn OFF the power of the printer.
 - Do not unplug the power cord set of the printer.
 - Do not open Front cover.
 - Do not open Maintenance cover.
 - Do not raise Media loading lever.

NOTE

- If the printer perform the nozzle check printing immediately after the initial ink replenishment is complete, the following results may occur.
 - Printed lines become blurred.
 - The data is partially not printed.

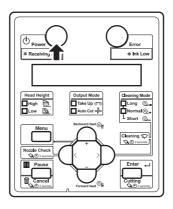

In such cases, follow **5.3** Cleaning menu and refill a small amount of ink. Then, check the printing result.

If there is no improvement in the print result even after refilling a small amount of ink, leave the printer unused for an hour or more. Then, refill a small amount of ink again and check the print result.

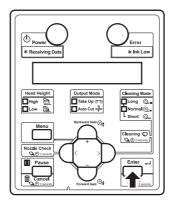

If there is still no improvement, contact your local MUTOH dealer.

3.3.1.2 For VJ-1638W

1. Turn the printer ON.

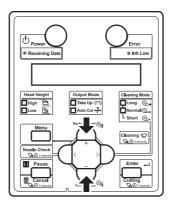

- The printer starts the initializing operation.
- After the initial operation is compete, "Start Ink Charge -> E" is displayed on Operation panel.

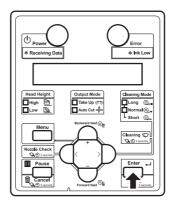

- When head cleaning is complete, "Wash retry? No" is displayed on Operation panel.
- 3. Select whether to perform cleaning of the ink path before the initial ink charge.

NOTE

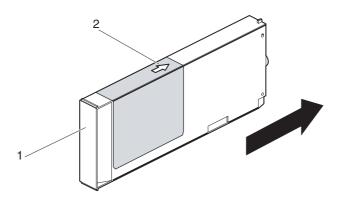

- Cleaning may be required depending on the ink type to be set.
- To perform head cleaning, make sure to use the cleaning liquid that matches the ink.
 - a. When cleaning is required, press the [+] key or [-] key to select "Yes".

b. When cleaning is not required, proceed to the step 8.

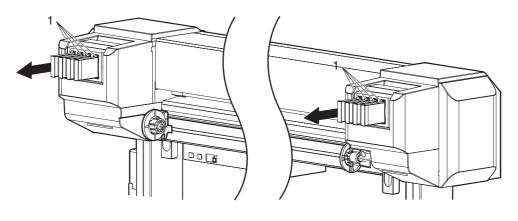

- "Insert CleaningCart." is displayed on Operation panel.
- 5. Take out Cleaning cartridges (8 pieces) from the bags.
- 6. Insert Cleaning cartridge into Ink cartridge slot.
 - Keep the arrow of Cleaning cartridge facing up and insert it into the printer.

No.	Name
1	Cleaning cartridge
2	Arrow

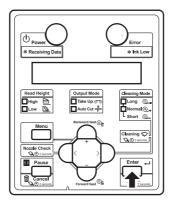

- Insert Cleaning cartridge all the way in Ink cartridge slot.

- If the head height is set to High, "Change Head Gap Low" is displayed on Operation panel. Change the head height to Low.
 127 4.2.5 Head height adjustment
- When all Cleaning cartridges are installed, "Busy-Washing" is displayed on Operation panel, and the printer starts charging the cleaning fluid.
- When Celaning fluid has been charged, "Remove Cartridges" is displayed on Operation panel.
- 7. Remove all Cleaning cartridges.

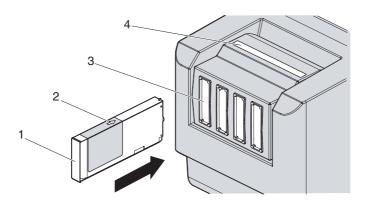

No.	Name
1	Cleaning cartridge

- "Busy-Washing" is displayed on Operation panel and the printer starts head cleaning.
- When head cleaning is complete, "Wash retry? No" is displayed on Operation panel.

- "Insert InkCartridges" is displayed on Operation panel.
- 9. Install Ink cartridges (K, C, M, Y: 2 each) in Ink cartridge slots (K, C, M, Y: 2 each) on the back of the printer.
 - Shake Ink cartridges 2 to 3 times lightly before installing them into Ink cartridge slots.
 - Make sure that Ink cartridges are inserted into the correct Slots. Match the ink color label with the ink color before inserting Ink pack.
 - Keep the arrow of Ink cartridge facing up and insert it into the printer.

No.	Name
1	Ink cartridge
2	Arrow
3	Ink cartridge slots
4	Ink color labels

- Insert Ink cartridges all the way in Ink cartridge slots.

No.	Name	
1	Ink cartridge	
2	Ink cartridge slot K1	
3	Ink cartridge slot K2	
4	Ink cartridge slot C1	
5	Ink cartridge slot C2	
6	Ink cartridge slot M1	
7	Ink cartridge slot M2	
8	Ink cartridge slot Y1	
9	Ink cartridge slot Y2	

- When an Ink cartridge is installed, "Ink Refill **%" is displayed on Operation panel and ink replenishment starts.
- Initial filling takes about 17 minutes. Ink filling operation and pause operation are repeated during the initial ink replenishment.
- When "100%" is displayed, the initial ink replenishment is complete.
- After the initial ink replenishment is complete, "Media End" is displayed on Operation panel.

- Comply strictly with the following during ink filling. If filling is interrupted, ink will be lost when filling is resumed.
 - Do not turn OFF the power of the printer.
 - Do not unplug the power cord set of the printer.
 - Do not open Front cover.
 - Do not open Maintenance cover.
 - Do not raise Media loading lever.

NOTE

- If the printer perform the nozzle check printing immediately after the initial ink replenishment is complete, the following results may occur.
 - Printed lines become blurred.
 - The data is partially not printed.

In such cases, follow **5.3** Cleaning menu and refill a small amount of ink. Then, check the printing result.

If there is no improvement in the print result even after refilling a small amount of ink, leave the printer unused for an hour or more. Then, refill a small amount of ink again and check the print result.

If there is still no improvement, contact your local MUTOH dealer.

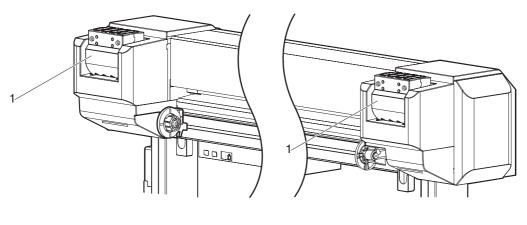

3.3.2 When using 440ml lnk cartridges (VJ-2638/1638)

440ml Ink cartridges are not compatible with VJ-1638W.

Follow the procedure below to install Ink cartridges.

1. Check the angle of Ink cartridge slot to see if the insertion angle of Ink cartridge is vertical.

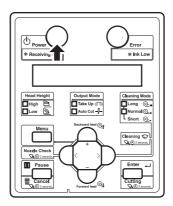

No.	Name
1	Ink cartridge slot

If the insertion angle of Ink cartridge is not vertical, change the angle.
 X 3.3.3 Changing the angle of Ink cartridge slot

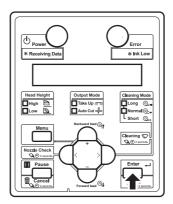

NOTE

Make sure that the insertion angle of the 440ml cartridge is vertical. If the cartridge is inserted obliquely, the cartridge may fall over.

2. Turn the printer ON.

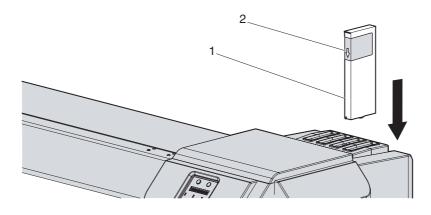

- The printer starts the initializing operation.
- After the initial operation is compete, "Start Ink Charge -> E" is displayed on Operation panel.
- 3. Press the [Enter] key on Operation panel.

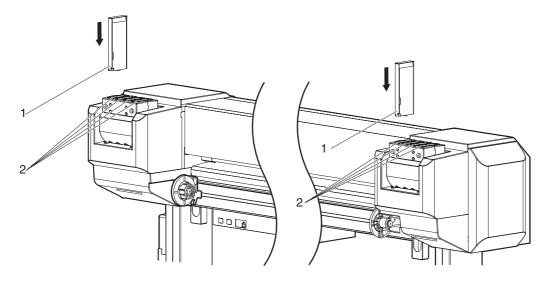

- "Insert CleaningCart." is displayed on Operation panel.
- 4. Take out Cleaning cartridges (8 pieces) from the bags.

- 5. Insert Cleaning cartridge into Ink cartridge slot.
 - Keep the arrow of Cleaning cartridge facing the front side of the printer and insert it into the printer.

No.	Name

7	Ink cartridge slot M2	
8	Ink cartridge slot Y1	
9	Ink cartridge slot Y2	

- When an Ink cartridge is installed, "Ink Refill ****%**" is displayed on Operation panel and ink replenishment starts.
- Initial filling takes about 17 minutes. Ink filling operation and pause operation are repeated during the initial ink replenishment.
- When "100%" is displayed, the initial ink replenishment is complete.
- After the initial ink replenishment is complete, "Media End" is displayed on Operation panel.

- Comply strictly with the following during ink filling. If filling is interrupted, ink will be lost when filling is resumed.
 - Do not turn OFF the power of the printer.
 - Do not unplug the power cord set of the printer.
 - Do not open Front cover.
 - Do not open Maintenance cover.
 - Do not raise Media loading lever.

NOTE

- If the printer perform the nozzle check printing immediately after the initial ink replenishment is complete, the following results may occur.
 - Printed lines become blurred.
 - The data is partially not printed.

In such cases, follow **5.3** Cleaning menu and refill a small amount of ink. Then, check the printing result.

If there is no improvement in the print result even after refilling a small amount of ink, leave the printer unused for an hour or more. Then, refill a small amount of ink again and check the print result.

If there is still no improvement, contact your local MUTOH dealer.

3.3.3 Changing the angle of lnk cartridge slot

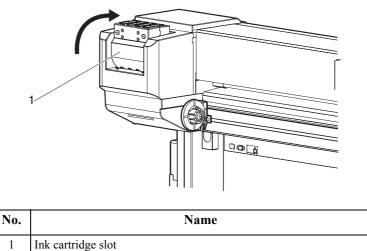

The angle of the ink cartridge slot of this printer varies depending on the capacity of ink cartridges (or ink packs).

Follow the procedure below to change the angle.

3.3.3.1 When inserting lnk cartridges vertically

Before installing the 440ml cartridges, change the angle as follows.

1. Rotale Ink cartridge slot by 90 degrees upward.

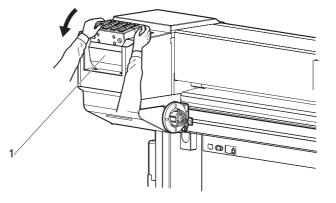

- 2. Check if Ink cartridge slot is vertical.
 - Check the opposite side in the same way.

3.3.3.2 When inserting lnk cartridges horizontally

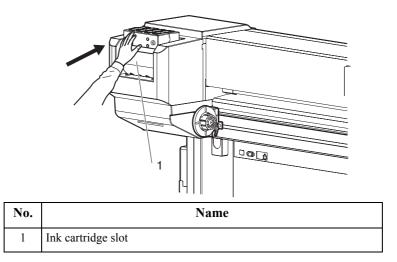

Before installing High-capacity ink pack adapters, change the angle as follows.

1. Tilt Ink cartridge slot slightly toward the rear side of the printer.

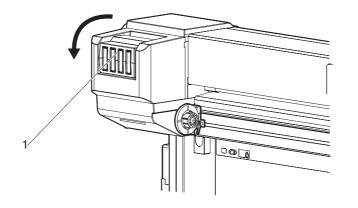

No.	Name
1	Ink cartridge slot

2. To unlock, return Ink cartridge slot to the original position.

3. Rotate Ink cartridge slot by 90 degrees downward.

No		Name	
11	Ink cartridge slot		

- 4. Check if Ink cartridge slot is horizontal.
- 5. Check the opposite side in the same way.

3.3.4 Installing High Capacity Ink Pack Adapter (option) for VJ-2638/1638

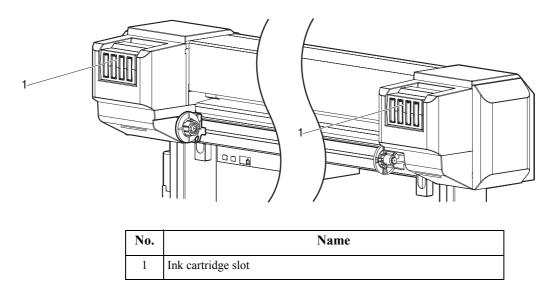

Use the optional High-capacity ink pack adapter to use the 1000ml Ink packs on VJ-2638/1638.

NOTE

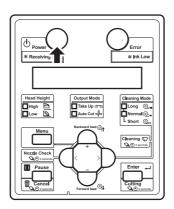

High-capacity ink pack adapters are not compatible with VJ-1638W.

Follow the procedure below to install High-capacity ink pack adapter.

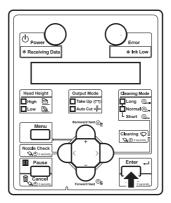

1. 1. Check the angle of Ink cartridge slot to see if the insertion angle of Ink cartridge is horizontal.

- If the insertion angle of Ink cartridge is not horizontal, change the angle.
 X 3.3.3 Changing the angle of Ink cartridge slot
- 2. Turn the printer ON.

- The printer starts the initializing operation.
- • After the initial operation is compete, "Start Ink Charge –> E" is displayed on Operation panel.

- "Insert CleaningCart." is displayed on Operation panel.
- 4. Take out Cleaning fluid pack from the bag.
- 5. Install Cleaning fluid pack and IC chip card to High-capacity ink pack adapter.

• To install or remove High-capacity ink pack adapter to/from Cleaning fluid pack and IC chip card, refer to the operation manual included with High-capacity ink pack adapter.

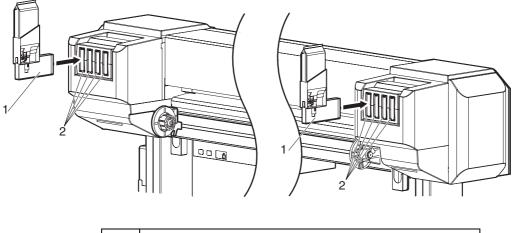

6. Insert High-capacity ink pack adapter into Ink cartridge slot.

• Do not insert High-capacity ink pack adapter into Ink cartridge slot without attaching Cleaning fluid pack.

The information of the remaining IC chip card will be rewritten and Cleaning fluid pack will not be usable.

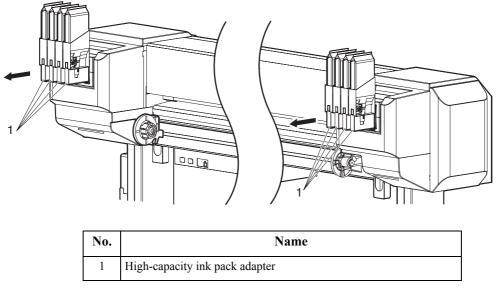

• Insert High-capacity ink pack adapters all the way in Ink cartridge slots.

No.	Name
1	High-capacity ink pack adapter
2	Ink cartridge slots

- If the head height is set to High, "Change Head Gap Low" is displayed on Operation panel. Change the head height to Low.
 X3 4.2.5 Head height adjustment
- When all High-capacity ink pack adapters are installed, "Busy-Washing" is displayed on Operation panel, and the printer starts charging Cleaning fluid.
- When Celaning fluid has been charged, "Remove Cartridges" is displayed on Operation panel.

7. Remove all High-capacity ink pack adapters.

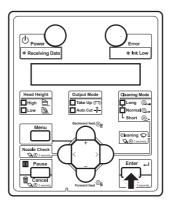

- "Busy-Washing" is displayed on Operation panel and the printer starts head cleaning.
- When head cleaning is complete, "Wash retry? No" is displayed on Oeration panel.

NOTE

Do not remove only Cleaning fluid pack while High-capacity ink pack adapter is installed on the printer. The information of the remaining IC chip card will be rewritten and Cleaning fluid pack will not be usable.

8. Press the [Enter] key on Operation panel.

• "Insert InkCartridges" is displayed on Operation panel.

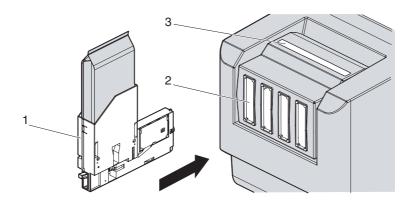

9. Remove Cleaning fluid pack and IC chip card from High-capacity ink pack adapter.

NOTE

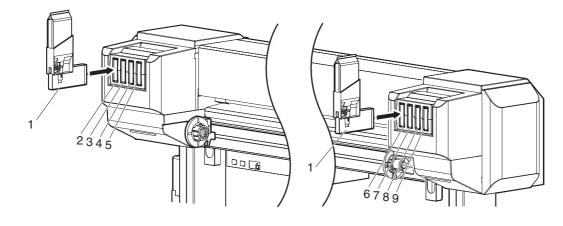

- When there is remaining Cleaning fluid pack and IC chip card, clarify the corresponding pack and card, and store it as a set.
- 10. Install Ink pack and IC chip card to High-capacity ink pack adapter.
- 11. Install High-capacity ink pack adapters (K, C, M, Y: 2 each) in Ink cartridge slots (K, C, M, Y: 2 each) on the back of the printer.
 - Shake High-capacity ink pack adapter 2 to 3 times lightly before installing it in Ink cartridge slot.
 - Make sure that Ink packs are inserted into the correct Slots. Match the ink color label with the ink color before inserting Ink pack.

NOTE

• Do not insert High-capacity ink pack adapter into Ink cartridge slot without attaching Ink pack. The information of the remaining IC chip card will be rewritten and Ink pack will not be usable.

No.	Name
1	High-capacity ink pack adapter
2	Ink cartridge slots
3	Ink color labels

Insert High-capacity ink pack adapters all the way in Ink cartridge slots.

No.	Name
1	High-capacity ink pack adapter
2	Ink cartridge slot K1
3	Ink cartridge slot K2
4	Ink cartridge slot C1
5	Ink cartridge slot C2
6	Ink cartridge slot M1
7	Ink cartridge slot M2
8	Ink cartridge slot Y1
9	Ink cartridge slot Y2

- When a High-capacity ink pack adapter is installed, "Ink Refill **%" is displayed on Operation panel and ink replenishment starts.
- Initial filling takes about 17 minutes. Ink filling operation and pause operation are repeated during the initial ink replenishment.
- When "100%" is displayed, the initial ink replenishment is complete.
- After the initial ink replenishment is complete, "Media End" is displayed on Operation panel.

- Comply strictly with the following during ink filling. If filling is interrupted, ink will be lost when filling is resumed.
 - Do not turn OFF the power of the printer.
 - Do not unplug the power cord set of the printer.
 - Do not open Front cover.
 - Do not open Maintenance cover.
 - Do not raise Media loading lever.

NOTE

- If the printer perform the nozzle check printing immediately after the initial ink replenishment is complete, the following results may occur.
 - Printed lines become blurred.
 - The data is partially not printed.

In such cases, follow **5.3** Cleaning menu and refill a small amount of ink. Then, check the printing result.

If there is no improvement in the print result even after refilling a small amount of ink, leave the printer unused for an hour or more. Then, refill a small amount of ink again and check the print result.

If there is still no improvement, contact your local MUTOH dealer.

3.3.5 When using High-capacity ink pack adapter for the first time on the printer whose ink is filled

If the printer is used without the initial ink replenishment, the air inside High-capacity ink pack adapter goes into Ink tubes and may cause nozzle clogging. Perform the initial ink replenishment from Cleaning menu in the following cases.

- When using High-capacity ink pack adapter for the first time on the printer whose ink is filled
- After using High-capacity ink pack adapters and replacing them with new ones

13 5.3 Cleaning menu

3.4 Loading media

This section explains how to load and set media, and settings for each media type.

NOTE

• For VJ-2638, refer to the operation manual of Heavy take-up unit.

Instruction Manual for Heavy-Duty take-up unit. Is "4.3 Setting the Roll Paper"

- The operation manual of Heavy-Duty take-up unit is included in the printer's operation manual CD-ROM.
- Refer to the following for details about handling media.
 X374.2 Media
- For types and details of the recommended media, contact your local MUTOH dealer.

3.4.1 Loading roll media

This section describes the procedure to load the roll media. Put the roll media in the center of the printer.

NOTE

• For VJ-2638, refer to the operation manual of Heavy-Duty take-up unit.

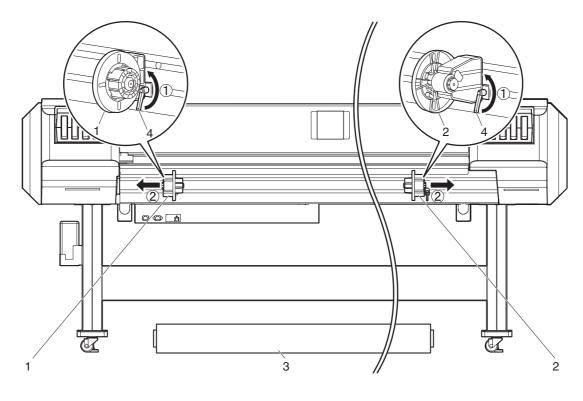

Operation Manual for Heavy-Duty take-up unit. To "4.3 Setting the Roll Paper"

- The operation manual of Heavy take-up unit is included in the printer's operation manual CD-ROM.
- The following roll media can be loaded to VJ-1638/1638W.
 - Outer diameter: 150mm or less
 - Media tube diameter: two inches or three inches
 - Weight: 30kg or less
 - Width: 1,625 mm or less
 - Thickness: 2.8mm or less

188.1.1 Printer specifications

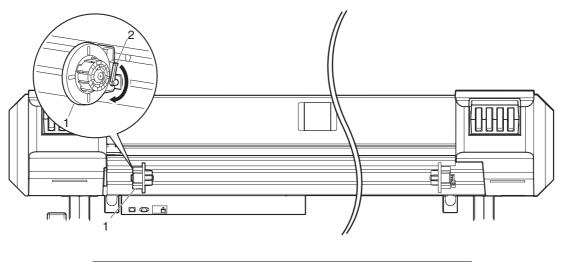

Follow the procedure below to load the roll media.

1. Loosen Fixing levers on the Roll media holders (both left and right) on the back of the printer. Set the distance between Roll media holders wider than the actual width of the roll media to be set.

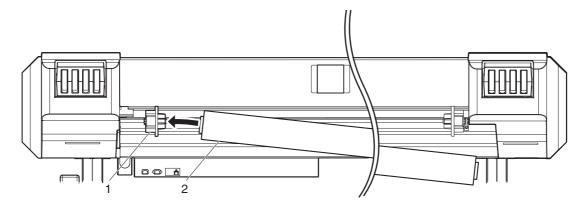

No.	Name
1	Roll media holder (Left)
2	Roll media holder (Right)
3	Roll media
4	Fixing lever

2. Tighten Fixing lever of Roll media holder (Left) and fix the roll media holder (Left).

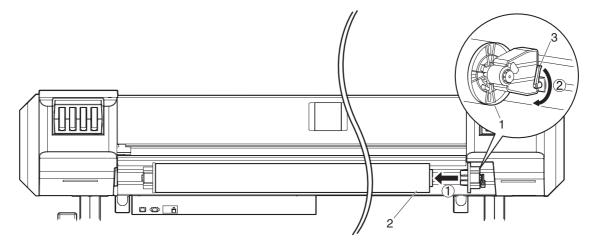

No.	Name
1	Roll media holder (Left)
2	Fixing lever

3. Set the roll media to Roll media holder (Left).

No.	Name
1	Roll media holder (Left)
2	Roll media

4. Attach Roll media holder (Right) to the roll media and tighten Fixing lever.

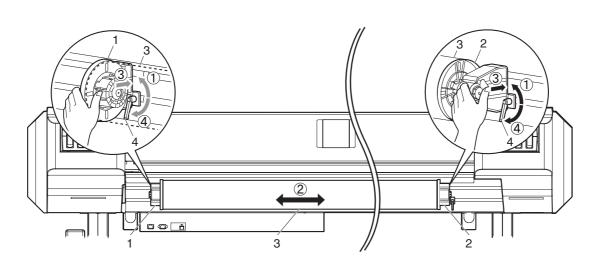

No.	Name
1	Roll media holder (Right)
2	Roll media
3	Fixing lever

5. Loosen the fixing levers of the right and left roll media holders, move the roll media to the center and tighten the levers.

NOTE

• When tightening Fixing lever, press Roll media holder toward the printer. If you do not press Roll media holder, Fixing lever may not be completely locked because of the weight of the roll media.

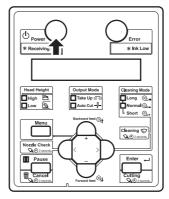

No.	Name
1	Roll media holder (Left)
2	Roll media holder (Right)
3	Roll media
4	Fixing lever

3.4.2 Setting Roll Media

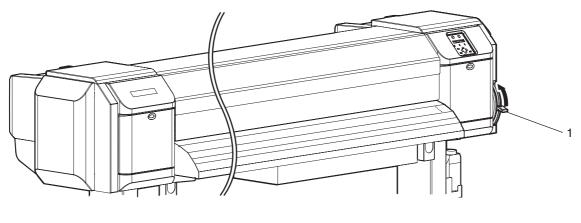

This section explains how to set the roll media.

Follow the procedure below to set the roll media.

1. Turn the printer ON.

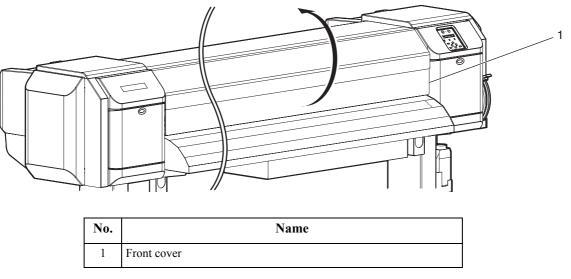

- Do not operate Media loading lever during initial operation. Print head may touch Pressurizing roller and cause a malfunction.
 - The printer starts the initializing operation.
 - "Media End" is displayed on Operation panel.
- 2. Raise Media loading lever.

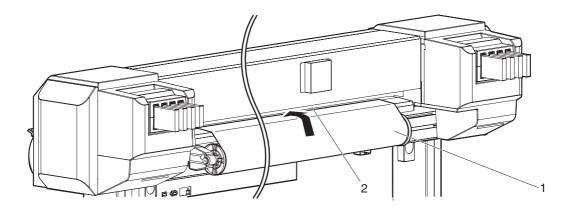

No.	Name
1	Media loading lever

• "Lever Up" is displayed on Operation panel.

3. Open Front cover.

- 4. Set the roll media to Media feed slot.
 - NOTE
- If the end of the roll media is not wound tightly, wind it tightly again, and then load it.

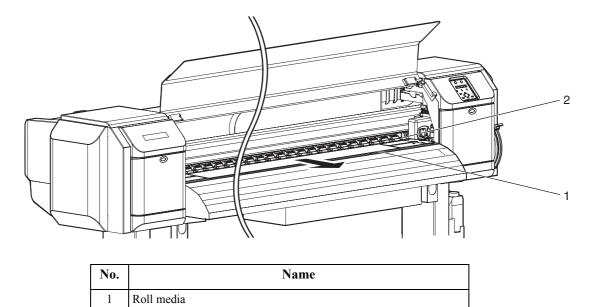

No.	Name
1	Roll media
2	Media feed slot

2

Media feed slot

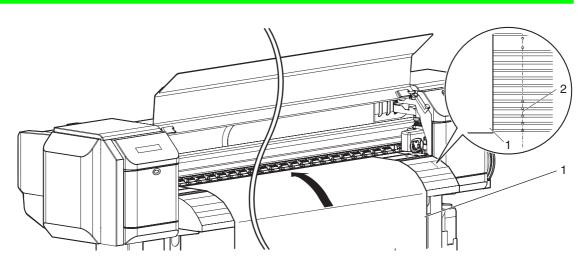

5. Pull the roll media out about 1 m from the front Media feed slot which is located inside of Front cover.

6. Rewind the roll media a little by rolling Flange on Roll media holder while holding the edge of the media, and eliminate any slack or slant.

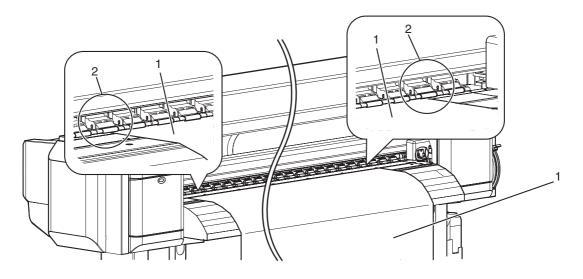

- If you set the roll media free while rewinding, the roll media may fall out from Media feed slot and fall toward the back of the printer.
- Confirm that the right edge of the roll media does not go beyond the loading mark. If it does, it may affect print quality.

No.	Name
1	Roll media
2	Media loading mark

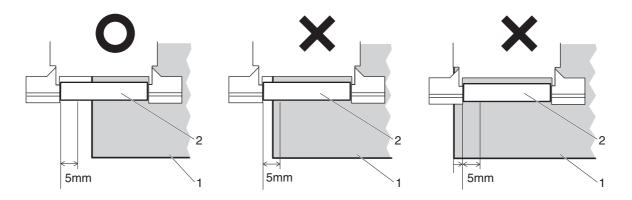

- 7. Make sure that the edges of the media is appropriately pressed by Pressurizing rollers.
 - When the media is set as shown in the following figure X, follow the procedure to adjust the position of the roll media.

If the media is set as shown in the following figure X, the media may be misaligned or creased during printing.

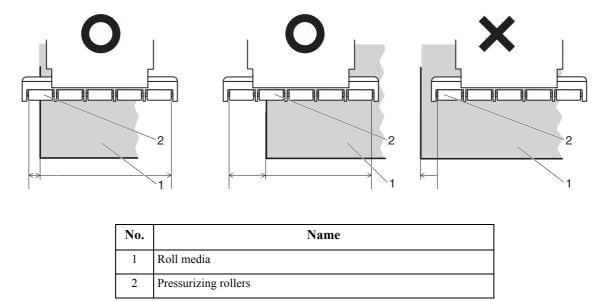

No.	Name
1	Roll media
2	Pressurizing rollers

<For VJ-1638>

No.	Name
1	Roll media
2	Pressurizing rollers

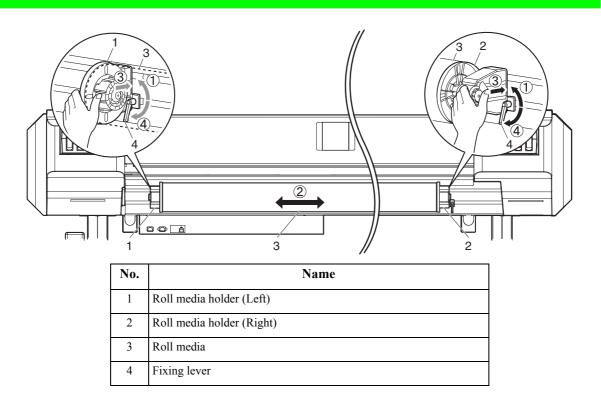

<For VJ-1638W>

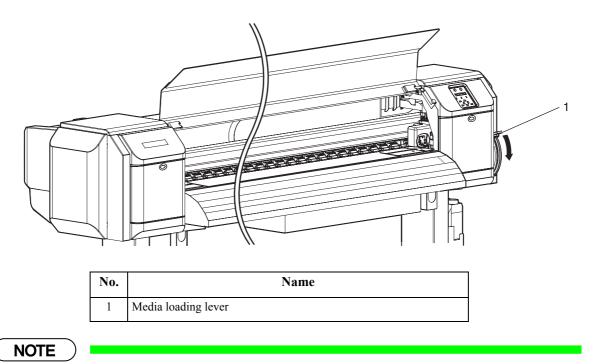

- a. Loosen Fixing levers of the right and left Roll media holders, and move the roll media to left or right.
- b. After moving the roll media, fix it with Fixing levers of the right and left Roll media holders.

NOTE

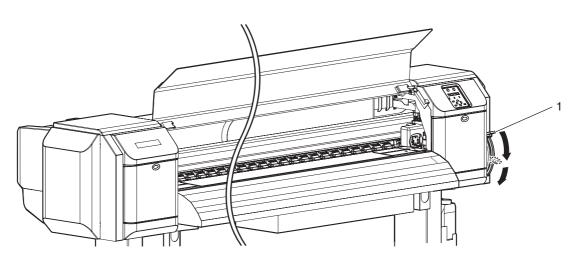

• When tightening Fixing lever, press Roll media holder toward the printer. If you do not press Roll media holder, Fixing lever may not be completely locked because of the weight of the roll media.

8. Lower Media loading lever.

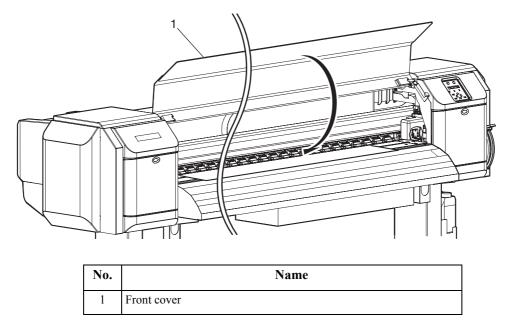

- When loading the new roll media, cut the front edge of the media if it is not straight. **C24.4.3 Cutting media**
- When you increase the pressure for the media, lower Media loading lever further as shown below.

No	0.	Name
1		Media loading lever

9. Close Front cover.

• The User Type Setup menu is displayed on Operation panel.

(ΠP)	

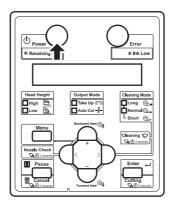

To change the user type, follow **3.4.3** Setting the User Type Setting and set the user type.

3.4.3 Setting the User Type Setting

This section explains how to set the user type setting.

Follow the procedure below to set the user type setting.

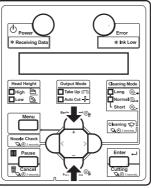

1. Turn ON the printer and load the media.

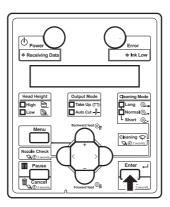

• After loading the media, the printer enters the User Type Setting menu.

TIP

- Refer to the following for setting the media.
 X3 3.4.2 Setting Roll Media
- Refer to the following for details on the User Type Setting menu.
 127 5.1.1 User Type menu
- 2. Press the [+] key or [-] key on Operation panel to select the User Type Setting.

3. Press the [Enter] key on Operation panel.

- The user type setting is set.
- "Media Initial" is displayed on Operation panel and media initialization starts.

- If the following operations are performed in the User Type Setting menu, the printer starts media initial operation without changing the User Type setting.
 - Pressing the [Cancel] key on Operation panel.
 - No keys on Operation panel are pressed for ten seconds.
 - After media initial operation is complete, "Ready to Print" is displayed on Operation panel and the printer status shifts to Normal.
 - Media set is complete.

3.4.4 Changing Torque of Roll Media Holder

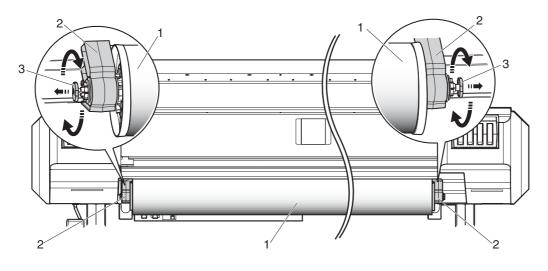

This section explains how to change the torque setting of the Roll media holder. The 1 kg torque is usually used. When the media is creased or the print head might have a risk of striking the media, change to the 4 kg torque.

NOTE

• VJ-2638 is not equipped with this function.

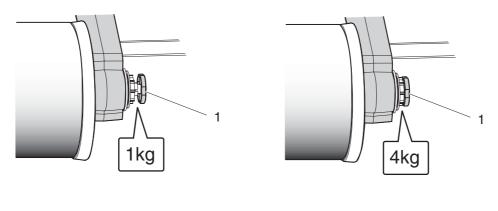

Follow the procedure below to change the torque setting of the Roll media holders.

- 1. Rotate the damper knob placed at the Roll media holder (the back left and right of the printer) by 90 degrees while pulling it out.
 - When you rotate the damper knob by 90 degrees, it clicks into place. Rotating the damper knob by 90 degrees alternately changes the 1 kg torque and 4 kg torque.
 - Change the torque setting for both of the Roll media holders.

No.	Name
1	Media
2	Roll media holder
3	Damper knob

• Torque can be set to either 1kg or 4kg as below.

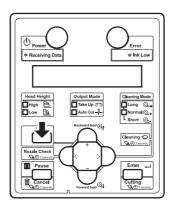

ſ	No.	Name
	1	Damper knob

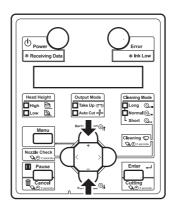

3.5 Test print

Follow the procedure below to perform test printing to confirm that the printer works correctly.

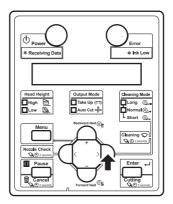

- 1. Turn ON the printer and load the roll media. 〔晉3.4.2 Setting Roll Media
- 2. Confirm that the printer is in the Normal status.
- 3. Display the Test Print menu on Operation panel.
 - a. Press the [Menu] key on Operation panel.

- "Menu1: Setup>" is displayed on Operation panel.
- b. Press the [+] key or [-] key on Operation panel to select "Menu2: Test Print".

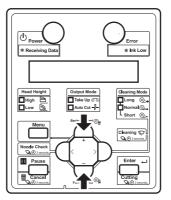

c. Press the [>] key on Operation panel.

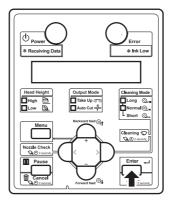

- "Test1: Nozzle Check" is displayed on Operation panel.
- The display shifts to the Test Print menu. **江宮 5.2 Test Print Menu**
- 4. Press the [+] key or [-] key on Operation panel to select an item for printing from the following items.
 - Nozzle Check
 - Mode Print
 - Setup List
 - Palette
 - Color verify (VJ-2638/VJ-1638 only).

NOTE

• When the selected print mode of the user type is Graphics 1 or Graphics 2, Palette menu is not displayed.

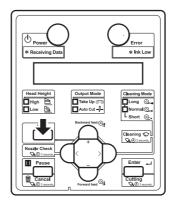

5. Press the [Enter] key on Operation panel.

• Start performing Test Print for the selected item.

TIP
Refer to the following for details on each of the print list items.
译 3.5.1 Nozzle check to 3.5.3 Setup print

- 6. Repeat step 4 to step 5 when performing test print for other items.
- 7. Press the [Menu] key on Operation panel to exit from test print.

- Operation panel returns to Normal.
- The procedure for test printing is complete.

3.5.1 Nozzle check

It is used to check whether there are any clogged heads, or missing/blurred prints.

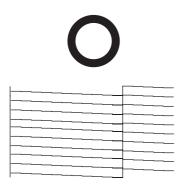

• If the nozzle check result shows that the checked points are blurred or missing, perform head cleaning.

13 6.2.3 Head cleaning

Perform nozzle check once again at the end of the work.

TIP

Refer to the following for printing procedure.

		-
1		
•		

3.5.2 Mode print

Used to confirm the following printing conditions.

- PrintMode
- Effect
- Pre-heater set temperature (VJ-2638/1638)
- Platen heater set temperature (VJ-2638/1638)
- After heater set temperature (VJ-2638/1638)
- Media feed compensation micro adjustment value

TIP

Refer to the following for printing procedure.

<For VJ-2638/1638>

2011/10/01 0:00 G2(720x1080 6Pass Bi)-Fine&Fog/Pre:30°C/Platen:30°C/After:30°C/PF Adjust:0.00%

<For VJ-1638W>

2011/10/01 0:00 G2(720x1080 6Pass Bi)-Fine&Fog /PF Adjust:0.00%

3.5.3 Setup print

Used to check the current setup of the printer.

NOTE

• Keep the printed setup print at hand.

TIP

Refer to the following for printing procedure. **江宮 3.5 Test print**

The illustrations used in this section are print samples of VJ-1638.

3.5.5 Color Verify (VJ-2638/1638 only)

The "Color Verify" feature can be utilized tov aid the printer operator in checking for and isolating potential color reproduction variations before they become a visual detriment.

In this function, 14 color patches are printed, and the colors are measured by the optional spectrophotometer (SPECTROVUE VM-10). If the Color Verify was performed before and the measured value was saved as the baseline, the color difference from the baseline will be printed as a result.

• Printer color reproduction can change over time due to various factors, including environmental (shop temperature and humidity), age and storage conditions of ink and media, possible lot-to-lot manufacturing variations of ink and media, and aging of the printer itself (due to mechanical wear). Individually, such factors may have minimal impact on color reproduction, but cumulatively over a span of these factors can lead to color variations that become apparent and potentially detrimental to image quality.

NOTE

• This function is not shown in VJ-1638W.

Follow the 2 steps below to check the color reproducibility using the Color Verify.

- 1. Save the baseline
 - Perform the Color Verify under the concition* of comparison criterion, and save the measured value (only one baseline can be saved).

*e.g.: To use a new media, after an initial ink charge, before starting the continuous print job, etc.

2. Check the current color reproducibility (Comparison with the baseline)

When a media or ink is replaced, or when the job that has been printed in the past, is printed again, perform the Color Verify and compare the color with the baseline to check if there is no significant change in the color reproducinility.

- When the Color Verify is executed, the color difference (dE) is printed on the top of each color patch. If the color difference (dE) is quite large, it means that the color reproducibility has varied from when the baseline was saved. In general, if the dE is more than 3.2, the color difference in the print result will be visible.
- In this function, the color difference (dE) is calculated based on CIE 94*. *CIE94 is proposed by CIE (International Commission of Illumination) in 1994.

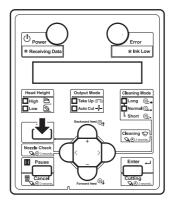

NOTE

- The optional SPECTROVUE VM-10 is required to perform this function. For more information about the SPECTROVUE VM-10, contact your local MUTOH dealer.
- Before performing this function, make sure to print the nozzle check pattern to check if there is no missing nozzle.
- IIn order to perform the Color Verify correctly, make sure to specify the following settings same as the setting when the baseline was saved. If these settings are different, the color difference may become large.
 - Each Heater Temperature Setting, Effect Setting, CR Print Width Setting, Overwrite Setting.
- Use this function with the head height adjustment lever is in the "Low" position.
- Since the room environment (temperature, humidity) may affect the print color, create the environment in accordance with the environment condition described in the operating manual "8.1.1 Printer Specification Environment Condition". In addition, make sure to place the media and ink in the printing environment for 2 hours before use.
- In this function, the baseline cannot be saved for each media. To perform the Color Verify with a different media, the new baseline should be saved. (If the media is replace to the one previously used, the baseline should be saved again.)
- The 'Color Verify' feature is intended to be utilized as an aid to the printer operator in checking for and isolating potential color reproduction variations that can arise over time due to various factors common to all printing environments; it is a tool intended to help facilitate implementation of on-printer process control. As such, it is not in-and-of-itself a guarantee of color reproducibility or reproduction accuracy, nor does it negate the need for color workflow best practices.

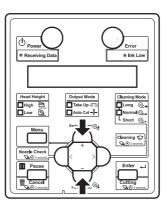

Follow the procedures below to perform the Color Verify.

- Turn ON the orinter and load the roll media.
 X 3.4.2 Setting Roll Media
- Set the user Type Setting 〔晉 3.4.3 Setting the User Type Setting
- 3. Check the temperature setting of each heater
 - Preset Pre heater temperature (¥予5.1.1.1.4 Pre-heater menu (VJ-2638/1638))
 - Preset platen-heater temperature 〔宮 5.1.1.1.5 Platen Heater menu (VJ-2638/1638)
 - Preset dryer temperature
 X@ 5.1.1.1.6 Dryer menu (VJ-2638/1638)

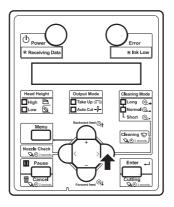

- 4. Display the Test Print menu on the operation panel.
 - a. Press the [menu] key on the operation panel.

- "menu1: Setup>" is displayed on the operation panel.
- The operation panel shifts to the Setup menu display.
- b. Press the [+] key or [-] key to select "menu2: Test Print>".. Press the [>] key on the operation panel.

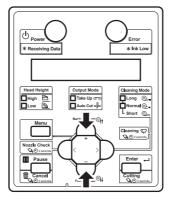

c. Press the [>] key on the operation panel.

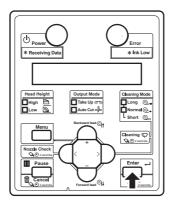

- "Test1: Nozzle Check" is displayed on the operation panel.
- The display shifts to the Test Print menu.
 125.2 Test Print Menu

5. Press the [+] key or [-] key on the operation panel to select "Test5: Color Verify".

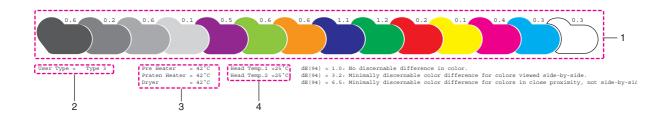

6. Press the [Enter] key on the operation panel.

- The printing of following items starts.
- a. Color Patches
- b. Media Type
- c. Preset Heater Temperature
 - Preset Pre Heater Temperature
 - Preset Platen Heater Temperature
 - Preset Dryer Temperature
- d. Head Temperature Information

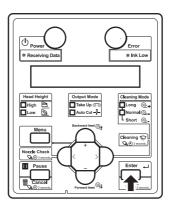

NOTE

• Do not open the covers or move media loading lever during printing.

3	Print head section	

18. Firmly pinch the tabs on both sides of the connector cap with your fingers, and install it to the connector at the print head.

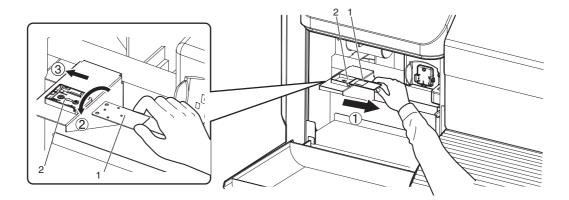

No.	Name	
1	Connector cap	
2	Tabs	
3	Print head section	
4	Connector	

19. Press the [Enter] key.

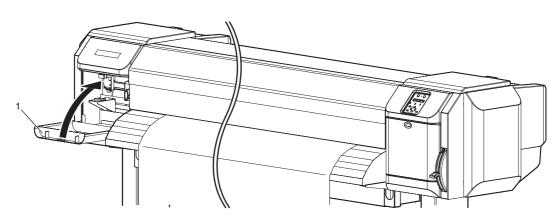

- "Wait for a while..." is displayed on the operation panel.
- "Remove white plate then close mainte. cover." is displayed on the operation panel.

20. Remove the white reference plate from the plate installation place, turn it over so that the black side faces up, and install it back to the original place.

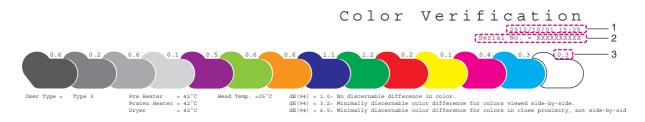

No.	Name
1	White reference plate
2	Plate installation place

- When the white reference plate is not in use, make sure that it is turned over facing down to avoid any contamination.
- 21. Close the maintenance cover.

1	No.	Name	
	1	Maintenance cover	

- The printing of following items starts.
- a. Date
- b. Serial Number
- c. Color Difference (dE)

No.	Name	
1	Date	
2	Serial Number	
3	Color Difference (dE)	

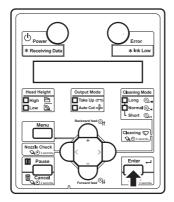

22. Check the color difference (dE).

Followings are the commonly recognized indications of color difference (dE).

- If dE is under 1.0, the color differences cannot be detected by human eyes.
- If dE is under 3.2, the color differences cannot be detected unless compared to one another.
- If dE is under 6.5, the colors are sensuously judged as the same.

- In order to perform the Color Verify correctly, make sure to specify the following settings same as the setting when the baseline was saved. If these settings are different, the color difference may become large.
 - Each Heater Temperature Setting, Effect Setting, CR Print Width Setting, Overwrite Setting
- Since the room environment (temperature, humidity) may affect the print color, create the environment in accordance with the environment condition described in the operating manual "8.1.1 Printer specifications" "Environment Condition". In addition, make sure to place the media and ink in the printing environment for 2 hours before use.
- "Color Verify" is a function to check the color variation in print color caused by various causes. This function is not to guarantee the color reproducibility.
- Since the judgment of color acceptance is largely dependent on the human eye, we recommend to perform the print to check the color.
 - The message "Update Result?" is displayed on the operation panel.

23. Press [Enter] key to save the measurement value of the currently printed color patches.

- When the measurement value is saved, the baseline will be replaced by the currently measured value.
- Press [Cancel] key to not to save the measurement value.
 - "Ready to Print" is displayed on the operation panel.

3.6 Print quality adjustment

It is used for optimizing the quality of image prints. Adjustment methods for this printer are as follows.

Adjustment method	Description	Reference
Standard	Adjusts only the print mode in the user type setting which is currently set.	C習3.6.1 Standard print quality adjustment
Custom	Perform adjustment for all print modes.	译了3.6.2 Custom print quality adjustment

NOTE

• This printer was adjusted at the factory shipment so that it obtains the optimum printing quality. Adjust the quality if the print quality changes after the installation environment or the media is changed.

• When newly setting or changing the user type setting after adjusting Standard adjust print, make sure to adjust print.

• Since all print modes are adjusted at once after performing Custom adjust print, adjust print is not required even after changing the print mode.

• When specifying a print mode which is different from the mode set in the user type setting, adjust all print modes in the Custom adjust print first.

3.6.1 Standard print quality adjustment

Adjusts only the print mode in the user type setting which is currently set. This menu consists of the following menus.

Menu name	Description	Reference
Standard confirmation pattern	Print out the confirmation pattern and check the degree of misalignment.	译了3.6.1.1 Standard confirmation pattern
Standard rough adjustment pattern	Perform this when the degree of misalignment is big.	て記念.1.2 Standard rough adjustment pattern
Standard micro adjustment pattern	Perform this when the degree of misalignment is small.	了了3.6.1.3 Standard micro adjustment pattern

Follow the procedure below to perform adjustment.

 Print out the confirmation pattern and check the degree of misalignment. 、 文字 3.6.1.1 Standard confirmation pattern Perform rough adjustment when the degree of misalignment is big.
 文 3.6.1.2 Standard rough adjustment pattern
 Perform micro adjustment when the degree of misalignment is small.
 文 3.6.1.3 Standard micro adjustment pattern

- Perform rough adjustment first when the degree of misalignment is difficult to determine.
- 3. Print out the confirmation pattern again and check if the printer has been adjusted properly. X 3.6.1.1 Standard confirmation pattern
- 4. If it has not been adjusted yet, return to step 2.

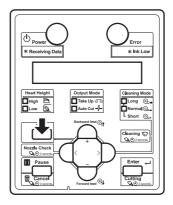

• Perform micro adjustment if the printer is not fully adjusted after rough adjustment.

3.6.1.1 Standard confirmation pattern

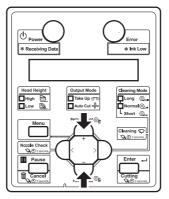

Print out the confirmation pattern of the print mode in the user type setting which is currently set.

- Turn ON the printer and load the roll media.
 3.4.2 Setting Roll Media
- 2. Display the Adjust Print menu on Operation panel.
 - a. Press the [Menu] key on Operation panel.

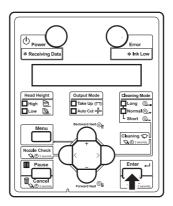

• "Menu1: Setup>" is displayed on Operation panel.

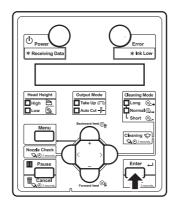

b. Press the [>] key on Operation panel to select "Menu1: User Type".

c. Press the [Enter] key on Operation panel.

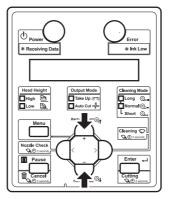

- "User: TypeXX" (XX is a number between 1 and 15) is displayed on Operation panel.
- d. Press the [+] key or [-] key on Operation panel to select the user type setting.
- e. Press the [Enter] key on Operation panel.

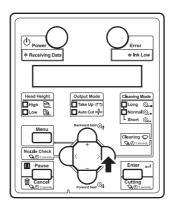

• "**1: Print Mode" is displayed on Operation panel.

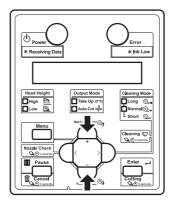

f. Press the [+] key or [-] key on Operation panel to select "Menu2: Adjust Print".

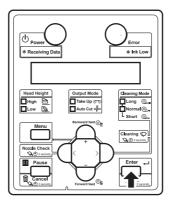

g. Press the [>] key on Operation panel.

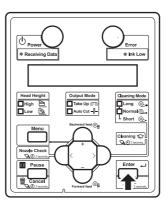

- "Adjust print1: Standard" is displayed on Operation panel.
- h. Press the [+] key or [-] key on Operation panel to select "Adjust Print1: Standard".

- "Adj.1: Confirm" is displayed on Operation panel.
- 3. Press the [Enter] key on Operation panel.

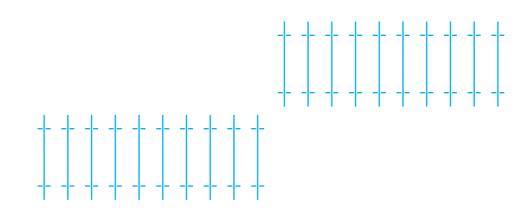

• For VJ-2638/1638, "Warming Up Skip ->E" is displayed on Operation panel. (This is not displayed for VJ-1638W since it does not perform warming up.)

• While "Warming Up" is displayed, do not touch Platen and Media guide. They become very hot and you could burn yourself.

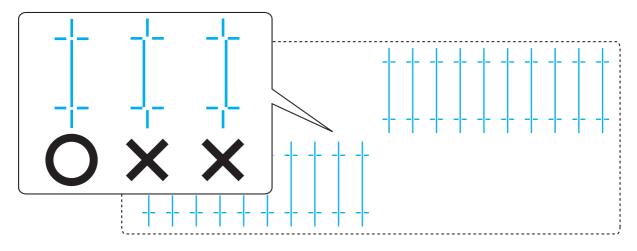

- You can start printing during warming up.
 X3 4.4.7 Starting printing during warming up (VJ-2638/1638)
 - A confirmation pattern for print quality adjustment is printed. (VJ-2638/1638 starts printing after warming up is complete.)
 - The confirmation pattern will be printed.

NOTE

• Because this printer has 2 Print heads, 2 rows of confirmation pattern will be printed.

- After the confirmation pattern is printed, Operation panel returns to "Adj.1: Confirm".
- 4. Confirm that the confirmation pattern printing result is as follows.

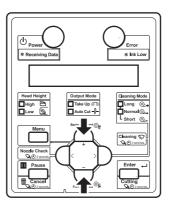

- a. When the printing result is OK; You do not need perform print quality adjustment. The procedure for print quality adjustment is complete.
- b. When the printing result is NG; You need to perform print quality adjustment.
 - Perform rough adjustment when the degree of misalignment is big.
 X 3.6.1.2 Standard rough adjustment pattern
 - Perform micro adjustment when the degree of misalignment is small.
 X 3.6.1.3 Standard micro adjustment pattern

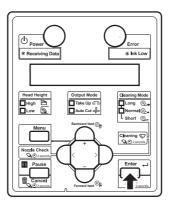

3.6.1.2 Standard rough adjustment pattern

Perform rough adjustment when the degree of misalignment is big. Print rough adjustment pattern and register the set values.

- 1. Display the Standard Adjust Print menu on Operation panel in the same way as step 2 of 3.6.1.1 Standard confirmation pattern.
- 2. Press the [+] key or [-] key on Operation panel to select "Adj.2: Rough Pattern".

3. Press the [Enter] key on Operation panel.

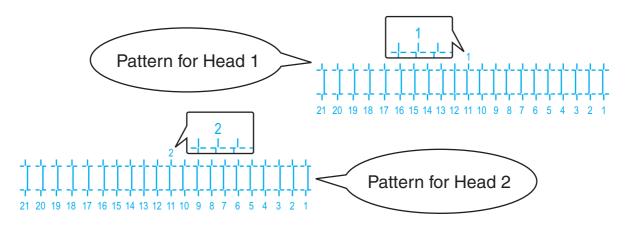

• For VJ-2638/1638, "Warming Up Skip ->E" is displayed on Operation panel. (This is not displayed for VJ-1638W since it does not perform warming up.)

• While "Warming Up" is displayed, do not touch Platen and Media guide. They become very hot and you could burn yourself.

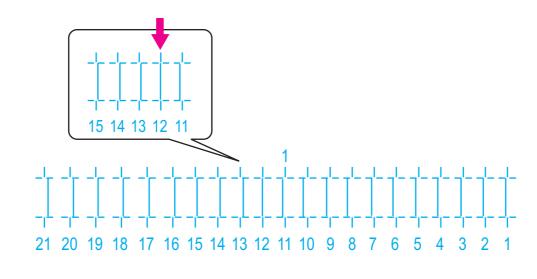

NOTE

You can start printing during warming up.
 X374.4.7 Starting printing during warming up (VJ-2638/1638)

• A rough adjustment pattern is printed for both Head 1 and Head 2. (VJ-2638/1638 starts printing after warming up is complete.)

- For the rough adjustment pattern, the same petterns will be printed on both sides and center of the media.
- 4. For Head 1, check the print results on both sides and center of the media and select the number that looks most aligned between 1 and 21.
 - 12 is selected in the next printing sample.

NOTE

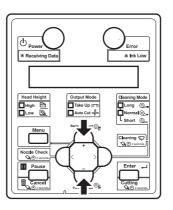

• 11 represents the current setting value.

- 5. "Pattern*1: 11" (refer to the chart below for *) is displayed on Operation panel.
 - The pattern name indicated by * differs depending on the set print mode. Print modes and corresponding pattern names are listed as follows.

 - When adjustment is required for one of the patterns (A to F): 13.6.2.3.2 Individual Adj. pattern

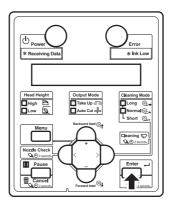

3.6.2.2 Custom rough adjustment pattern

Perform rough adjustment when the degree of misalignment is big. Print rough adjustment pattern and register the set values.

- 1. Display the Custom Adjust Print menu on Operation panel in the same way as Step 2 of **3.6.2.1 Custom confirmation pattern**.
- 2. Press the [+] key or [-] key on Operation panel to select "Adj.2: Rough Pattern".

3. Press the [Enter] key on Operation panel.

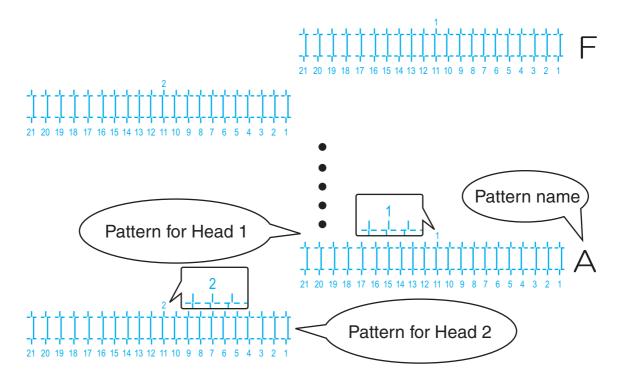

• For VJ-2638/1638, "Warming Up Skip ->E" is displayed on Operation panel. (This is not displayed for VJ-1638W since it does not perform warming up.)

• While "Warming Up" is displayed, do not touch Platen and Media guide. They become very hot and you could burn yourself.

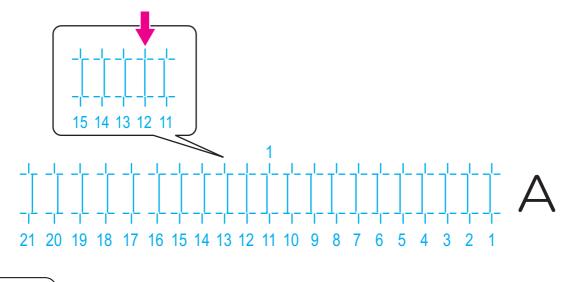

- You can start printing during warming up.
 X8 4.4.7 Starting printing during warming up (VJ-2638/1638)
 - Starts a rough adjustment pattern printing. (VJ-2638/1638 starts printing after warming up is complete.)

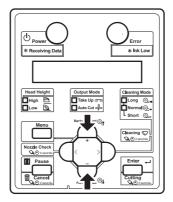

- For the rough adjustment pattern, the same petterns will be printed on both sides and center of the media.
- 6 rough adjustment patterns (A to F) are printed. Enter the adjusted values for both Head 1 and Head 2.

- 4. For Head 1, check the print results on both sides and center of the media and select the number that looks most aligned between 1 and 21.
 - "12" is selected in the following pattern A1.

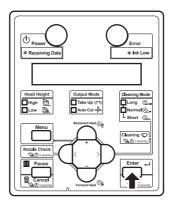

NOTE

- 11 represents the current setting value.
- 5. "Pattern*1: 11" (refer to the chart below for *) is displayed on Operation panel.
- 6. Press the [+] key or [-] key on Operation panel to enter the number that you selected in Step 4.

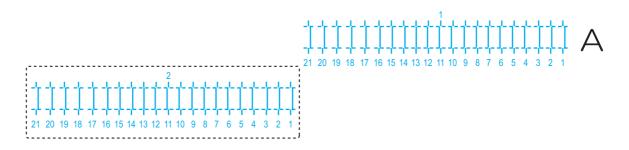

NOTE

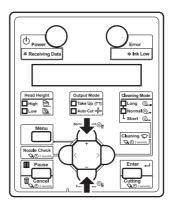

• When you press the [Cancel] key on Operation panel, the setting value is not enterd and the display returns to "Adj.2: Rough Pattern".

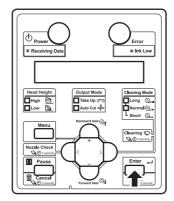

- Determines the setting.
- "Pattern*2: 11" is displayed next.
- 8. For Head 2, check the print results on both sides and center of the media and select the number that looks most aligned between 1 and 21.

9. Press the [+] key or [-] key on Operation panel to enter the number that you selected in Step 8.

• Determines the setting.

11. Enter the values for patterns B to F in the same way.

- Press the [Enter] key to set the value.
- Once all set values have been entered, press the [Enter] key to register the set values of patterns A to F.
- "Adj.2: Rough Pattern" is displayed on Operation panel.

3.6.2.3 Custom micro adjustment pattern

Perform micro adjustment when the degree of misalignment is small. This menu consists of the following menus.

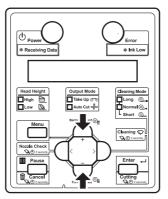

Menu name		Description	Reference
Custom micro adjustment pattern	Adj. PatternALL	All confirmation patterns (A to F) will be adjusted.	译了3.6.2.3.1 Adj. Pattern ALL
	Individual Adj. pattern	One of the confirmation patterns (A to F) will be adjusted.	译了3.6.2.3.2 Individual Adj. pattern

3.6.2.3.1 Adj. Pattern ALL

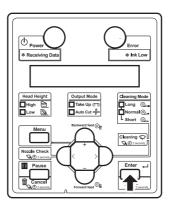

Print micro adjustment pattern ALL and register the set values.

1. Display the Custom Adjust Print menu on Operation panel in the same way as Step 2 of **3.6.2.1 Custom confirmation pattern**.

2. Press the [+] key or [-] key on Operation panel to select "Adj.3: Fine Pattern".

3. Press the [Enter] key on Operation panel.

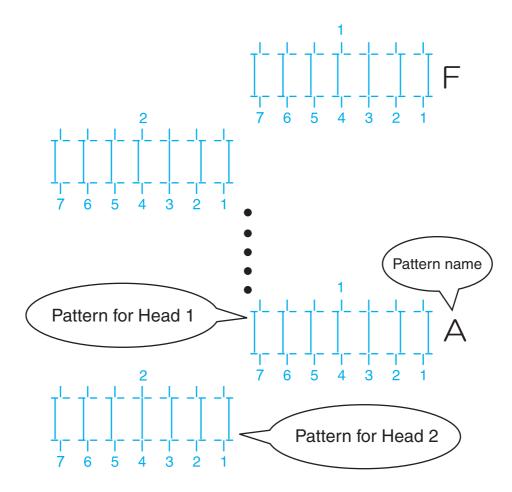

• For VJ-2638/1638, "Warming Up Skip ->E" is displayed on Operation panel. (This is not displayed for VJ-1638W since it does not perform warming up.)

• While "Warming Up" is displayed, do not touch Platen and Media guide. They become very hot and you could burn yourself.

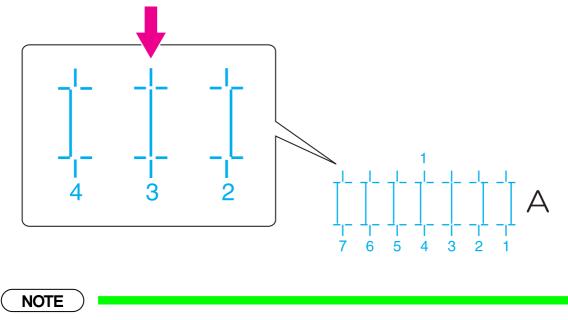

You can start printing during warming up.
 X2 4.4.7 Starting printing during warming up (VJ-2638/1638)

An adjust print pattern is printed.
 For Adjust print pattern printing, 6 adjust print patterns (A to F) are printed. Enter the adjusted values for both Head 1 and Head 2.
 (VJ-2638/1638 starts printing after warming up is complete.)

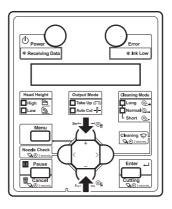

• For the Adjust print pattern, the same petterns will be printed repeatedly on both sides and center of the media.

- 4. For Head 1, check the print results on both sides and center of the media and select the number that looks most aligned between 1 and 7.
 - "3" is selected in the following pattern A.

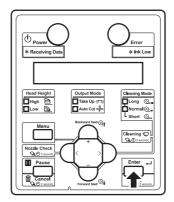

- 4 represents the current setting value.
- 5. "Pattern*1: 4" (refer to the chart below for *) is displayed on Operation panel.
- 6. Press the [+] key or [-] key on Operation panel to enter the number that you selected in Step 4.

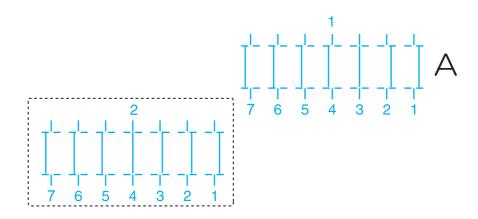

NOTE

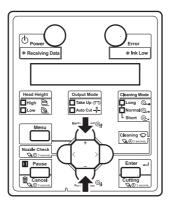

• When you press the [Cancel] key on Operation panel, the display returns to "Adj.3: Fine Ptn. ALL".

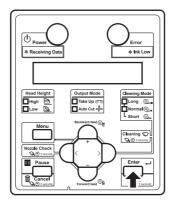

- Determines the setting.
- "Pattern*2: 4" is displayed next.
- 8. For Head 2, check the print results on both sides and center of the media and select the number that looks most aligned between 1 and 7.

9. Press the [+] key or [-] key on Operation panel to enter the number that you selected in Step 8.

• Determines the setting.

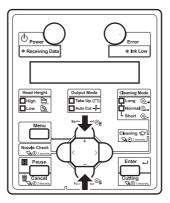

11. Enter the values for patterns B to F in the same way.

- Press the [Enter] key to set the value.
- Once all set values have been entered, press the [Enter] key to register the set values of patterns A to F.
- "Adj.3: Fine Ptn. ALL" is displayed on Operation panel.

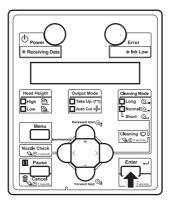

3.6.2.3.2 Individual Adj. pattern

Print one adjustment pattern from A to F and register the set value. The following describes how to adjust pattern A only.

- 1. Display the Custom Adjust Print menu on Operation panel in the same way as Step 2 of **3.6.2.1 Custom confirmation pattern**.
- 2. Press the [+] key or [-] key on Operation panel to select "Adj4: Fine PatternA".

3. Press the [Enter] key on Operation panel.

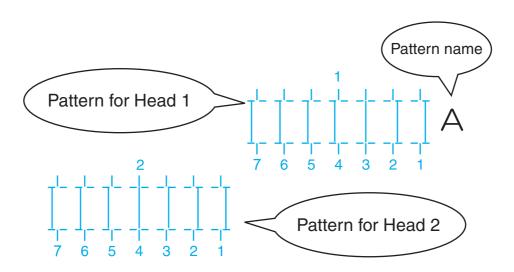

• For VJ-2638/1638, "Warming Up Skip ->E" is displayed on Operation panel. (This is not displayed for VJ-1638W since it does not perform warming up.)

• While "Warming Up" is displayed, do not touch Platen and Media guide. They become very hot and you could burn yourself.

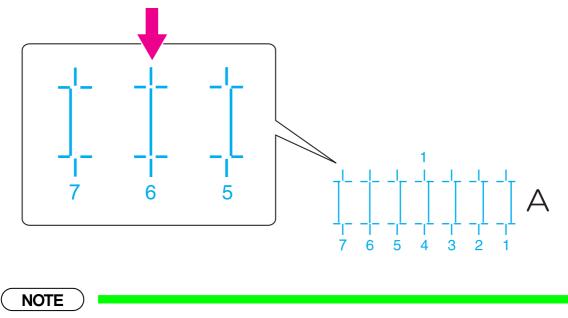

NOTE

- You can start printing during warming up.
 X=4.4.7 Starting printing during warming up (VJ-2638/1638)
 - An micro adjust print pattern is printed for both Head 1 and Head 2. (VJ-2638/1638 starts printing after warming up is complete.)

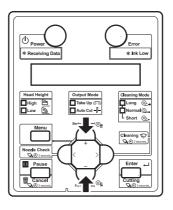

• For the Adjust print pattern, the same petterns will be printed repeatedly on both sides and center of the media.

- 4. For Head 1, check the print results on both sides and center of the media and select the number that looks most aligned between 1 and 7.
 - "6" is selected in the next printing sample.

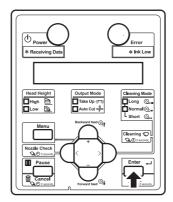

- 4 represents the current setting value.
- 5. "PatternA1: 4" is displayed on Operation panel.
- 6. Press the [+] key or [-] key on Operation panel to enter the number that you selected in Step 4.

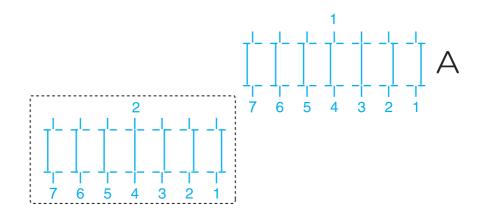

NOTE

• When you press the [Cancel] key on Operation panel, the display returns to "Adj4: Fine PatternA".

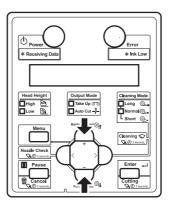

7. Press the [Enter] key on Operation panel.

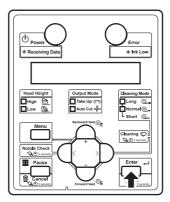

- Determines the setting.
- "PatternA2: 4" is displayed next.
- 8. For Head 2, check the print results on both sides and center of the media and select the number that looks most aligned between 1 and 7.

9. Press the [+] key or [-] key on Operation panel to enter the number that you selected in Step 8.

10. Press the [Enter] key on Operation panel.

- Determines the setting.
- "Adj4: Fine PatternA" is displayed on Operation panel.

3.7 Connecting the printer to PC

This section explains how to connect the printer and a PC.

3.7.1 System requirements

The operating systems with which this printer is compatible are as follows

Operating system	Windows 7, Windows Vista, Windows XP

NOTE

- The required memory varies depending on the application software or the print data type.
- A large hard disk and memory are recommended.
- For the system requirements for the operation of the software server RIP (option), refer to the operation manual of the software server RIP.

3.7.2 Preparing cables

The printer is equipped with a network interface for connecting with a PC. You need a network interface cable to connect a PC with this printer. Prepare the cable depending on the PC that it will be connected to.

TIP

About connecting a network interface cable, refer to 3.7.3 Connecting a network interface cable.

For the recommended cable specifications, refer to 8.2 Interface specification.

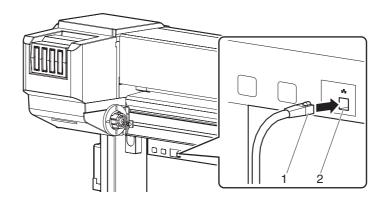

3.7.3 Connecting a network interface cable

This section explains how to connect a network interface cable.

Follow the procedure below to connect this printer to your PC.

NOTE

- When connecting the printer and computer via the hub, use a straight cable.
- When connecting the printer and computer Peer-to-Peer, use a crossover cable.
- 1. Turn OFF both the printer and PC.
- 2. Insert the network interface cable into the network interface connector located on the back of the printer.

No.	Name
1	Network interface cable
2	Network interface cable connector

3. Connect the other connector of the network interface cable to your PC.

TIP

About connecting to your PC, refer to the operation manual included with the PC.

For network setting of the printer, refer to the following.

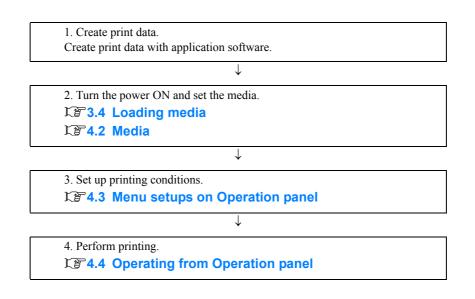

にす5.1.23 IP Address menu にす5.1.24 Subnet Mask menu にす5.1.25 Gateway menu

4 Handling the printer

This chapter explains how to handle the printer.

4.1 Print flow chart

The following flow chart illustrates the procedure to perform printing with the printer. Refer to each section as required.

Since VJ-2638/1638 is equipped with Heaters, strictly comply with the following Warnings and Cautions.

- Do not place any combustible materials on Platen while the heater is working. There may be a risk of fire.
- Do not spill flammable liquid on Platen. It may cause a fire.

- Do not touch Media guide while printing. Media guide becomes very hot and you could burn yourself.
- Do not touch Media feed slot, Platen, and Media guide while Heater is working. Media feed slot, Platen, and Media guide become very hot and you could burn yourself.
- Ventilate the workplace. Not doing so may cause nausea or a fire hazzard.

NOTE

• Do not open Front cover and Maintenance cover during printing. If the above covers are opened, printing will be interrupted. Printing restarts once Covers are closed. However, you are not guaranteed to have high print quality.

4.2 Media

This section explains details of available media for this printer.

4.2.1 Media type

The type and quality of media greatly influence the print result. Fully understand the following and use the media that matches the intended use. The following media is recommended and available for this printer. Select the appropriate media according to the intended use.

NOTE

- For details of the recommended media, contact your local MUTOH dealer.
- If failures or malfunctions of the printer occur by using the media other than the recommended media:
 - The printer will not be covered by the warranty and repair expenses will be covered by the customer.
 - For details, refer to the following.
 X86 Maintenance
 X877 Troubleshooting
 - To request a repair, contact your local MUTOH dealer.

TIP

When printing on media that is not recommended,

- Refer to the media manual or ask where you purchased the media for information on media types and appropriate settings for this printer.
- Set the print quality according to **5.1.1 User Type menu**.

4.2.2 Cautions on handling media

Note the following points when handling the media.

NOTE

• Use recommended media under an appropriate environment. The appropriate temperature and humidity for printing are as follows.

	Temperature	Humidity
Guaranteed range of printing accuracy	22°C to 30°C	40% to 60%
Change rate	Within 2°C per hour	Within 5 % per hour

- •Do not use media which is creased, cut, torn, or curled.
- The size of media can change according to changes in humidity in the printing environment. Before using media, leave media for 30 minutes in the printing environment to adapt it to the environment.

Performing printing without adapting media to the printing environment may cause media jams due to gaps or wrinkles in the media.

Print quality is also affected.

- When using the printer in a low-humidity environment, the cut media may stuck and may not come down. In such a case, open Front cover after the media is cut and remove the media.
- Do not touch the print side. Moisture and oil on your hands may affect the print quality.
- Do not leave media set in the printer for a long time. Some media has a tendency to bend, causing media jams and degradation of print quality. Avoid using such media especially in winter, in dry conditions, and when printing formal documents.
- Do not discard the individual box and bag. Use them for storing media.

4.2.3 Precaution on storing media

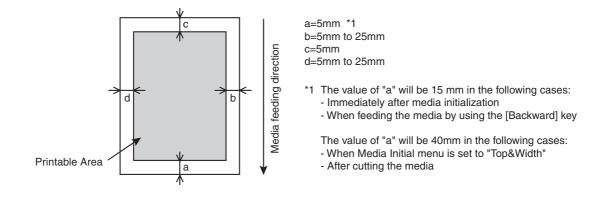

Note the following points on storing media.

NOTE

- Avoid high temperature, high humidity, and direct sunlight when storing media.
- After removing the unused roll media from Feed unit, wind it properly. Then wrap it with an individual bag and store it in an individual box.
- Keep the media dry.

4.2.4 Printable area

The printable area of this printer is as follows.

4.2.5 Head height adjustment

Printing with high printing rate or using strongly-curved media can cause Print heads to rub the media. Changing the distance from Print head surface to the media (head height) may allow you to prevent Head from rubbing the media.

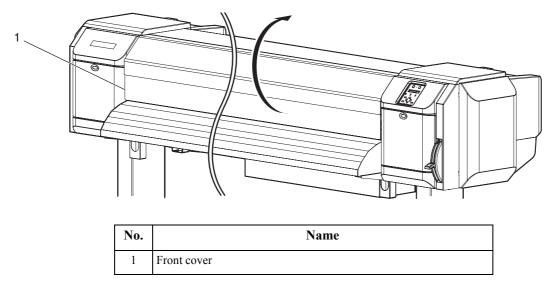

Head height can be changed to three levels. Follow the procedure below to change the head height.

The illustrations used in this section are those of VJ-1638.

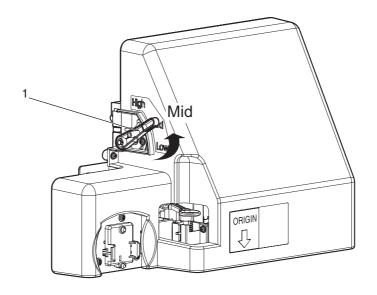

4.2.5.1 When setting the head height to Mid

NOTE

• Do not open Front cover and change the head height during printing. If the head height is changed, the alignment will be changed and high print quality will not be guaranteed. 1. Open Front cover.

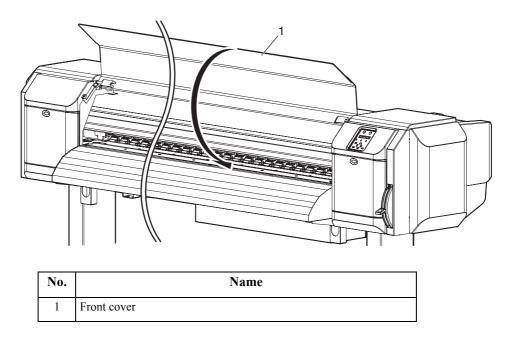

2. Change the head height by moving Head height adjustment lever (orange).

No.	Name	
1	Head height adjustment lever	

- High lamp on Operation panel lights up in green.
- Low lamp on Operation panel lights up in green.

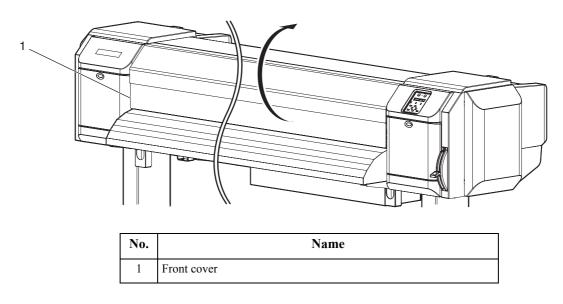

3. Close Front cover.

4.2.5.2 When setting the head height to High

NOTE

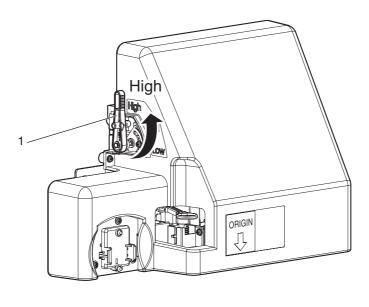

- If Head height adjustment lever is raised, high print quality is not guaranteed.
- Do not open Front cover and change the head height during printing. If the head height is changed, the alignment will be changed and high print quality will not be guaranteed.
- 1. Open Front cover.

2. Change the head height by moving Head height adjustment lever (orange).

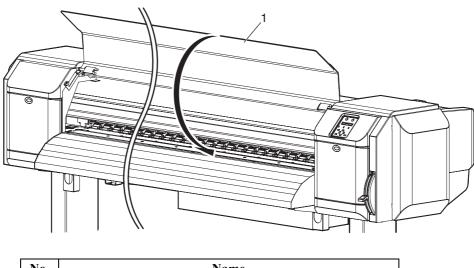

NOTE

• Do not raise Head height adjustment lever higher than the following position. Doing so may damage the printer.

No.	Name
1	Head height adjustment lever

- High lamp on Operation panel lights up in green.
- 3. Close Front cover.

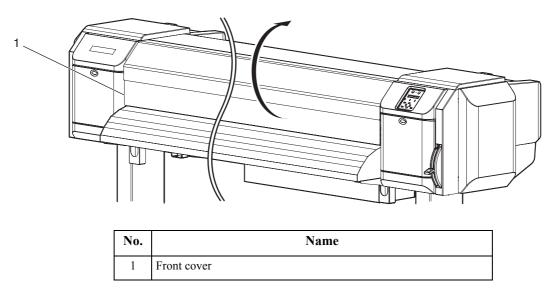

No.	Name
1	Front cover

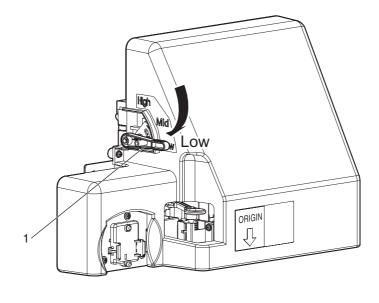

4.2.5.3 When setting the head height to Low

NOTE

- Do not open Front cover and change the head height during printing. If the head height is changed, the alignment will be changed and high print quality will not be guaranteed.
- 1. Open Front cover.

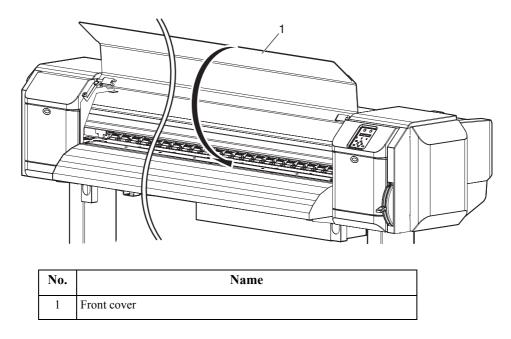

2. Change the head height by moving Head height adjustment lever (orange).

No.	Name
1	Head height adjustment lever

• Low lamp on Operation panel lights up in green.

3. Close Front cover.

4.2.6 Media feed compensation

This section explains the Media feed compensation.

The feeding length depends on the media type. The following or similar results may be seen in prints.

- Printed images overlap.
- White lines are printed over images.

The accuracy of media feeding may be improved with the following methods.

- Adjust the media feed compensation value.
 1. Adjust the media feed compensation value
- Fix the media firmly.
 12 4.2.6.2 How to fix the media firmly

4.2.6.1 Procedure for the media feed compensation value

- 1. Display the Dist.Adj menu on Operation panel.
 - a. Press the [Menu] key on Operation panel.
 - "Menu1: Setup>" is displayed on Operation panel.
 - The operation panel shifts to the Setup menu display.
 - b. Press the [>] key on Operation panel.
 - "Set1: User Type" is displayed on Operation panel.

- c. Press the [Enter] key on Operation panel.
 - "User: TypeXX" (XX is a number between 1 and 15) is displayed on Operation panel.
- d. Press the [+] key or [-] key on Operation panel to select the user type to use.
- e. Press the [Enter] key on Operation panel.
 - "**>1: Print Mode" is displayed on Operation panel.

(IIP)	

The selected user type (Type 1 to 15) is displayed in "**".

- f. Press the [+] key or [-] key on Operation panel to select "**>3: PF Adjust".
- g. Press the [>] key on Operation panel.
 - "PF1: Initial Print" is displayed on Operation panel.
 - Proceed to Dist.Adj menu.
 LF 5.1.1.1.3 Media feed compensation
- 2. Performs Initial Adjust Print.
 - a. Press the [Enter] key on Operation panel.
 - "Feed Length: 250 mm" is displayed on Operation panel.

TIP

The length of media that is fed (feeding length) for initial adjustment printing is normally set at 250 mm.

If you increase the feeding length, the accuracy of the Media feed compensation improves. To change the feeding length, press the [+] key or [-] key on Operation panel and change the set value.

- b. Press the [Enter] key on Operation panel.
 - "Printing" is displayed on Operation panel.
 - Starts initial adjustment printing.

No.	Name
1	FeedLength
2	Media feeding direction

- When the initial adjustment printing is complete, the printer enters Normal.
- 3. Measure the distance between the two pluses (+) in the initial adjustment print using a ruler.
- 4. Sets up Initial Adjust Change.
 - a. Press the [+] key or [-] key on Operation panel to select "PF2: Initial Change".
 - b. Press the [Enter] key on Operation panel.
 - "Init.: 250.0/250 mm" is displayed on Operation panel.
 - c. Press the [+] key or [-] key on Operation panel and enter the measured value in Step 3.
 - d. Press the [Enter] key on Operation panel.
 - The initial adjustment value is saved.
 - "PF2: Initial Change" is displayed on Operation panel.

- 5. Performs Confirm Print.
 - a. Press the [+] key or [-] key on Operation panel to select "PF3: Confirm Print".
 - b. Press the [Enter] key on Operation panel.
 - "Feed Length: 250 mm" is displayed on Operation panel.

TIP

The length of media that is fed (feeding length) for confirmation adjustment printing is normally set at 250 mm.

If you increase the feeding length, the accuracy of the Media feed compensation improves. To change the feeding length, press the [+] key or [-] key on Operation panel and change the set value.

- c. Press the [Enter] key on Operation panel.
 - "Printing" is displayed on Operation panel.
 - Starts confirmation adjustment printing.

No.	Name
1	FeedLength
2	Media feeding direction

- When the Confirm Print is complete, the printer enters Normal.
- d. After the confirmation adjustment printing, cut the media. C會 4.4.3 Cutting media
- 6. Measure the distance between the two pluses in the confirmation adjustment print using a ruler. Then, confirm that the distance matches the feeding length when printing.
 - a. If the distance does not match the feeding length, follow the procedure from Step 1 to Step 5 and readjust.
 - b. If the distance matches the feeding length, proceed to step 7.

- 7. Performs Micro Adjustment Print.
 - a. Display the Dist.Adj menu on Operation panel in the same way as in Step 1.
 - b. Press the [+] key or [-] key on Operation panel to select "PF4: Micro Print".
 - c. Press the [Enter] key on Operation panel.
 - For VJ-2638/1638, "Warming up Skip ->E" is displayed on Operation panel. (This is not displayed for VJ-1638W since it does not perform warming up.)

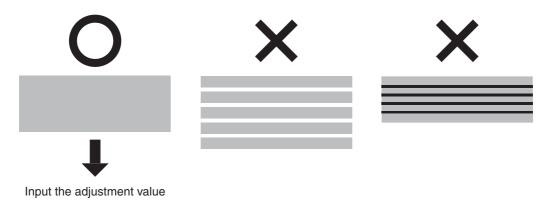

• While "Warming Up" is displayed, do not touch Platen and Media guide. They become very hot and you could burn yourself.

NOTE

- You can start printing during warming up.
 X 4.4.7 Starting printing during warming up (VJ-2638/1638)
 - "Printing" is displayed on Operation panel. (VJ-2638/1638 starts printing after warming up is complete.)
 - Starts micro adjustment printing.

- After the micro adjustment printing is completed, "PF4:Micro Print" is displayed on Operation panel.
- 8. Refer to the illustrations below and check the printing result.

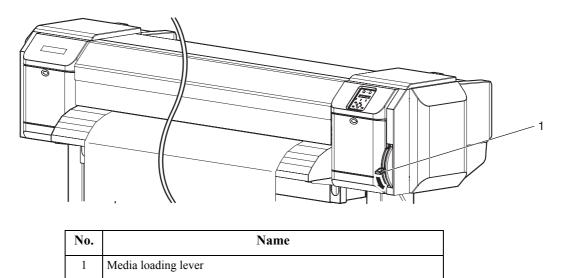

- 9. Sets up Micro Adjustment Change.
 - a. Press the [+] key or [-] key on Operation panel to select "PF5: Micro Change".
 - b. Press the [Enter] key on Operation panel.
 - "Micro Change: 0.00%" is displayed on Operation panel.
 - c. Press the [+] key or [-] key and enter the micro adjustment value according to the printing result in Step 7.
 The actimula divised value has the least white lines an everlapping images. Use the number of

The optimal adjusted value has the least white lines or overlapping images. Use the number on the bottom right of the printing result as the adjusted value.

- d. Press the [Enter] key on Operation panel.
 - •The micro adjustment value is saved.
 - "PF5:Micro Change" is displayed on Operation panel.
- 10. Press the [Menu] key on Operation panel.
 - Operation panel returns to Normal.
 - The adjustment of media feed compensation value is complete.

4.2.6.2 How to fix the media firmly

- Load the roll media.
 C 3.4.2 Setting Roll Media
- 2. Lower the media loading lever.

Adjust the Media feed compensation value again.
 12 4.2.6.1 Procedure for the media feed compensation value

4.2.7 Installing Media holder plates

Variations in quality and use conditions can cause the edges of the media to curl, resulting in damage to the media by the print head surface.

To prevent this, use Media holder plates to reduce the amount of curling in the media.

Follow the procedure below to install Media holder plates.

- 1. Display the Side Margin menu on Operation panel.
 - a. Press the [Menu] key on Operation panel.
 - "Menu1: Setup>" is displayed on Operation panel.
 - Operation panel shifts to the Setup menu display.
 - b. Press the [>] key on Operation panel.
 - "Set1: User Type" is displayed on Operation panel.
 - c. Press the [+] key or [-] key to select Set3: Side Margin.

- d. Press the [Enter] key on Operation panel.
 - "Side Margin: ** mm" is displayed on Operation panel.
 - The display shifts to the Side Margin menu. 下記 Side Margin menu

- The current setting value is displayed in the "**" of the Side Margin menu.
- 2. Set up the margins (side margins) to 10 mm while printing.

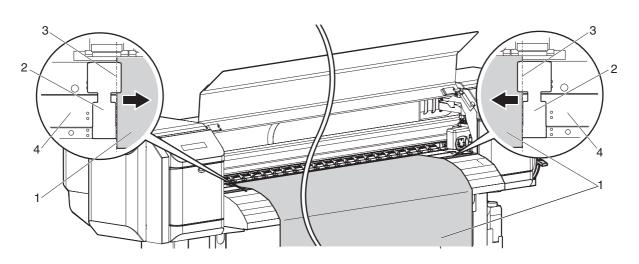

Set more than 10mm for the side margins. In this section, the side margins are set to 10mm as a sample.

- a. Press the [+] key or [-] key to select Side Margin: 10 mm.
- b. Press the [Enter] key on Operation panel.
 - After having saved the setting, "Set3: Side Margin" is displayed on Operation panel.
- c. Press the [Menu] key on Operation panel.
 - Operation panel returns to Normal.
- Load the roll media.
 T3.4.2 Setting Roll Media

4. Set Media holder plates by sliding them from both sides of Platen.

NOTE

• Do not use Media holder plates for the media whose thickness is 400 μm (0.4mm) or thicker. The media holder plate may interfere with Print head.

No.	Name
1	Roll media
2	Media holder plate
3	Media loading position
4	Platen

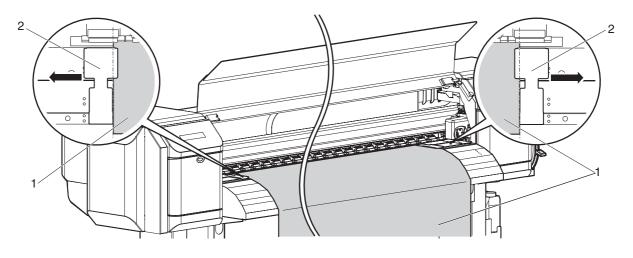

5. After installing Media holder plates, make sure that they do not interfere with media feeding.

- If the media jams when using Media holder plates, the plates may be deformed. When Media holder plates are deformed:
 - Do not remove the clogged media by force.
 - Stop using the printer.
 - Using the printer with deformed Media plates may damage Grid roller or Print heads. Contact your local MUTOH dealer.

NOTE

• •If there is interference with the media as it is fed through the printer after Media holder plates have been installed, Media holder plates should not be used.

6. If Media holder plates are not used, return the plates to their initial positions as shown in the following figure.

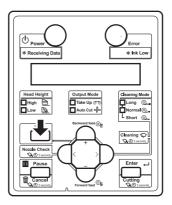

No.	Name
1	Roll media
2	Media holder plates

4.3 Menu setups on Operation panel

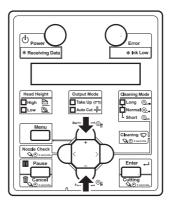

4.3.1 Menu setup procedure

Follow the procedure below to configure each setup menu.

- 1. Confirm that Operation panel is Normal.
- 2. Press the [Menu] key on Operation panel.

- "Menu1: Setup>" is displayed on Operation panel.
- 3. Press the [+] key or [-] key on Operation panel to select a setup item and press the [>] key.

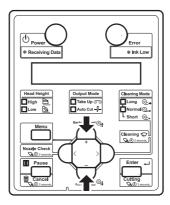

- The settings will be confirmed.
- When setup items have a submenu, the display shifts to the next menu.

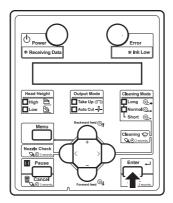

NOTE

- When a setup item has a submenu, ">" is displayed on the right end of LCD monitor of Operation panel.
- For the general outline of each setup item, refer to **4.3.2 Panel setup menu overview**.

4. The setting in the blinking part on LCD monitor of Operation panel can be changed. Press the [+] key or [-] key on Operation panel to change the setting.

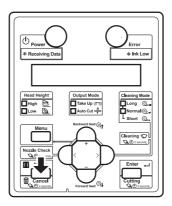

5. To save the changed setting, press the [Enter] key on Operation panel.

• The setting is saved and the next setup item is displayed.

NOTE

- If you press the [Cancel] key without pressing the [Enter] key after changing a setting, the changed setting will not be saved.
- 6. Press the [Cancel] key on Operation panel to exit from the setup.

• Return to the menu in the previous hierarchy.

4.3.2 Panel setup menu overview

This section explains the outline of each menu. There are the following items in the Panel setup menu.

Setup item	Description
Setup menu	Various settings of the printer are configured.
Test Print menu	Performs nozzle check of Print head and setup list.
Cleaning menu	Performs head cleaning.
Menu Option menu	Sets up the contents of the Setup menu.
Version menu	Displays the versions of the firmware.
Sleep Mode menu	Sleep mode settings are configured.
Display menu	Sets the language and unit displayed on LCD monitor of Operation panel.
Job status	Displays information about the previous printing result.

TIP

For details of each setup item, refer to **5** Panel setup menu.

4.4 Operating from Operation panel

This section explains various functions that can be operated from Operation panel.

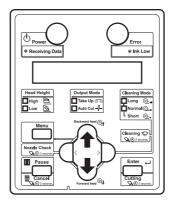

For names and functions of each key, refer to 2.2.3 Operation panel.

4.4.1 Feeding media

You can feed the roll media at a position that you want.

Follow the procedure below to feed media.

- 1. Confirm that Operation panel is Normal.
- 2. Check that Media loading lever is lowered.
- 3. Press the [Forward \downarrow] key or the [Backward \uparrow] key on Operation panel.

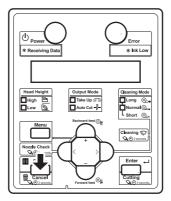

- The media is fed forward or backward.
- 4. Release the [Forward↓] key or the [Backward↑] key on Operation panel after feeding the media to the desired position.

4.4.2 Stopping printing operation

If you want to stop printing for some reason, operate as follows.

- 1. Stop sending printing data from the computer to the printer.
- 2. Press the [Cancel] key on Operation panel for more than 2 seconds.

• The printer operates as follows.

Printer status	Operation with the [Cancel] key pressed for two seconds
During printing	Terminates the printing, and deletes one data remaining in the printer.
Receiving data/analyzing data	Deletes the data already received and converted.

• If a large amount of data is saved on the printer, Operation panel may not return to Normal by a single [Cancel] key operation.

In such cases, wait for a few seconds and press the [Cancel] key again for more than 2 seconds.

4.4.3 Cutting media

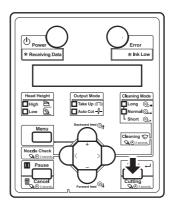

This section explains how to cut media.

If Media ejection mode is set to Auto Cut, the printer cuts the media automatically after printing. **5.1.6 Output Mode menu**

If you press the [Cutting] key on Operation panel more than two seconds while Operation panel is Normal, you can cut the media at the desired position.

Follow the procedure below to cut the roll media.

- 1. Confirm that Operation panel is Normal.
- 2. Press the [Cutting] key on Operation panel for more than 2 seconds.

• The printer feeds the roll media to the length of the margin and cuts the media.

NOTE

- When loading the new roll media, cut the front edge of the media if it is not straight.
- The cutter is a consumable component. Replace it periodically.
 18 6.1.4 Replacing Cutter
- When the the media detection is set to "Off", the media cannot be cut automatically. **137 5.1.4 Media Set menu**

4.4.4 Cutting media manually

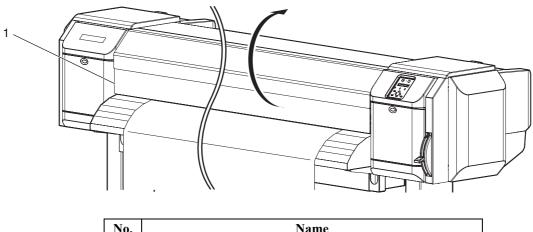

This section explains how to cut the roll media manually.

Since VJ-2638/1638 is equipped with Heaters, strictly comply with the following Cautions.

Follow the procedure below to cut the roll media.

- 1. Verify the following regarding the operational condition of the printer.
 - Printing or other operations are not in progress.
 - Operation panel display is Normal.
- 2. To change the position to cut the roll media, refer to **4.4.1** Feeding media and advance the roll media to the desired cut position.
- 3. Open Front cover.

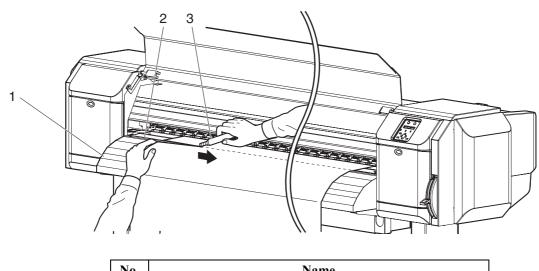

No.	Name
1	Front cover

4. Place a razor blade on Media cut groove on Media guide, and cut the roll media.

- Pay attention to the following points when cutting roll media. Mishandling Razor blade may cause a cut on your finger or hand.
 - When you hold media, do not place your finger on Media cut groove.
 - Move Razor blade slowly along Media cut groove.

No.	Name
1	Media guide
2	Media cut groove
3	Razor blade

• The procedure for cutting the roll media is complete.

NOTE

• When loading the new roll media, cut the front edge of the media if it is not straight.

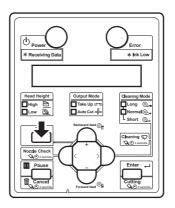

4.4.5 Changing and confirming settings while printing

While the printer is operating, you can change or confirm settings for the Panel setup menu.

4.4.5.1 Procedure for changing and confirming settings while printing

Follow the procedure below to change or confirm settings for the Panel setup menu.

- 1. Confirm that the printer is in one of the following conditions.
 - Receiving data
 - Analyzing data
 - Printing
- 2. Press the [Menu] key on Operation panel.

- The following will be displayed on Operation panel. VJ-2638/1638: Menu1: Temperature VJ-1638W: Menu1: PF Micro Adj.
- 3. Press the [+] key or [-] key to change or confirm settings.

NOTE

• For the setting items whose settings can be changed or confirmed, refer to **4.4.5.2** Settings that can be changed or confirmed while printing.

4.4.5.2 Settings that can be changed or confirmed while printing

NOTE

• When you change a setting during operation, be sure to select "Backup" to save the setting that you changed.

If the printer returns to Normal without "Backup" being selected, the changed setting is not saved.

- Check the following before using the Job status items
 - The values displayed in the Job status items are rough indications. They do not guarantee the strict accuracy.
 - If the length information is not included in the print data, "0" is displayed for all items.
 - You can check the "remaining print" and "remaining time" in the way described in 12 4.4.8 Normal Display while Printing.
 - To check the information about the printed data, refer to the following.

Setup item	Setting	Description	Reference
Temperature	Pre	Checks the current temperature of Pre-heater.	_
(VJ-2638/1638)	Platen	Checks the current temperature of Platen heater.	
	Dryer	Checks the current temperature of Dryer.	
Pre-heater (VJ-2638/1638)	Off / 30°C to 50°C	Changes the temperature of Pre-heater.	〔2 5.1.1.1.4 Pre-heater menu (VJ-2638/1638)
Platen heater (VJ-2638/1638)	Off / 30°C to 50°C	Changes the temperature of Platen heater.	江宮 5.1.1.1.5 Platen Heater menu (VJ-2638/ 1638)
Dryer (VJ-2638/1638)	Off / 30°C to 50°C	Changes the temperature of Dryer.	Lき 5.1.1.1.6 Dryer menu (VJ-2638/1638)
PF Adjust	-5.00% to 0.00% to 5.00%	Change the feed adjustment value.	〔2 5.1.1.1.3 Media feed compensation
Backup	-	• [Enter] key: Save the changed setting.	_
Job Statsus	ToDo Length	• Check the whole length of the data (media feed direction) currently being printed.	—
	Done	• Check the printed length of the data currently being printed.	
	Remain	• For the data currently being printed, check the length of the data that has not been printed.	
	Remain Time	• Displays the time remaining for printing.	
		• [Cancel] key: The printer returns to Normal.	

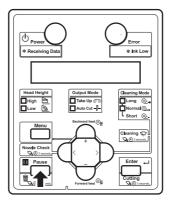

4.4.6 Pausing printing

It is possible to pause to print during printing.

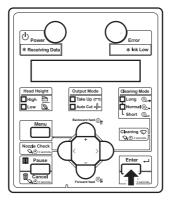

Follow the procedure below to pause or restart printing.

NOTE

- If the printing is paused, the print quality will not be guaranteed.
- 1. Check that the printer is in operating.
- 2. Press the [Pause] key on Operation panel.

- The printer pauses printing.
- "PrintRestart -> ENTER" is displayed on Operation panel.
- 3. To restart printing, press the [Enter] key on Operation panel.

• The printer restarts printing.

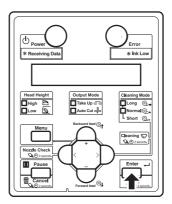

4.4.7 Starting printing during warming up (VJ-2638/1638)

You can start printing while the printer is warming up, even though the heater temperature has not reached the set temperature.

- Even when you start printing during warming up, warming up continues until the remperature reaches the set temperature.
- If you start printing during warming up, print quality will not be guaranteed.
- 1. Confirm that the printer is warming up.
 - "Warming Up" is displayed on Operation panel.
- 2. Print data will be sent.
 - "Warming Up" and "Skip ->E" is displayed on Operation panel.

- While "Warming Up" is displayed, do not touch Platen and Media guide. You could burn yourself.
- 3. To start printing during warming up, press the [Enter] key on Operation panel.

• The printer starts printing.

4.4.8 Normal Display while Printing

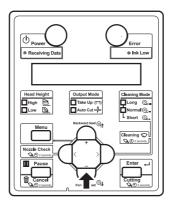

The remaining length and remaining time to complete the currently printing data can be displayed by an easy operation.

NOTE

- The values displayed in this function are just standard values, not guarantee the accuracy.
- If the print data includes no length data, all information will be displayed as "0".
- To check more detailed information of currently printing data, please refer to the below. 197 4.4.5.2 Settings that can be changed or confirmed while printing
- To check the information of printed data, please refer to the below.
 127 5.8 Job Status Menu

Follow the procedures below to display the information.

- 1. Check if the printer is printing a data.
- 2. Press [-] key on the operation panel to display [Print Remain].

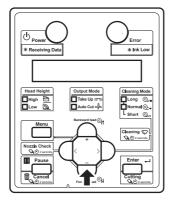

• The remaining length of data currently printing will be displayed.

```
TIP
```

- When the length display setting is set to inch, the length will be displayed in inch.
 175.7.3 Length menu
- The [+] key on the operation panel also can switch the display. In that case, [Remain Time] (Step 3) will be displayed first.

3. Press [-] key on the operation panel to display [Remain Time].

• The remaining length of data currently printing will be displayed.

Remain T	ime x	xxxmin
----------	-------	--------

4. To return the display to [Printing], press [-] key on the operation panel.

Printing

4.5 Using Spectrophotometer (VJ-2638/1638)

NOTE

• VJ-1638W cannot be equipped with Spectrophotometer (SPECTROVUE VM-10).

The optional spectrophotometer (SPECTROVUE VM-10) can be attached to print and measure the color target. Performing color calibration or profiling of the printer by using RIP software compatible with SPECTROVUE VM-10 enables printing with more accurate colors. For Software server RIP (option), contact MUTOH local dealer.

Follow the procedure below.

• When using VM-10, make sure to use the media whose thickness is less than 0.7mm. If you use the media thicker than 0.7mm, VM-10 and the media come into contact and VM-10 may ben damaged.

NOTE

- Do not install the printer in a place that is subject to strong light (sunlight, etc). Getting strong light on the color measurement may affect the measurement accuracy.
- To use Spectrophotometer (SPECTROVUE VM-10), the printer setting must be as follows. Make sure the setting before use.

Media detection: Top&Width or Width

Media ejection mode: Off or Auto Cut

Head height: Low or Mid

- When the color target is printed on the translucent or colored media, or the media with patterned indented surfaces, color measurement may not be accurate.
- Read the Operation Manual of Spectrophotometer (SPECTROVUE VM-10) as well.
- When measuring colors, make sure that the color target is dry. If it is not dry enough, the ink may adhere to the pressurizing rollers of the printer.
- Connect the printer and computer.
 Cerain Connecting the printer to PC
- 2. Turn the printer ON.
- Set the media.
 Image: Set the media.
 Image: Set the media.

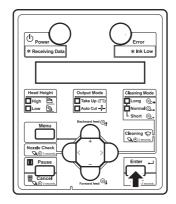

- 4. Set the user type setting.X3 3.4.3 Setting the User Type Setting
 - When the user type setting and media initial operation are complete, "Ready to Print" is displayed on Operation panel.
- 5. Start RIP software to print and measure the color target.

- For the setting and operations of the RIP software, refer to its operation manual.
 - The printer starts printing the color target.
 - "Printing" is displayed on Operation panel.
 - After printing is complete, "Attaching instrument [ENTER]" is displayed on Operation panel.

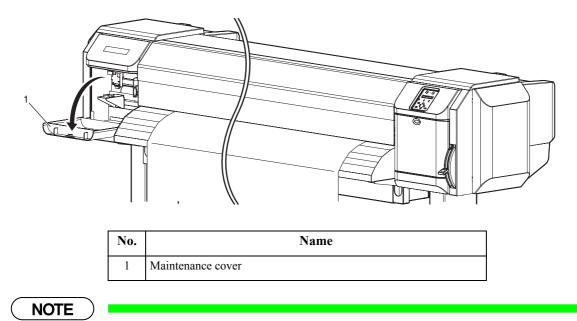

NOTE

- Do not open the covers or move media loading lever during printing.
- 6. Press the [Enter] key.

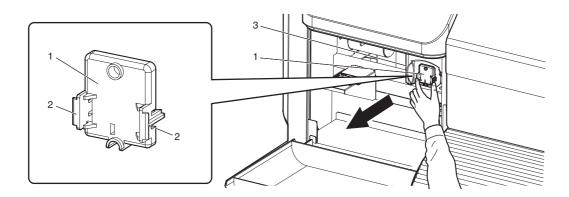

- "Wait for a while..." is displayed on Operation panel.
- Print head moves to the left.
- "Open left mainte. cover." is displayed on Operation panel.

- 7. Open Maintenance cover on the left of the printer.
 - "Remove connector cap and attach instrument. [ENTER]" is displayed on Operation panel.

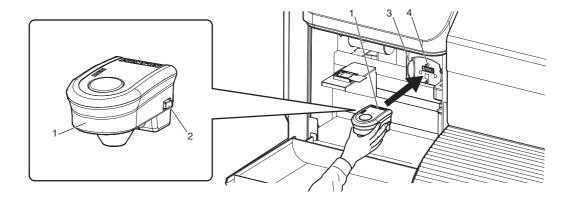

- When a certain time has passed without opening Maintenance cover, Print head returns toward the right side of the printer for protection. "Attaching instrument [ENTER]" is displayed. Restart from Step 6.
- 8. Firmly pinch the tabs on both sides of the connector cap with your fingers, pull the connector cap forward to remove it from Print head.

No.	Name
1	Connector cap
2	Tabs
3	Print head section

9. Press the release buttons on both sides of spectrophotometer (SPECTROVUE VM-10), install it to the connector of Print head.

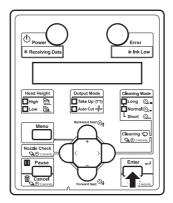

No.	Name

2	Release buttons	
3	Print head section	
4	Connector	

NOTE

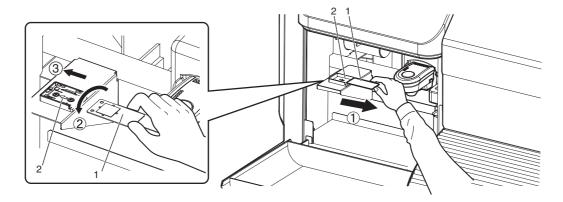

• Make sure that Spectrophotometer is NOT installed at an angle, and that there in no gap between the connector and Spectrophotometer.

10. Press the [Enter] key.

- "Wait for a while..." is displayed on Operation panel.
- The printer checks the connection between the printer and Spectrophotometer.
- "Set white plate, then close left maintenance cover." is displayed on Operation panel.

11. Remove the white reference plate from the plate installation place, turn it over so that the white side faces up, and install it back to the original place.

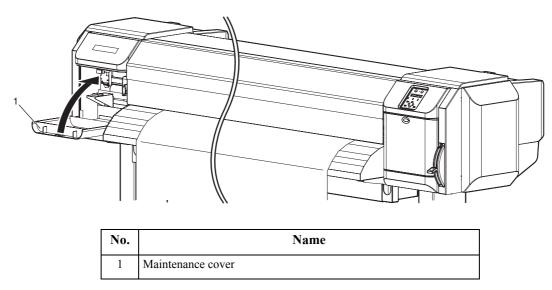

No.	Name
1	White reference plate
2	Plate installation place

NOTE

• Before measuring the color target, make sure that the white side of the white reference plate is facing up.

If the black side is facing up, it will not be measured accurately.

12. Close Maintenance cover.

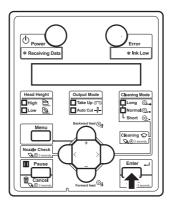

- Print head moves to the right.
- "Wait for a while..." is displayed on Operation panel.

- 13. When "Start measurement [ENTER]" is displayed on Operation panel, press the [Enter] key.
 - Spectrophotometer starts measuring the color target.
 - "Measuring..." is displayed on Operation panel.
 - After measuring is complete, "Detaching instrument [ENTER]" is displayed on Operation panel.

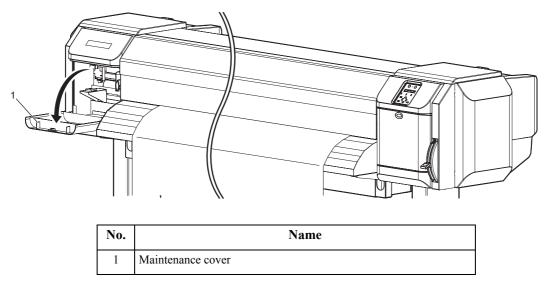

NOTE

- Color measurement starts either automatically or manually, depending on the RIP software feature. The steps above are for manual measurement.
- When the measurement starts automatically, "Ink Drying xxxxs" (xxxxx is a number) may be displayed on Operation panel.
- Do not open the covers or move media loading lever during measuring.
- 14. Press the [Enter] key.

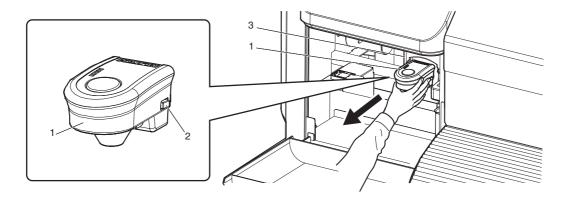

- "Wait for a while..." is displayed on Operation panel.
- Print head moves to the left.
- "Open left mainte. cover." is displayed on Operation panel.

- 15. Open Maintenance cover on the left of the printer.
 - Detach instrument and set connector cap. [ENTER] is displayed on Operation panel.

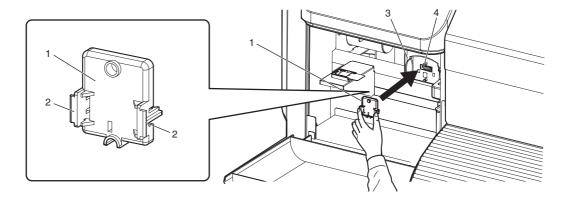

16. While pressing the release buttons on both sides of Spectrophotometer, pull it forward to remove it from Print head.

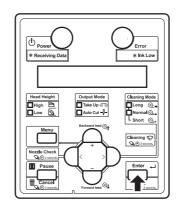

No.	Name

	Banner 4	
	_	 [Enter] key: saves the setting and shifts to the sub menu. 【晉 Effect menu [Cancel] key: cancels the setting and shifts to the previous menu. 【晉 5.1.1.1 User Type advanced setup menu

NOTE

- The printed images can be uneven depending on the media and print mode. In such cases, use the following mode to clear unevenness.
 - When using bidirectional print mode (refer to the following chart Details of print mode), switch it to unidirectional print mode.
 - When using Graphics 1 to 2, change it to Quality 1 to 4.
- When the selected print mode of the user type is Graphics 1 or Graphics 2, Palette menu is not displayed.

3.5.4 Palette print

Details of print mode

The set values of print quality that are registered in each print mode are as follows.

NOTE

- In the chart below, the print speed becomes faster as the condition is closer to the following cases.
 - Having fewer number of passes
 - Having lower resolution
 - Printing direction is bidirectional

In actual printing, the selected effect affects the printing speed.

Effect menu

Print Mode	Resolution	Pass	Direction
Quality 1	1440x 1440dpi	16 times	Uni (Uni-Direction)
Quality 2	1440x 1440dpi	16 times	Bi (Bi-Direction)
Quality 3	720 x 1440dpi	8 times	Uni (Uni-Direction)
Quality 4	720 x 1440dpi	8 times	Bi (Bi-Direction)
Graphics 1	720 x 1080dpi	6 times	Uni (Uni-Direction)
Graphics 2	720 x 1080dpi	6 times	Bi (Bi-Direction)
Banner 1	720 x 720dpi	4 times	Uni (Uni-Direction)
Banner 2	720 x 720dpi	4 times	Bi (Bi-Direction)
Banner 3	360 x 720dpi	2 times	Uni (Uni-Direction)
Banner 4	360 x 720dpi	2 times	Bi (Bi-Direction)

Effect menu

Sets up the Effect menu. Set up this menu when you want to improve print quality by adjusting the set print mode.

NOTE

• The print quality may not be improved depending on the printing condition.

Setup item	Setting	Description
Effect	<none> *1</none>	The Effect function is not used.
	Wave	The printing joint will be the wave form. The print quality may be improved than None.
	Fine&Fuzz	The printing joint will shade off as the wave form. Perform the printing at slower speed than "Wave".
	<fine&fog> *1</fine&fog>	The printing joint will shade off. Set this when there is horizontal unevenness in Fine&Fuzz Prints at a slower speed than Fine&Fuzz
	A-S.Fine&Wave	Performs "Wave" printing using the left side of the of Print head. Since only half of Print head nozzles are used, printing speed becomes a half of "Wave". Set up this menu to improve the print quality compared with "Fine&Fuzz". If used when one side of the nozzles are clogged, quality deterioration may be avoided.
	B-S.Fine&Wave	 Performs "Wave" printing using the right side of the of Print head. Since only half of Print head nozzles are used, printing speed becomes a half of "Wave". Set up this menu to improve the print quality compared with "Fine&Fuzz". If used when one side of the nozzles are clogged, quality deterioration may be avoided.
		 [Enter] key: saves the setting and shifts to the previous menu. [Cancel] key: cancels the setting and shifts to the previous menu. \$\mathcal{E}\$ 5.1.1.1.1 Print Mode menu

*1 The initial values of effect differ as shown below depending on the selected print mode.

Print Mode	Initial effect value
Quality 1 to 4	Fine&Fog
Graphics 1 to 2	Fine&Fog
Banner 1 to 2	Fine&Fog
Banner 3 to 4	None

5.1.1.1.2 Adjust Print menu

Sets up when adjusting the printer for the optimum quality of image print.

- This printer was adjusted at the factory shipment so that it obtains the optimum printing quality. Adjust the quality if the print quality changes after the installation environment or the media is changed.
- When newly setting or changing the user type setting after adjusting Standard adjust print, make sure to adjust print.
- Since all print modes are adjusted at once after performing Custom adjust print, adjust print is not required even after changing the print mode..
- When specifying a print mode which is different from the mode set in the user type setting, adjust all print modes in the Custom adjust print first.

Setup item	Setting	Description
Adjust Print	Standard	Adjusts only the print mode in the user type setting which is currently set. Image: Comparison of the setting which is currently set. Image: Comparison of the setting which is currently set.
	Custom	Perform adjustment for all print modes.
	_	 [Cancel] key: shifts to the previous menu. Image: Solution of the previous menu.

Standard Adjust Print menu

Adjusts only the print mode in the user type setting which is currently set.

Setup item	Setting	Description
Adjustment	Confirmation pattern	Print the test pattern for the alignment. Check before adjusting. IP 3.6.1.1 Standard confirmation pattern
	Rough adjustment pattern	Perform this when the degree of misalignment is big. Print Adjust pattern and enter the set value. IP 3.6.1.2 Standard rough adjustment pattern

	_	 [Enter] key: saves the setting and shifts to the previous menu. [Cancel] key: cancels the setting and shifts to the previous menu. \$\text{iff}\$ 5.1.1.1 User Type advanced setup menu

5.1.1.1.6 Dryer menu (VJ-2638/1638)

Sets the temperature of Dryer. Set to dry the print side after printing.

NOTE

- This function is not displayed for VJ-1638W.
- The set temperature of Dryer differs depending on the media.

Setup item	Setting	Description
Dryer	Off / <30°C> to 50°C	Sets the temperature of Dryer.
		1.Roll media 2.Dryer 3.Print head
	_	 [Enter] key: saves the setting and shifts to the previous menu. [Cancel] key: cancels the setting and shifts to the previous menu. [37 5.1.1.1 User Type advanced setup menu

5.1.1.1.7 Vacuum Fan menu

Sets up vacuum fan operation.

Setup item	Setting	Description
Vacuum Fan	Low	Set this if there is a possibility of paper jamming from media feed failure when the setting is Middle.
	Middle	Set this if there is a possibility of paper jamming from media feed failure when the setting is High.
	<high></high>	Set when using general media.
	_	 [Enter] key: saves the setting and shifts to the previous menu. [Cancel] key: cancels the setting and shifts to the previous menu. \$\mathcal{E}^{2}\$ 5.1.1.1 User Type advanced setup menu

5.1.2 Spitting menu

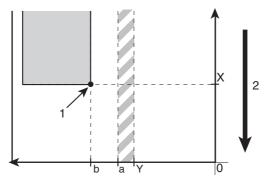

Sets up the spitting operation while printing.

NOTE

- When Spitting is set to "Off", Nozzles will become easily clogged because spitting is not performed. In such a case, print quality cannot be guaranteed.
- When the spitting setting is "On Media", the maximum printable media width becomes 16mm shorter.

Therefore, the side margins become the value that you have set in Side Margin menu +8mm.

• The right side margin will be the following sum depending on the setting. Y of Origin menu + 8mm (when the spitting is set to On Media) + Value set in Side Margin menu.

- 1. Print starting position
- 2. Media feed direction

X (media feeding distance)

- Y (print head transferring distance)
- a (0mm/8mm: Spitting setting is ON, Off/On Media)
- b (5mm to 25mm: Side margin setting)

 Image: Second state
 Second state

Side Margin	<5mm> to 25mm	Set the side margins.
		 [Enter] key: saves the setting and shifts to the previous menu. [Cancel] key: cancels the setting and shifts to the previous menu. 〔百 5.1 Setup menu

5.1.4 Media Set menu

Sets whether to detect the media width and edge while initializing the media.

• When Media Detection menu is set to "Off", set the media width of the current media in Media Width menu.

13 5.1.5 Media Width menu

• When the media detection is set to "Off", the media cannot be cut automatically.

Setup item	Setting	Description
Init.	Off	The media will not be detected.
	Top&Width	Detect the media width and edge while initializing the media.
	<width></width>	Detect the media width while initializing the media.
	_	 [Enter] key: saves the setting and shifts to the previous menu. [Cancel] key: cancels the setting and shifts to the previous menu. X 5.1 Setup menu

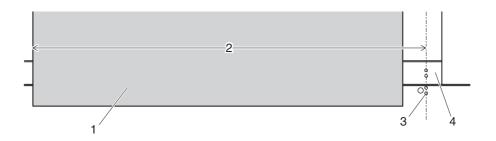

5.1.5 Media Width menu

Specifies the media width between the loading mark and the left end of the media if media detection is not performed during media initialization.

(1) Media Width menu

Displays the detected media width if media detection is performed during media initialization. 12 (2) Media Width display menu

For media detection settings, refer to the following.

No.	Name	
1	Roll media	
2	Media width (when not using media detection)	
3	Media loading mark	
4	Platen	

NOTE

• When the media is loaded as shown in the illustration and not using media detection, the printer may print on between the right edge of Platen and center of the media. If this happens, adjust the print starting position in Origin menu.

13 5.1.7.1 Cut Pressure menu

(1) Media Width menu

NOTE

•Setting a larger value than the media width set in the Media Width menu may cause ink to leak on the media or printer.

Setup item	Setting	Description
MediaWidth	210mm to <1000mm> to 1,625mm	Set the media width.
	_	 [Enter] key: saves the setting and shifts to the previous menu. [Cancel] key: cancels the setting and shifts to the previous menu. 137 5.1.1.1 User Type advanced setup menu

(2) Media Width display menu

Setup item	Setting	Description
MediaWidth	**** mm	Display the media width that is detected while initializing.
	_	 [Cancel] key: shifts to the previous menu. 137 5.1 Setup menu

5.1.6 Output Mode menu

Sets the media ejection method after printing.

NOTE

- When the take-up unit is not installed, do not set Output mode to "Take-up". By doing so, the product will be unable to function properly.
- When the Output Mode menu is set to "Take-up", the setting for the Prev. Stick menu is disabled.
 127 5.1.9 Prev. Stick menu (VJ-2638/1638)

Setup item	Setting	Description
Output mode	<off></off>	Set when not cutting the media automatically after printing. (Set it to Off even when cutting the media manually.))
	Take-up	Set when using the take-up unit. (The media will not be cut after printing.))
	Auto cut	Set when cutting the media automatically. 【 了 5.1.7 Method of Cut menu
	_	 [Enter] key: saves the setting and shifts to the sub menu. [3] 5.1.6.1 Ink Dry Time menu [Cancel] key: cancels the setting and shifts to the previous menu. [3] 5.1 Setup menu

5.1.6.1 Ink Dry Time menu

Set the ink drying time.

Setup item	Setting	Description
Ink dry time	<0sec> to 60min	Set the ink drying time.
		 [Enter] key: saves the setting and shifts to the previous menu. [Cancel] key: cancels the setting and shifts to the previous menu. X 5.1.6 Output Mode menu

5.1.7 Method of Cut menu

Sets the media cutting operation after printing.

NOTE

- When the media detection is set to "Off", the media cannot be cut automatically.
- Some media may not be cut (cannot be cut at all or cannot be cut finely). In such a case, set the "Output Mode menu" to "Off" and cut the media manually.

にすう.1.6 Output Mode menu にすう.4.4 Cutting media manually

• The cutting direction is different depending on the firmware version.

Setup item	Setting	Description
Method of Cut	SingleCut - 2 steps	Cuts at a shorter process than SingleCut-3 steps method. Suitable for media with a narrow width.
	<singlecut -="" 3="" steps=""></singlecut>	Normal cutting method
	DoubleCut - 2 steps	Set when the media is not cut with SingleCut-2 steps method. Suitable for media with a narrow width.
	DoubleCut - 3 steps	Set when the media is not cut with SingleCut-3 steps method
	_	 [Enter] key: saves the setting and shifts to the next menu. 〔百 5.1.7.1 Cut Pressure menu [Cancel] key: cancels the setting and shifts to the previous menu. 〔百 5.1 Setup menu

5.1.7.1 Cut Pressure menu

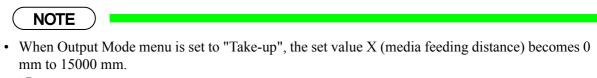

Sets the media cutting pressure for the cutting operation.

Setup item	Setting	Description
Cut Pressure	Low	Cut the media at low pressure. Suitable for thin media or if the "High" pressure setting is too strong.
	<high></high>	Normal cutting pressure
	-	[Enter] key: saves the setting and return to the previous menu.
		[Cancel] Key: Cancel the set value, and return to the previous menu. 〔宮 5.1.7 Method of Cut menu

5.1.8 Origin menu

Sets the beginning of printing (origin) of the print data.

Set the menu when reprinting on the margin with changing the printing data position to the printed media.

13 5.1.6 Output Mode menu

• Depending on the set value of the side margin, the maximum set value of Y (print head transferring distance) decreases.

13 5.1.3 Side Margin menu

Setup item	Setting	Description	
Origin	 X (media feeding distance): -15000 mm to 15000 mm Y (print head transferring distance): 0mm to 1,405mm 	 Change Print head position and media feeding distance with the following keys. [+] key: increases the setting value. [-] key: decreases the setting value. 	
		$\begin{bmatrix} 1 \\ 1 \\ b \\ a \\ Y \end{bmatrix} = \begin{bmatrix} 2 \\ 0 \\ 0 \end{bmatrix}$	
		 Print starting position Media feed direction Setting position of "Origin" 	
		X (media feeding distance) Y (print head transferring distance) a (0mm/8mm: Spitting setting is ON, Off/On Media) b (5mm to 25mm: Side margin setting)	
		 NOTE The right side margin will be the following sum depending on the setting. Y of Origin menu + 8mm (when the spitting is set to On Media) + Value set in Side Margin menu. IF 5.1.2 Spitting menu IF 5.1.3 Side Margin menu 	
		 [Enter] key: "Moving Origin Pos." is displayed on Operation panel and Print head moves to the starting position. The following content is displayed on Operation panel. 	
	Confirm Position -> Enter	 [Enter] key or after a certain period of time: Determines the setting. Print head returns to the original position. Save the setting and shift to the previous menu. CF 5.1 Setup menu 	
		 [Cancel] key: cancels the setting and shifts to the previous menu. 125.1 Setup menu 	

5.1.9 Prev. Stick menu (VJ-2638/1638)

Sets up to prevent media from sticking when printing starts.

NOTE

- This function is not displayed for VJ-1638W.
- When the Output Mode menu is set to "Take-up", the setting for the Prev. Stick menu is disabled. **T 5.1.6** Output Mode menu

Setup item	Setting	Description
Prev. Stick	<off></off>	The stick-prevent operation is not performed.
	On	The stick-prevent operation is performed. Feed the media back and forth to prevent from sticking.
	_	 [Enter] key: saves the setting and shifts to the previous menu. [Cancel] key: cancels the setting and shifts to the previous menu. 〔百 5.1 Setup menu

5.1.10 Standby Heating menu (VJ-2638/1638)

Sets the time to preheat Heater while the printer is in the standby mode.

NOTE

• This function is not displayed for VJ-1638W.

Setup item	Setting	Description
Standby Heating	10 minutes - <60 minutes>	Sets the time to pre-heat Heater. When the preset time has passed, each Heater turns Off.
	_	 [Enter] key: saves the setting and shifts to the previous menu. [Cancel] key: cancels the setting and shifts to the previous menu. CF 5.1.1.1 User Type advanced setup menu

5.1.11 Head Travel menu

Setup item	Setting	Description
CR Movement	Data	Print head moves the range of the print data width. The printing speed will be improved since the moving range of Print head is optimized.
	Machine	Print head moves from origin to the maximum printable media width.
	<mediawidth></mediawidth>	Print head shifts within the media width.
		 [Enter] key: saves the setting and shifts to the previous menu. [Cancel] key: cancels the setting and shifts to the previous menu. 17 5.1 Setup menu

Sets up the range that Print head moves while printing.

- The minimum value for the shift width of Print head is 900mm.
- Note that when the printer is set as "Media width" or "Data width", the shift width of Print head does not become below 900mm, even though the width of the loaded media is below 900mm.

5.1.12 Multi Strike menu

Sets up the overwrite count per line.

Setup item	Setting	Description
Multi Strike	<1 time> to 9 times	Set the overwrite count.
		 [Enter] key: saves the setting and shifts to the previous menu. [Cancel] key: cancels the setting and shifts to the previous menu. 127 5.1 Setup menu

5.1.13 Strike Wait menu

Sets up the waiting time while overwrite printing.

NOTE

• When using the media with a narrow width, the media cannot be warmed up adequately, therefore the print quality may not be preserved.

In such a case, set up the Strike Wait time while overwrite printing to warm up the media adequately before printing.

Setup item	Setting	Description
Strike Wait	<0.0 sec.> to 0.1 sec. to 5.0 sec.	Sets the overwrite wait time.
	_	 [Enter] key: saves the setting and shifts to the previous menu. [Cancel] key: cancels the setting and shifts to the previous menu. 127 5.1 Setup menu

Sets the gateway.

NOTE

• Be sure to set the gateway after consulting the network administrator.

Setup item	Setting	Description
Gateway	0.0.0.0 to <192.168.1.254> to 255.255.255.255	 Change the gateway by operating the following keys. [+] key: increases the setting value. [-] key: decreases the setting value. [Enter] key: changes the setting for the next segment. Save the set values in the 4th segment and returns to the previous menu.
	_	 [Cancel] key: cancels the setting and shifts to the previous menu. Comparison 5.1 Setup menu

5.1.26 Header Dump menu

This function is to specify whether to print the following information (dump data) of print data.

- Data Header
- Number of Dot in Data (Printed only when the header dump setting is "On".)
- Printer Serial Number
- Firmware Version

NOTE

• The dump data will be used as a reference material to receive technical supports.

• When a print is executed in connection with computer, the setting of RIP software will be printed in the "Data Header".

Setup Item	Set Value	Description
Header Dump	<off></off>	Only a print data will be printed.Damp data will not be printed.
	On	After printing of print data, the dump data will be printed.
	Dump	 Only a dump data will be printed, but the "Number of Dot in Data" will not be printed. Print data will not be printed.
	_	 [Cancel] Key: Save the set value, and return to the previous menu. 12 5.1 Setup menu

5.1.27 Single Head menu

You can set whether or not to perform printing using only one Print head.

NOTE

- This printer has 2 Print heads inside Print head unit.
- Even if "Head 1" or "Head 2" is set, when performing the Test print menu, the both Print heads are used for printing.
- When "Head 1" or "Head 2" is set, if "A-S. Fine&Wave" or "B-S.Fine&Wave" is selected, the selected Print head is further divided for printing.

Setup Item	Set Value	Description
Single head	<off></off>	Both Print heads are used for printing.
	Head1	Only left Print head is used for printing
	Head2	Only right Print head is used for printing.
	_	 [Cancel] key: cancels the setting value and shifts to the previous menu. CF 5.1 Setup menu

5.1.28 Heater Control menu

This function is to specify the heater control modes depending on the usages.

5.1.28.1 VJ-1638

Paper cocklings may occur during printing when heated. This can be minimized by selecting an appropriate setting as follows.

Setup Item	Set Value	Description
Heater Ctrl	<normal></normal>	Default setting. Select Normal if paper cocklings do not occur.
	Fixer	Select Fixer to reduce waiting times before printing and paper cocklings.
	Dryer	Select Dryer to keep the drying performance after printing when using a Heavy-Duty Take-up Unit and minimize paper cocklings.
	_	 [Enter] key: saves the setting and shifts to the selected menu. [Cancel] key: cancels the setting value and shifts to the previous menu. X 5.1 Setup menu

5.1.28.2 VJ-2638

This function is to specify the heater control modes depending on the current capacity.

By using an appropriate setting, it can also minimize paper cocklings caused by heating system during printing.

NOTE

- When inserting power cords set into the power sockets, the following current capacity is required for VJ-2638. If you cannot ensure the capacity, insert Power cord sets separately into different power sockets.
 - When "Heater Ctrl" is "EcoMode", "Eco/Fixer" or "Eco/Dryer" : 26A
 - When "Heater Ctrl" is "Powerful", "Pow/Fixer" or "Pow/Dryer" : 30A

Setup Item	Set Value	Description
Heater Ctrl	<ecomode></ecomode>	The heater temperature gradually increases. It requires less current capacity than the Powerful mode. Select EcoMode when the place does not have large current capacity and paper cocklings do not occur.
	Powerful	The heater works at full power. The temperature increases faster than the EcoMode. Select Powerful when the place has a sufficient current capacity and paper cocklings do not occur.
	Eco/Fixer	It requires the same current capacity as the EcoMode. Select Eco/Fixer to reduce waiting times before printing and paper cocklings.
	Pow/Fixer	It requires the same current capacity as the Powerful mode. Select Pow/Fixer to reduce waiting times before printing and paper cocklings.
	Eco/Dryer	It requires the same current capacity as the EcoMode. Select Eco/Dryer to keep the drying performance after printing when using a Heavy-Duty Take-up Unit and minimize paper cocklings.
	Pow/Dryer	It requires the same current capacity as the Powerful mode. Select Pow/Dryer to keep the drying performance after printing when using a Heavy-Duty Take-up Unit and minimize paper cocklings.
	_	 [Enter] key: saves the setting and shifts to the selected menu. [Cancel] key: cancels the setting value and shifts to the previous menu. \$\tilde{E}\$ 5.1 Setup menu

5.2 Test Print Menu

Performs nozzle check of Print head and setup list.

TIP

Refer to the following for the operation procedure of test print. **次智 3.5 Test print**

Setup Item	Description		
Nozzle Check	Perform the nozzle check printing. It is used to check whether there are any clogged heads, or missing/blurred prints.		
Mode Print	 Mode print can be performed. Used to confirm the following printing conditions. Print quality Effect Pre-heater temperature (VJ-2638/1638) Platen heater temperature (VJ-2638/1638) Dryer temperature (VJ-2638/1638) Media feed compensation micro adjustment value Image 3.5.2 Mode print 		
Setup List	Setup list printing is performed. Used to check the setup item and the user type. IP 3.5.3 Setup print		
Palette	 Palette printing is performed as a color demonstration. NOTE When the selected print mode of the user type is Graphics 1 or Graphics 2, Palette menu is not displayed. 		
Color Verify (VJ-2638/1638 only)	Print the color patches, then measure the color using the optional spectrophotometer(SPECTROVUE VM-10). Compare the currently printed color with the previously printedcolor to check the color difference.Image: State St		
_	 [Enter] key: "Printing" is displayed on Operation panel and test printing starts. [Cancel] key: shifts to the previous menu. X 5 Panel setup menu 		

5.3 Cleaning menu

Performs head cleaning.

TIP

Head cleaning can be operated when the printer is Normal. Refer to the following for operation procedures.

NOTE

• If the head height is set to High, "Change Head Gap Low" is displayed on Operation panel. Set the head height to Low.

12 4.2.5.3 When setting the head height to Low

Setup item	Description		
Short	 Discharges smaller amount of ink compared to "Normal". [Enter] key: "Cleaning **%" is displayed on Operation panel and head cleaning starts. Progress on the Head cleaning is displayed in % on Operation panel. 		
Normal	 Select this mode normally. [Enter] key: "Cleaning **%" is displayed on Operation panel and head cleaning starts. Progress on the Head cleaning is displayed in % on Operation panel. 		
Long	 Discharges larger amount of ink compare to "Normal". Used when Print head does not improve by normal head cleaning. [Enter] key: "Cleaning **%" is displayed on Operation panel and head cleaning starts. Progress on the Head cleaning is displayed in % on Operation panel. 		
Little Charge	 Refills a small amount of ink. Charge a small amount of ink when printing is not stable after ink replenishment. IT 3.3 Filling ink [Enter] key: "Ink Refill **%" is displayed on Operation panel and ink replenishment starts. Progress on the ink replenishment is displayed in % on Operation panel. 		
Initial ink charge	 Performs the intial ink charge. Even when using the printer whose ink has already been filled, when you use High-capacity ink pack adapter for the first time, perform this initial ink charge. Image: Image: Image:		
_	• [Cancel] key: shifts to the previous menu. 文字 5 Panel setup menu

	Start	Activate Sleep Mode
	_	 [Cancel] key: shifts to the previous menu. CF 5.1 Setup menu

5.6.1 Timer Setting menu

Set the head cleaning interval of this printer for Sleep Mode. When more than the set time has passed, Print head is cleaned automatically.

NOTE

- During Sleep Mode, even if the set amount of time has passed, print-head cleaning is not performed under the following circumstances.
 - Front cover is open.
 - Maintenance cover is open.
 - Media loading lever is raised.
 - The head height is set to High.
 - Waste fluid tank is full.
 - Ink cartridge is empty.
 - Ink cartridge has been removed.
 - An ink cartridge other than genuine Ink cartridges is inserted into Cartridge slot, etc.

When the printer returns to a normal state, head cleaning is restarted, and Sleep Mode continues.

 If one of the above conditions occurs during head cleaning, cleaning is stopped. When the printer returns to a normal state, head cleaning is restarted.

6 Maintenance

This chapter describes daily maintenance of the printer.

6.1 Replacing consumable components

This section describes when and how to replace Ink cartridges (or ink packs), roll media and Flushingbox sponges.

6.1.1 Replacing Ink cartridges

This section describes when to replace Ink cartridges.

(1) Replacement time

- a. When "[******] Ink Low" is displayed on Operation panel
 - This message is displayed when there is a small amount of ink remaining in Ink cartridge.
 - The alarm buzzer sounds. To stop the buzzer, press the [Enter] key on Operation panel.
 - Replace with the new Ink cartridge.
- b. When "[******] Ink End" is displayed on Operation panel
 - This message is displayed when there is no ink remaining in Ink cartridge.
 - The alarm buzzer sounds. To stop the buzzer, press the [Enter] key on Operation panel.
 - Immediately replace it with the new Ink cartridge.

NOTE

- [******] in the messages for ink cartridge replacement indicates the color that is almost empty or runs out, using the following characters.
 - K: Black (Slot K1)
 - k: Black (Slot K2)
 - C: Cyan (Slot C1)
 - C: Cyan (Slot C2)
 - M: Magenta (Slot M1)
 - m: Magenta (Slot M2)
 - Y: Yellow (Slot Y1)
 - y: Yellow (Slot Y2)
- When all of the ink is consumed, [ALL] Ink End is displayed.
- Do not insert or remove Ink cartridge except at the time of replacement. Inserting or removing Ink cartridge mixes air into Ink tube, and failures such as nozzle clogging trouble may occur.
- If "Ink End" is displayed, you cannot print until inserting the new Ink cartridge.
- If there is no Ink cartridge for replacement at hand, leave the empty Ink cartridge inserted in the printer.

Leaving the printer with Ink cartridge removed may result in clogging of Print head.

(2) Type

Our genuine Ink cartridges and Ink packs that are compatible with the printer are as follows. <For VJ-2638/1638>

Description	Model No.
Ink cartridge K (Black: 220 ml)	VJ-MSINK3A-BK220
Ink cartridge K (Black: 440ml)	VJ-MSINK3A-BK440
Ink cartridge K (Black: 1,000ml)	VJ-MSINK3A-BK1000
Ink cartridge C (Cyan: 220 ml)	VJ-MSINK3A-CY220
Ink cartridge C (Cyan: 440ml)	VJ-MSINK3A-CY440
Ink cartridge C (Cyan: 1,000ml)	VJ-MSINK3A-CY1000
Ink cartridge M (Magenta: 220 ml)	VJ-MSINK3A-MA220
Ink cartridge M (Magenta: 440ml)	VJ-MSINK3A-MA440
Ink cartridge M (Magenta: 1,000ml)	VJ-MSINK3A-MA1000
Ink cartridge Y (Yellow: 220 ml)	VJ-MSINK3A-YE220
Ink cartridge Y (Yellow: 440ml)	VJ-MSINK3A-YE440
Ink cartridge Y (Yellow: 1,000ml)	VJ-MSINK3A-YE1000

<For VJ-1638W>

Description	Model No.
Ink cartridge K (Black: 220 ml)	RJ-FGINK-BK2
Ink cartridge C (Cyan: 220 ml)	RJ-FGINK-CY2
Ink cartridge M (Magenta: 220 ml)	RJ-FGINK-MA2
Ink cartridge Y (Yellow: 220 ml)	RJ-FGINK-YE2

NOTE

- To use 1000ml Ink packs, High-capacity ink pack adapter (option) is required. For details on High-capacity ink pack adapter, contact your local MUTOH dealer.
- Use genuine Ink cartridges for replacement. This printer is designed to use genuine Ink cartridges and Ink packs. If you use an ink bag that is not a product of the original manufacturer,
 - Printing might become blurred, or the end of the ink in the pack might not be detected correctly.
 - Any problems caused by using an ink bag other than those recommended above will not be covered by the warranty, and repair expenses will be paid by the customer.

(3) Replacing steps

Follow the procedure below to replace Ink cartridges and High-capacity ink pack adapters.

- Before operation, make sure to read the Material Safety Data Sheet (MSDS).
- When handling Ink cartridges or Ink packs, pay attention so that ink does not come into contact with your eyes or skin.
 If ink gets into your eyes or sticks to your skin, immediately wash it off with water.
 Failing to do so might cause irritation or light inflammation of eyes.
 In case of any abnormality, consult a physician immediately.
- Do not disassemble lnk cartridges or lnk packs. If disassembled, ink might come into contact with your eyes or skin.

NOTE

- Do not use the Ink cartrdge(s) you have inserted into Ink cartridge slot(s) for other printers. The Ink cartridge(s) will not be used again.
- Do not shake Ink cartridges or Ink packs strongly. Doing so may cause ink leakage.
- Do not disassemble Ink cartridges. A disassembled Ink cartridge or Ink packs cannot be used.
- When the Ink cartridge or Ink pack is moved from a cold place to a warm place, leave it for 3 hours or more in the new printing environment before printing.
- Do not refill an ink cartridge or ink pack with ink. It may result in abnormal printing.
- Insert or remove Ink cartridge and High-capacity ink pack adapter at the time of replacement only. Otherwise, it may result in incorrect printing.

(1) Replacing 220ml and 440ml lnk cartridges

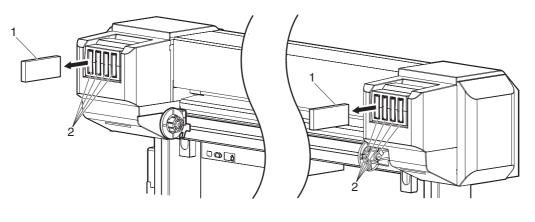

440ml Ink cartridges are not compatible with VJ-1638W.

1. Confirm that the printer is turned ON.

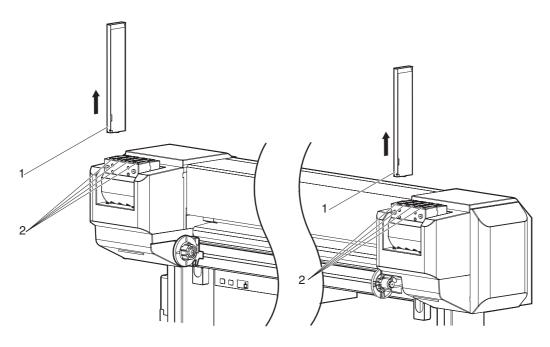

• Do not replace Ink cartridges when the printer is turned OFF. The remaining ink may not be detected correctly, causing abnormal printing.

- 2. Remove Ink cartridge that you want to replace from Slot.
 - a. For 220ml Ink cartridges

No.	Name
1	Ink cartridge
2	Ink cartridge slots

b. b.For 440ml Ink cartridges

No.	Name
1	Ink cartridge
2	Ink cartridge slots

3. Take out the new Ink cartridge from the bag.

- Open the bag just before attaching Ink cartridge to Ink cartridge slot. Leaving Ink cartridge with the bag open for a long time may result in abnormal printing.
- Do not insert or remove Ink cartridge more than 10 times. If the ink cartridge has been removed/inserted more than 10 times, it cannot be used even though ink remains.
- 4. Shake new Ink cartridge two to three times gently before inserting it into Ink cartridge slot.
- 5. Confirm that Operation panel returns to Normal.

- If Ink cartridge is replaced during printing, printing resumes.
 - Ink cartridge replacement is complete.

(2) Replacing High-capacity ink pack adapter (option)

High-capacity ink pack adapters are not compatible with VJ-1638W.

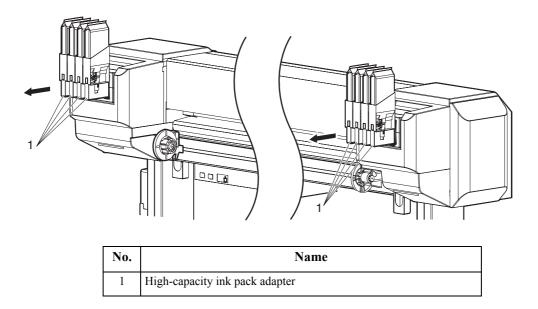

1. Confirm that the printer is turned ON.

• Do not replace High-capacity ink pack adapters when the printer is turned OFF. The remaining ink may not be detected correctly, causing abnormal printing. 2. Remove High-capacity ink pack adapter that you want to replace from Ink cartridge slot.

NOTE

• Put the used Ink packs in a plastic bag, etc, and dispose of it in compliance with local ordinance and instructions of local authorities.

NOTE

- Do not remove only Ink pack while High-capacity ink pack adapter is installed on the printer. The information of the remaining IC chip card will be rewritten and Ink pack will not be usable.
- 3. Take out the new Ink pack from the bag.

NOTE

- Open the bag just before attaching Ink pack to High-capacity ink pack adapter. Leaving Ink pack with the bag open for a long time may result in abnormal printing.
- Do not insert or remove High capacity pack adapter more than 6 times. If High-capacity ink pack adapter is inserted/removed more than 6 times, Connector rubber will require replacement.

4. Install Ink pack and IC chip card to High-capacity ink pack adapter.

NOTE

- To install/remove Ink pack or IC chip to/from High-capacity ink pack adapter, refer to the operation manual included with High-capacity ink pack adapter.
- 5. Shake the High-capacity ink pack adapter gently 2 to 3 times and insert it into Ink cartridge slot.

NOTE

- Make sure that Ink pack and IC chip are installed on High-capacity ink pack adapter before inserting it into Ink cartridge slot. If High-capacity ink pack adapter is inserted into Ink cartridge slot without Ink pack, the remaining information will be rewritten and the Ink pack will not be usable.
 - Insert High-capacity ink pack adapters all the way in Ink cartridge slots.
- 6. Confirm that Operation panel returns to Normal.

NOTE

- Printing resumes when High-capacity ink pack adapter is replaced during printing.
 - High-capacity ink pack adapter replacement is complete.

- In the following cases, make sure to perform the initial ink charge from the Cleaning menu after installing High-capacity ink pack adapter.
 - When installing High-capacity ink pack adapter for the first time on the printer whose ink is filled
 - · After using High-capacity ink pack adapters and replacing them with new ones
 - If the printer is used without the initial ink charge, the air inside High-capacity pack adapter goes into Ink Tubes, which may cause nozzle clogging.
 127 5.3 Cleaning menu

6.1.2 Replacing Roll Media

This section describes when and how to replace the roll media.

(1) Replacement time

Replace the roll media when the following situation occurs.

- a. When the roll media loaded in the printer runs out
 - "End Of Roll" is displayed on Operation panel.
 - If media runs out during printing, the printer stops printing.
- b. When you want to change the media type to use

(2) Type

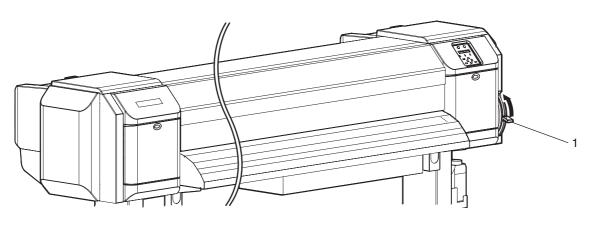

For types and details of the roll media, refer to 8.3 Options/Supply list.

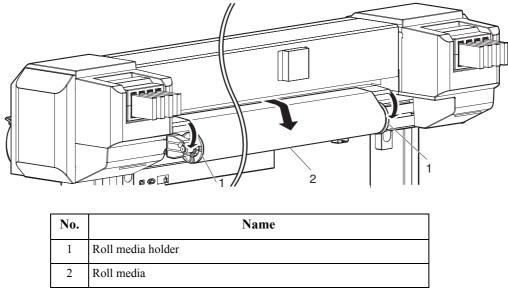

(3) Replacing steps

Follow the procedure below to replace the roll media.

- 1. If the printer is turned ON, confirm that operation such as printing is not in progress.
- 2. Raise Media loading lever.

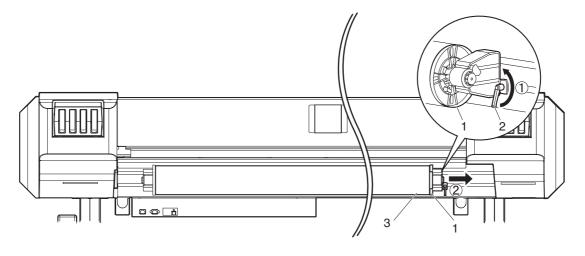

No.	Name
1	Media loading lever

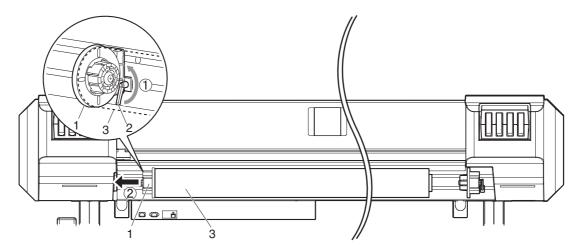

3. Turn Flanges of Roll media holder and take up the roll media.

4. Loosen Fixing lever of Right roll media holder and remove the roll media from Roll media holder.

No.	Name
1	Roll media holder (Right)
2	Fixing lever
3	Roll media

5. Take the same procedure as in Step 4, remove the roll media from Roll media holder (left).

No.	Name
1	Roll media holder (Left)
2	Fixing lever
3	Roll media

6. To load another roll media, refer to the following.

For loading the roll media, refer to **3.4 Loading media**.

For storing the roll media not in use, refer to **4.2.3** Precaution on storing media.

• The procedure for replacing the roll media is complete.

6.1.3 Replacing Flushing box sponges

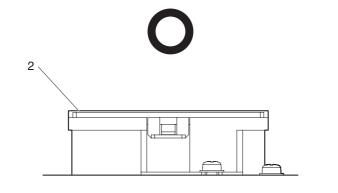

This section explains how to replace Flushing-box sponges.

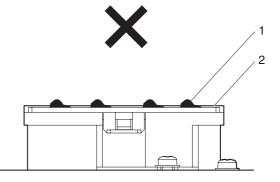

Flushing-box sponges are an essential part to make printing consistent.

(1) Replacement time

Replace Flushing-box sponges in the following situations.

• When ink clumps have accumulated on Flushing-box sponges beyond Flushing-box frame

No.	Name
1	Ink clump
2	Flushing-box frame

(2) **Type**

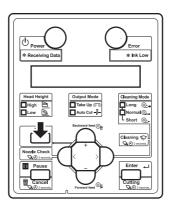

TIP

For types and details of Flushing-box sponge, refer to 8.3 Options/Supply list.

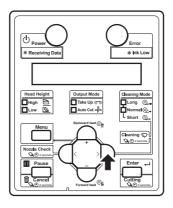

(3) Replacing steps

Follow the steps below to replace Flushing-box sponges.

- 1. Check the followings while the printer is turned ON.
 - Printing or other operations are not in progress.
 - Operation panel display is Normal.
- 2. Display the CR Maintenance menu on Operation panel.
 - a. Press the [Menu] key on Operation panel.

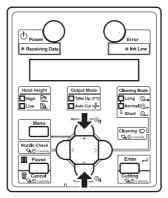

- "Menu1: Setup>" is displayed on Operation panel.
- Operation panel shifts to the Setup menu display.
- b. Press the [>] key on Operation panel.

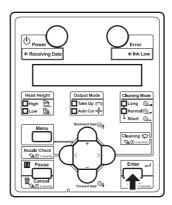

• "Set1: User Type" is displayed on Operation panel.

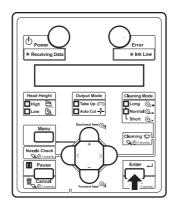

c. Press the [+] key or [-] key on Operation panel to select "Set 20: CR Maintenance".

d. Press the [Enter] key on Operation panel.

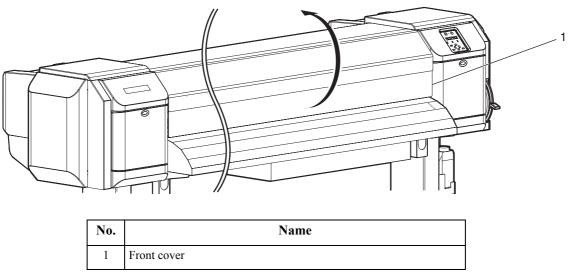

- "CR Mainte.: Start" is displayed on Operation panel.
- The display enters the CR Maintenance menu. 正常 5.1.20 CR Maintenance menu
- 3. Press the [Enter] key on Operation panel.

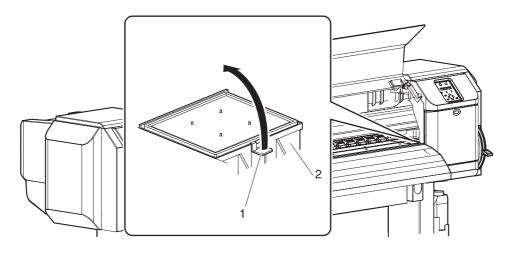

- Maintenance starts.
- Print head moves to the left.
- "CR Mainte.: End" is displayed on Operation panel.

4. Open Front cover.

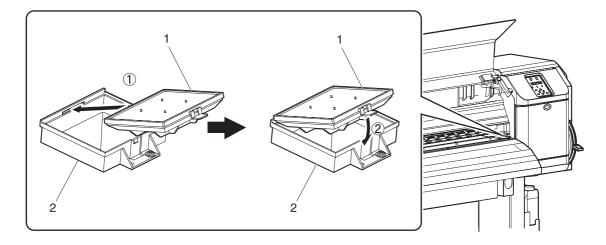

- Replace Flushing-box sponge in a short time. Leaving Print head at the replacement position may result in clogging of Print head.
- 5. Lift Flushing-box sponge tab and unhook. Then, remove Flushing-box sponge.

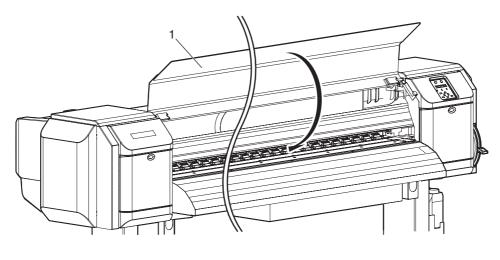

No.	Name
1	Flushing-box sponge tab
2	Flushing boxes

 Do not spill waste fluid when replacing Flushing-box sponges. If waste fluid comes into contact with Grid roller, it may damage its surface and affect media feeding. 6. Install the new Flushing-box sponge to each Flushing box.

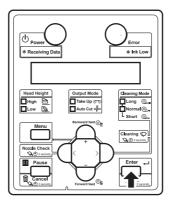

No.	Name
1	Flushing-box sponges
2	Flushing boxes

7. Close Front cover.

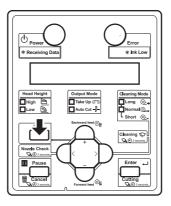

No.	Name
1	Front cover

8. Press the [Enter] key on Operation panel.

- Print head returns to its original position.
- "CR Mainte.: Start" is displayed on Operation panel.
- 9. Press the [Menu] key on Operation panel.

- The printer enters Normal.
- Flushing-box sponge replacement is complete.

6.1.4 Replacing Cutter

This section describes when and how to replace Cutter.

(1) Replacement time

Replace Cutter when the following situation occurs.

- a. When the media is not cut smoothly
- b. When the cut surface is feathered, etc

(2) Type

Our genuine Cutter that is compatible with the printer is as follows.

Description	Model No.
Cutter replacement blade	VJ-CB

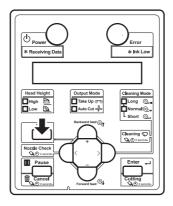

(3) Replacing steps

Follow the procedure below to replace Cutter.

TIP

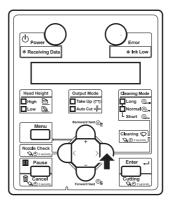

The illustrations used in this section are those of VJ-1638.

- 1. Check the followings while the printer is turned ON.
 - Printing or other operations are not in progress.
 - Operation panel display is Normal.
- 2. Display the CR Maintenance menu on Operation panel.
 - a. Press the [Menu] key on Operation panel.

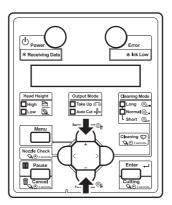

- "Menu1: Setup>" is displayed on Operation panel.
- Operation panel shifts to the Setup menu display.

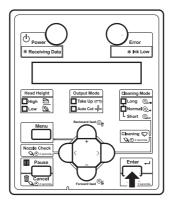

b. Press the [>] key on Operation panel.

- "Set1: User Type" is displayed on Operation panel.
- c. Press the [+] key or [-] key on Operation panel to select "Set 20: CR Maintenance".

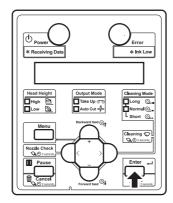

d. Press the [Enter] key on Operation panel.

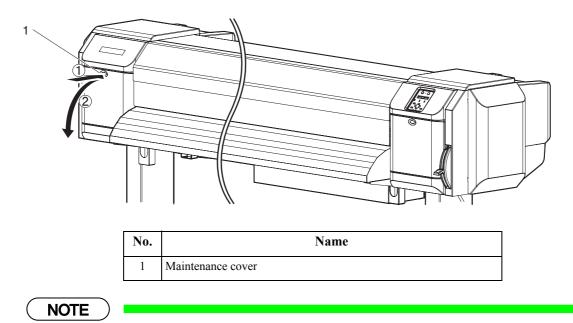

- "CR Mainte.: Start" is displayed on Operation panel.
- The display enters the CR Maintenance menu.
 X\$\vec{2}\$5.1.20 CR Maintenance menu

3. Press the [Enter] key on Operation panel.

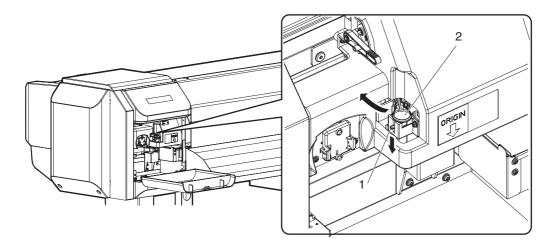

- Maintenance starts.
- Print head moves to the left of the printer (cutter replacement position).
- "CR Mainte.: End" is displayed on Operation panel.
- 4. Open Maintenance cover on the left of the printer.

• Replace Cutter in a short time. Leaving Print head at the cutter replacement position may result in clogging of Print head. 5. Press the tab of Cutter lightly, turn Cutter holder in the direction as illustrated below.

NOTE

- Do not press the tab of Cutter strongly or suddenly let go of it. There is a spring in Cutter holder and it may fly out.
- Do not push Cutter all the way in. Cutter blade may damage the inside of the printer.

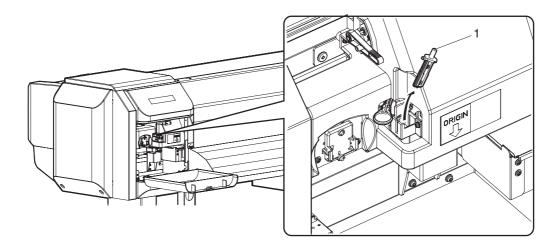

No.	Name
1	Tab of Cutter
2	Cutter holder

6. Remove Cutter.

- Do not touch the blade edge. It may cause an injury.
- Do not touch the cutter blade edge with a hard substance or drop Cutter. Cutter blade may be damaged or chipped.

NOTE

• Used Cutter should be put in a plastic bag, etc, and dispose of it in compliance with local ordinance and instructions of local authorities.

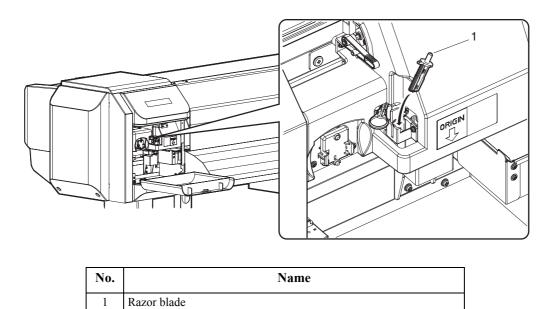

No.	Name
1	Razor blade

7. Install a new Cutter as illustrated.

NOTE

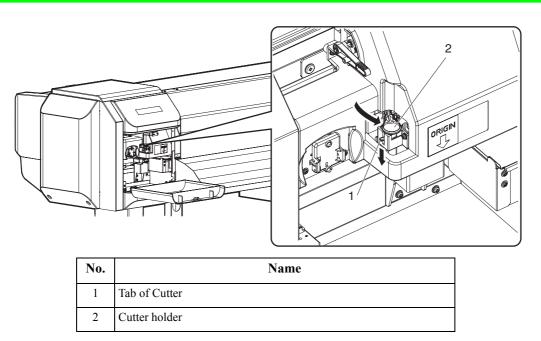

• Make sure that the spring in Cutter holder does not fly out while installing.

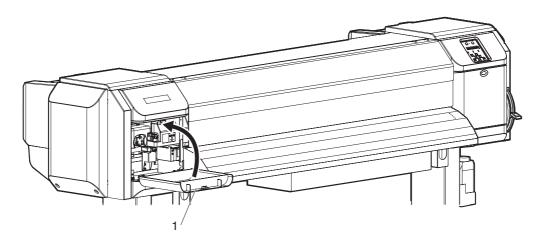

8. Press the tab of Cutter lightly, return Cutter holder to its initial position.

NOTE

- Do not press the tab of Cutter strongly or suddenly let go of it. There is a spring in Cutter holder and it may fly out.
- Do not push Cutter all the way in. Cutter blade may damage the inside of the printer.
- Refer to the illustrations below and install Cutter holder correctly. If it is not installed correctly, it may cause an error. If an error occurs, check if Cutter holder is installed correctly.

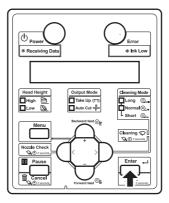

9. Close Maintenance cover.

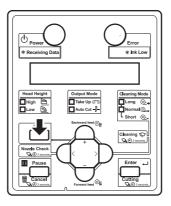

No.	Name
1	Maintenance cover

10. Press the [Enter] key on Operation panel.

- Print head returns to its original position.
- "CR Mainte.: Start" is displayed on Operation panel.
- 11. Press the [Menu] key on Operation panel.

- The printer enters Normal.
- Cutter replacement is complete.

6.2 Cleaning the printer

Periodic (every month) cleaning is necessary to use the printer in good condition.

• Do not insert or drop metal or flammable objects into the printer through openings such as a vent.

It could lead to an electric shock or fire.

• If foreign substances or liquids such as water entered the printer, do not use the printer as it is.

It could lead to an electric shock or fire.

Immediately turn OFF the power switch, disconnect the power plug from the electric socket, and contact your local MUTOH dealer.

- Unplug the power cable with the power off, before cleaning the outer case and inside of the printer.
- Do not use volatile solvents such as thinner, benzene, or alcohol. These solvents may cause damage to the paint.
- Make sure that no moisture enters the printer. The electric circuit inside the printer may be short-circuited.
- Never open covers attached using screws under any circumstances. This may cause an electric shock or a malfunction.

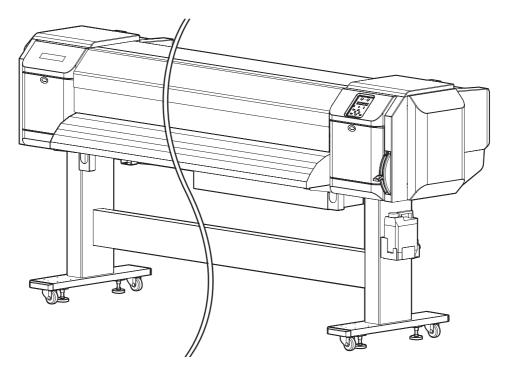

This section describes how to clean each part of the printer.

6.2.1 Cleaning the outer case

• Unplug the power cable with the power off, before cleaning the outer case of the printer.

This section describes how to clean the outer case.

Wipe out dust and dirt attached to the outer case by using a soft cloth.

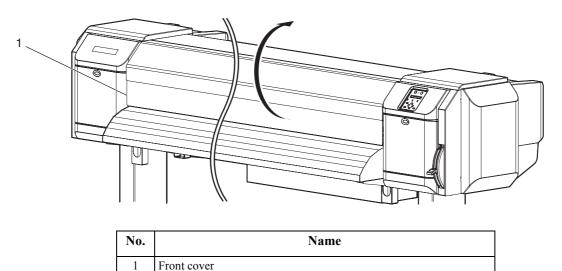

6.2.2 Cleaning the inside of the printer

• Unplug the power cable with the power off before cleaning the inside of the printer.

This section describes how to clean the inside of the printer.

Follow the procedure below.

1. Open Front cover.

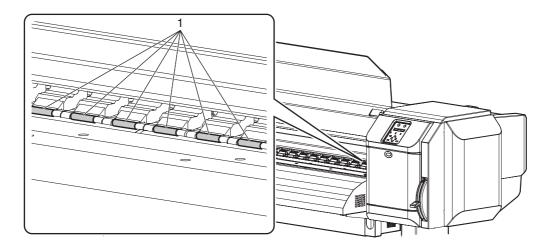

2. Remove paper powder and dust attached to Pressurizing rollers using a soft brush.

NOTE

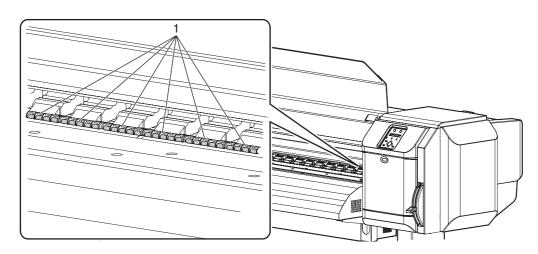

• Do not blow paper powder inside the printer using tools such as an air duster. It may cause an abnormal noise from the inside of the printer.

<VJ-2638/1638>

No.	Name

	1	Grid roller

<VJ-1638W>

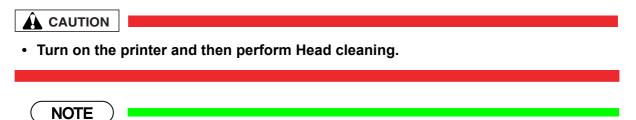

No.	Name
1	Grid roller

6.2.3 Head cleaning

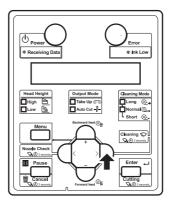

If the printed data is unexpectedly faint or dots are missing, clean the Print head and Nozzles by performing Head cleaning.

Follow the procedure below to perform Head cleaning.

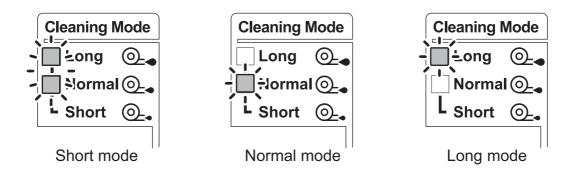

- When not using the printer for a long period (one week or more), perform Head cleaning once a week. If not performing Head cleaning, Print head is clogged. Doing so will preserve print quality.
- 1. Confirm that Operation panel is Normal.
- 2. Check that Media loading lever is lowered.

- 3. Press the [>] key on Operation panel to select the Cleaning mode.
 - Press [>] key to select the Cleaning mode.
 - The LED lights on Operation panel show the currently selected Cleaning mode.

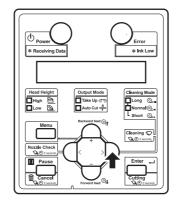

• The following figures explain the LED lights for each Cleaning mode.

Cleaning mode	Description
Short mode	Discharges smaller amount of ink compared to "Normal".
Normal mode	Select this mode normally.
Long mode	Discharges larger amount of ink compare to "Normal". Used when Print head does not improve by normal head cleaning.

Head Cleaning can also be performed from Panel Setup menu.
 X 5.3 Cleaning menu

4. Press the [Cleaning] key on Operation panel for more than two seconds.

- Head cleaning starts.
- "Cleaning **%" is displayed on Operation panel.
- After Head cleaning is complete, Operation panel shifts to Normal.

- To perform head cleaning during printing while the head height is set to High, make sure to do the following.
 - When "Change Head Gap Low" is displayed on Operation panel, set the head height to Low.
 - After head cleaning is complete, "Change Head Gap High" is displayed on Operatino panel. Set the head height to High. After changing the setting, printing starts.
 X374.2.5 Head height adjustment
- If blurs or lacking parts in printed media do not disappear with one time of Head cleaning, perform Strong cleaning.
- If blurs or lacking parts in printed media do not disappear with several times of Head cleaning, refer to **7** Troubleshooting, and take appropriate measures.

6.2.4 Cleaning Cleaning wiper

This section describes how to clean Cleaning wiper.

(1) Time for cleaning

Once a week, or when blurs or lacking parts appear on printed media after Head cleaning.

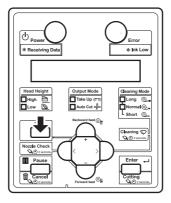

(2) Cleaning procedures

Follow the procedure below to clean Cleaning wiper.

• Turn on the printer and then clean Cleaning wiper.

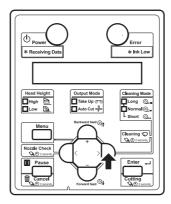

NOTE

- Use Cleaning stick to clean Cleaning wiper. For details of Cleaning stick, refer to 8.3 Options/Supply list.
- 1. Turn on the printer and then check the followings.
 - Printing or other operations are not in progress.
 - Operation panel display is Normal.
- 2. Display the CR Maintenance menu on Operation panel.
 - a. Press the [Menu] key on Operation panel.

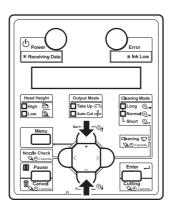

- "Menu1: Setup>" is displayed on Operation panel.
- Operation panel shifts to the Setup menu display.

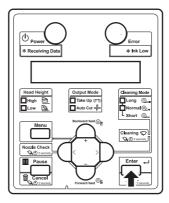

b. Press the [>] key on Operation panel.

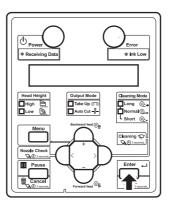

- "Set1: User Type" is displayed on Operation panel.
- c. Press the [+] key or [-] key on Operation panel to select "Set 20: CR Maintenance".

d. Press the [Enter] key on Operation panel.

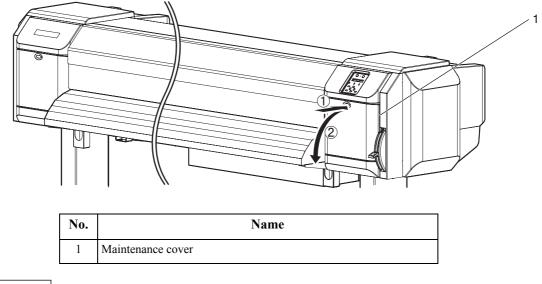

- "CR Mainte.: Start" is displayed on Operation panel.
- The display enters the CR Maintenance menu.
 CF 5.1.20 CR Maintenance menu
- 3. Press the [Enter] key on Operation panel.

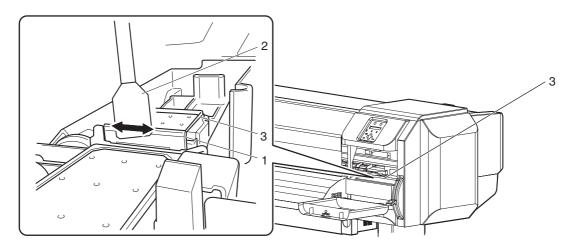

- Maintenance starts.
- Print head moves to the left.
- Cleaning wiper rises.
- "CR Mainte.: End" is displayed on Operation panel.

4. Open Maintenance cover on the right of the printer.

- When cleaning Ceaning wiper,
- Do not touch Cleaning wiper and Head cap unit. Head cleaning may not be performed correctly because of oil from your hands.
- Make sure to use Cleaning stick to wipe Print head. A wet Cleaning stick may cause Print head to clog.
- Do not reuse Cleaning stick. The attached dust, etc may damage Print head.

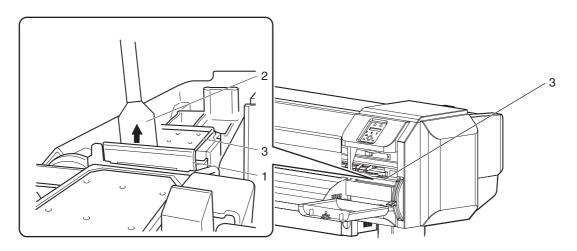

- 5. Use Cleaning stick to remove the ink and dust on Cleaning wiper.
 - a. Front side of Cleaning wiper: Remove the ink and dust in the horizontal direction.

No.	Name
1	Cleaning wiper
2	Cleaning stick
3	Head cap unit

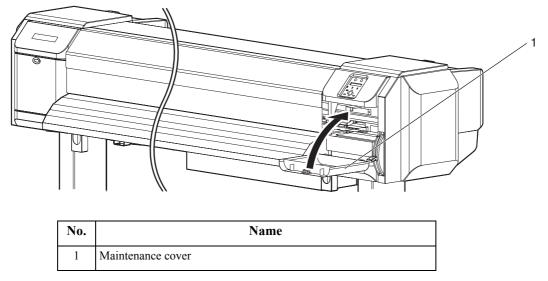

b. Cleaning wiper back side:

Remove the ink and dust in the upper direction.

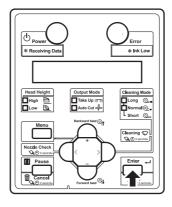

No.	Name
1	Cleaning wiper
2	Cleaning stick
3	Head cap unit

- 6. Close the right maintenance cover.
 - Close the cover firmly until it is locked.

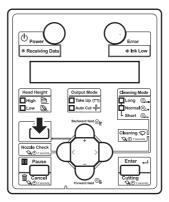

7. Press the [Enter] key on Operation panel.

- Cleaning wiper returns to the original position.
- Print head returns to its original position.
- "CR Mainte.: Start" is displayed on Operation panel.

8. Press the [Menu] key on Operation panel.

- The printer enters Normal.
- Cleaning Cleaning wiper is complete.

6.2.5 Cleaning the circumference of Print head

This section describes how to clean the circumference of Print head.

(1) Time for cleaning

When foreign substances such as dust or ink clump that can cause missing dots or ink leakage is attached around Print head

(2) Cleaning procedures

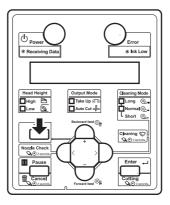

Follow the procedure below to clean the circumference of Print head.

• Turn on the printer and then clean around Print head.

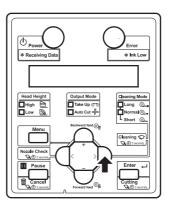

NOTE

- Before cleaning the circumference of Print head, read this procedure thoroughly to fully understand it, and clean promptly and correctly.
- Print head is not in the capping station during cleaning around Print head. Cleaning must be complete before Print head dries. This operation should be done within 15 minutes. If the operation lasts over 15 minutes, follow the steps 8 and 9 and stop the operation, perform head cleaning, and resume cleaning.
 13 6.2.3 Head cleaning
- Use Cleaning stick to clean the circumference of Print head. For details of Cleaning stick, refer to 8.3 Options/Supply list.
- 1. Turn on the printer and then check the followings.
 - Printing or other operations are not in progress.
 - Operation panel display is Normal.

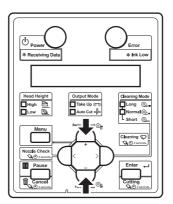

- 2. Display the CR Maintenance menu on Operation panel.
 - a. Press the [Menu] key on Operation panel.

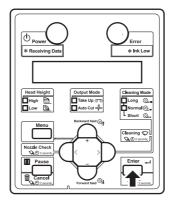

- "Menu1: Setup>" is displayed on Operation panel.
- Operation panel shifts to the Setup menu display.
- b. Press the [>] key on Operation panel.

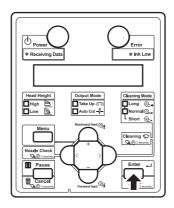

- "Set1: User Type" is displayed on Operation panel.
- c. Press the [+] key or [-] key on Operation panel to select "Set 20: CR Maintenance".

d. Press the [Enter] key on Operation panel.

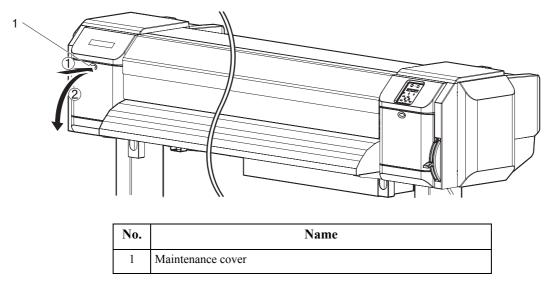

- "CR Mainte.: Start" is displayed on Operation panel.
- The display enters the CR Maintenance menu. 正常 5.1.20 CR Maintenance menu
- 3. Press the [Enter] key on Operation panel.

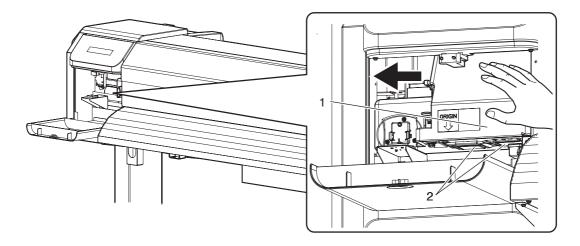

- Maintenance starts.
- Print head moves to the left.
- "CR Mainte.: End" is displayed on Operation panel.

4. Open Maintenance cover on the left of the printer.

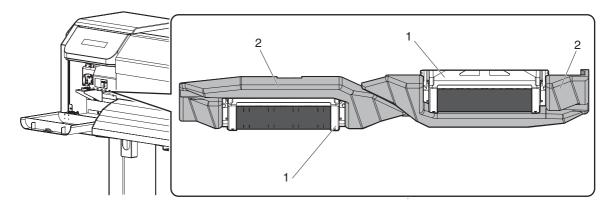

5. Move Print head by hand until you can see the circumference of Print head.

No.	Name
1	Print head section
2	Circumference of Print head

• Do not push Print head strongly. It may cause damage and poor print quality.

- 6. Use a penlight, etc to check if any foreign substance such as dust or ink clump is attached to the following places.
 - Circumference of Print head (silver colored metal assembly)
 - Head guide (black plastic)

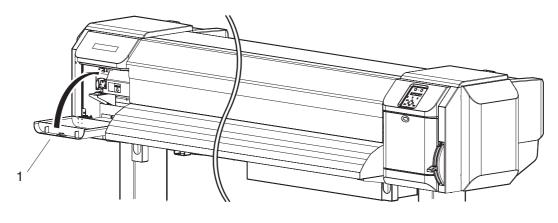

No.	Name
1	Circumference of Print head (silver colored metal assembly)
2	Head guide (black plastic)

- When cleaning around Print head,
 - Never touch Print head nozzles. Doing so may damage Print head.
 - Do not touch the tip of Cleaning stick. Print head may be damaged because of oil from your hands.
 - Never put water, etc on the tip of Cleaning stick.
 Doing so may damage Print head.
 - Do not reuse Cleaning stick. The attached dust, etc may damage Print head.

- 7. When some foreign substance such as dust or ink clump is attached, use Cleaning stick to remove it.

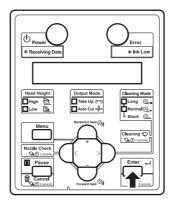

No.	Name	
1	Cleaning stick	
2	Nozzles (Never touch Nozzles.)	

- 8. Close Maintenance cover on the left.
 - Close Cover firmly until it is locked.

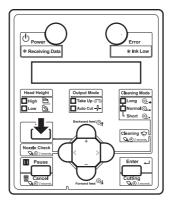

No.	Name
1	Maintenance cover

9. Press the [Enter] key on Operation panel.

- Print head returns to its original position.
- "CR Mainte.: Start" is displayed on Operation panel.

10. Press the [Menu] key on Operation panel.

- The printer enters Normal.
- Cleaning the circumference of Print head is complete.

6.3 Disposal of waste fluids

The timing and method for the disposal of waste fluid are described below.

(1) Disposal timing

Dispose of waste fluids in the following cases:

- a. When Waste fluid tank is more than half full.
- b. When "Full WasteInkTank" is displayed on Operation panel.

(2) Disposal method

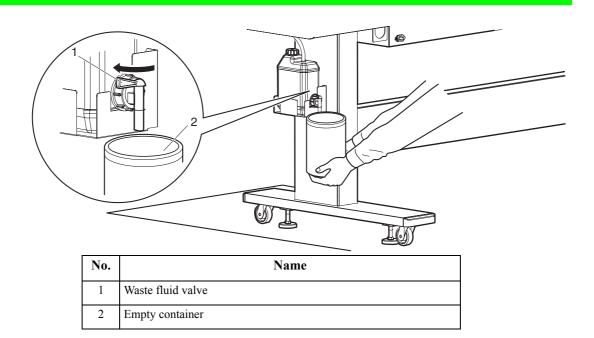

Follow the procedure below to dispose of waste fluid.

WARNING

- You are obligated to properly dispose of waste fluid from the printer in compliance with Wastes Disposal and Public Cleansing Act and local ordinances. Delegate disposal to an industrial waste disposal contractor.
- 1. Ready an empty container such as a supply waste fluid bottle, to contain the waste fluid.
- 2. Lay a protective material, such as waste media, on the floor under Waste fluid tank.
- 3. Open the waste fluid valve, and transfer the waste fluid to the container.

NOTE

• When transferring the waste fluid to the empty container, the waste fluid may spatter. Make sure to put the container close to the waste fluid valve.

- 4. After pouring the waste fluid to the empty container, close the waste fluid valve securely.

No.	Name	
1	Waste fluid valve	

- 5. Wipe the opening of Waste fluid valve with a cloth, etc.
- 6. Dispose of the waste fluid as an industrial waste product.
 - Disposal of waste fluids is completed.

6.4 Moving or transporting the printer

This section describes how to move or transport the printer.

6.4.1 Moving the printer

This section describes how to move the printer.

- When moving the printer, make sure to maintain a horizontal position.
- Do not slant the printer, prop it against a wall or turn it upside down. The ink inside the printer may leak. Moreover, normal operation after shifting (to these positions) cannot be guaranteed.

(1) Preparation before moving

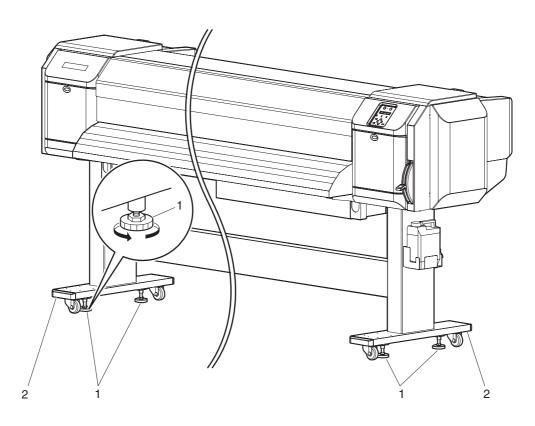

When using the dedicated Stands, follow the procedure below to move the printer.

- 1. Make sure that the printer is turned OFF. 文字 3.2.2 Turning the power OFF
- Dispose of waste fluid.
 C音 6.3 Disposal of waste fluids
- 3. Remove all the cables, such as Power cord set.
- 4. Loosen the four adjusters of Stand as shown in the next illustration.

5. Move the printer.

NOTE

• The casters supplied with the dedicated Stand are manufactured for little movement in flat indoor areas, not for transporting equipment.

No.	Name
1	Adjusters
2	Stands

(2) Reinstalling

After moving the printer, follow the procedure below to set it ready for use.

- 2. Move and install the printer to the location.
- Attach Cables, such as Power cord set.
 Image: Solution and Solution an
- Perform Nozzle check, and then confirm that there is no clogging in Print head.
 X3.5.1 Nozzle check
- Perform Alignment.
 X 3.6 Print quality adjustment

6.4.2 Transporting the printer

When transporting the printer, make sure to pack it in the same condition as purchased, using protective and packing materials to protect the printer from vibration and shocks.

NOTE

• When transporting the printer, consult the MUTOH product dealer at your point of purchase.

7 Troubleshooting

This chapter describes possible troubles and countermeasures of this product.

If the error not included in any items of this section occurs, contact your local MUTOH dealer.

If you want to receive product warranty, prepare the warranty certificate.
 If the warranty certificate is not presented, the repair will not be covered by the warranty even if within the warranty period.

If you have signed a maintenance service contract, prepare that or a similar document.

7.1 Malfunctions and failures

This section describes undisplayed malfunctions and failures of the printer, possible causes and countermeasures.

7.1.1 Problems in installation and introduction

(1) Cannot perform the initial ink charge

No.	Display	Description	Remedy	Reference
34	Measurement Error (Instrument)	A communication error with Spectrophotometer (SPECTROVUE VM-10) occurred while measuring the color target. (VJ-2638/1638)	Check the connection between the printer and Spectrophotometer (SPECTROVUE VM-10).	X왕 4.5 Using Spectrophotomet er (VJ-2638/1638)
35	Measurement Error (Cancelled)	Printing or measuring the color target has been cancelled from Operation panel or the RIP software. (VJ-2638/1638)	Start printing and measuring the color target again.	도함 4.5 Using Spectrophotomet er (VJ-2638/1638)
36	Measurement Error (White Calibration)	White calibration has failed. (VJ-2638/1638)	 Open Maintenance cover on the left side of the printer and install White reference plate correctly. When White reference plate is contaminated, apply a damp and tightly squeezed soft cloth to clean it. Start printing and measuring the color target again. If you still have trouble, contact your local MUTOH dealer. 	【3 4.5 Using Spectrophotomet er (VJ-2638/1638)
37	Measurement Error (Illegal Operation)	Colorimeter has been installed forcibly without following the measurement procedure. (VJ-2638/1638)	Remove Colorimeter.	L≌ 4.5 Using Spectrophotomet er (VJ-2638/1638)
38	Measurement Error (Head height)	Head height is set to High (VJ-2638/1638).	Set the head height to Low or Mid.	〔查 4.2.5 Head height adjustment

NOTE

• [*******] of the error display indicates the ink color that is subject to warning.

7.2.3 Error requiring restart

This section describes errors requiring restart and remedies.

An error requiring restart is displayed if a fatal operational failure such as the following occurs.

- When an obstacle that prevents printing occurs
- When a problem occurs with the electrical circuit (PCB, motor, sensor, etc.) of the printer
- When a failure in the printer control program occurs

If an error requiring restart occurs, the printer stops operating after performing the following operations.

- 1. The drive power automatically shuts down.
- 2. All Lamps on Operation panel blink, and the buzzer rings continuously.
- 3. The error message is displayed on Operation panel.

Pressing any key on Operation panel stops the beeping.

For an error requiring restart, operation will return to normal after removing the cause of the error and restarting the printer.

If the same error continues to be displayed, contact the your local MUTOH dealer. Be sure to tell us the code no. of the error message when you contact us.

No.	Display	Description	Remedy	Reference
1	E*** Error []	A problem that does not have a remedy has occurred.	1. Remove obstacles such as paper scraps in the drive system.	译了.3 The media is jammed
			2. Confirm that the replaced items are correctly attached.	C會 6.1 Replacing consumable components
			3. Turn OFF the printer and turn it ON again after 10 seconds or longer.	

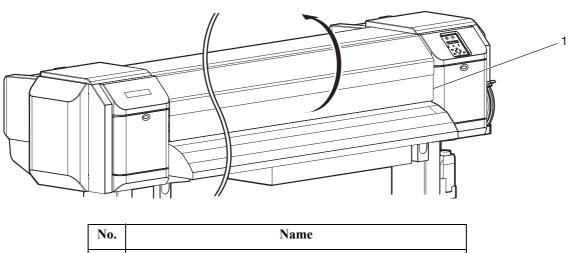

NOTE

- "***" in the error message is the code no. that indicates what type of error occurred.
- The command code representing the error occurred may be indicated in [].
- For the settings on your PC side, refer to the Operating Manual attached with your PC.

7.3 The media is jammed

When the set media is jammed, follow the procedure below to remove it.

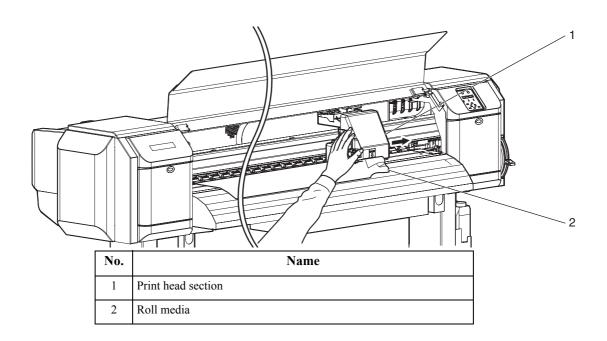

- 1. Turn OFF the power of the printer. 〔晉3.2.2 Turning the power OFF
- 2. Open Front cover.

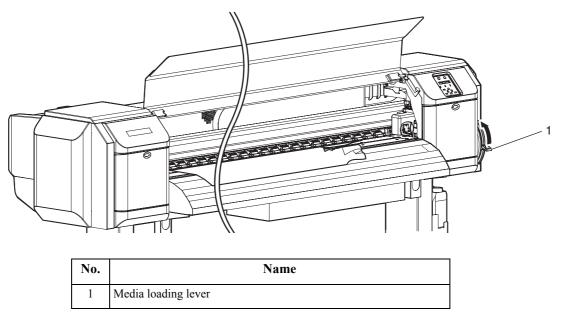

- 1 Front cover
- 3. Move Print head section from the top of the media to the right.

NOTE

 When the head height is set to Low, change it to High and then shift Head. After shifting Head, change the setting back to Low.
 X 4.2.5.2 When setting the head height to High
 X 4.2.5.3 When setting the head height to Low

4. Raise Media loading lever.

5. Pull the media to your side, and cut the torn part with cutting tools such as a razor blade.

No.	Name
1	Razor blade
2	Roll media

- 6. Turn Flanges of Roll media holder and take up the roll media.

7. If paper dust or pieces of paper remain inside the printer, remove them.

8 Appendix

This chapter describes specifications and included components with this printer.

8.1 Product specifications

8.1.1 Printer specifications
